Sales Management Comments

We are always so proud of our allegiance to the purity of Simmental in hosting this sale. It is the best replica of tradition to where the breed came from. Now in saying that, we use the word "Fleckvieh" in the sale title but that doesn't mean we don't respect the good that has come from the Swiss lineage, hence the the final part of the sale's title "Fleckvieh Equation - Fullblood Simmental Sale". Regardless of where in Europe these cattle hail from, we are honoured to promote them because we legitimately believe in them. As said in the past, we aren't just simple "fair-weather fans" to Fullblood Simmental. We were fully prepared to promote them even when their popularity wasn't apparent and we are still as enthused as ever. The nostalgia we have with the former sales, such as Fleckvieh Fest, Fleck Focus and The Fleck Select that are the birth origins of this sale grant us the experience to understand and more importantly, appreciate, Fullblood Simmental. This is the probably one of, if not the best, representative of Fullblood/Fleckvieh Simmental Cattle that happens in North America annually.

From that, the Purebred cattle had to be developed somehow and to have this sale co-dependant with our Ultimate Red & Black Sale is a real testament to the breed's evolution in Canada. I guess that's why this double header sale day has the largest crowd of the year as any sale in the business. Come early to get your seat!

Call us if we can help with any of your purchases or any other inquiries you may have please.

Merry Christmas,

*Celebrating
50 Years
1967-2017*

Mr. Jim 4D is a OSF Vazquex 1B(our Scottish Neff son) and out of a Saulus-Dorsim Massie daughter. He is complete outcross and the only one in North or South America and will be for a while as she had a daughter this year. This will give the new owner a new line for quite some time. Lots of hair, very correct with outstanding growth. Have a look at this guy.

100% Fleckvieh. The Willie sons are full of growth and good performance. Prince William was the heaviest weaning at 950lbs. This guy is super long spined, big footed and has been very mature looking from an early age. He stems from a big, strong, King Arthur cow who we admire for her udder quality, spring of rib and super quiet disposition. This bull is straight up going to add pounds to his offspring and he should pass on the great maternal strengths such as udder quality, longevity and shear production from some really great cow families. Contact us for more information.

100% Fleckvieh. Right from an early age Certified has shown herd bull potential. He is extremely soft sided and loose hided with great performance. The muscling and testicular development is outstanding at 10 months of age. His dam is no slouch. She's a broody, big footed cow, with a beautiful udder. His great grandmother, Wyoming 9W, is equally as good and a foundation cow for us with several daughters in the herd. Certified should be able to produce functional, easy keeping, high producing sons and daughters. We look forward to what this fella's future holds in store.

100% Full Fleckvieh. Lithium is sired by the foundation of our entire herd, Arnold's Eveready, and is represented by one of the cow families that has been a cornerstone in our program. This cow family has been extremely productive. From the day his dam was born, our daughter fell in love with her and chose well to add her to her own little herd. JNR 314Z's first calf was a heifer purchased privately by Kulyk Simmentals. Her second calf, a heifer, has been retained within the herd and has been admired by many. This being her third calf, she has more then proven herself. They are all anchored by SPJ 9G, a cow we purchased at the beginning of our herd development. With many generations in the herd descending from her, she is still present through either sons or the many daughters. Lithium's mating proved to be a home run as he exemplifies what we truly breed for – structural soundness, length of spine, spring and depth of rib and natural do-ability.

100% Full Feckvieh. Ammo is packing all the qualities the Bullet Proof and Salton matings have produced – extremely soft sided, spacious chest floor, strong loin and very free moving. The hopes for a heifer calf from this mating was what we were striving for but Ammo hasn't disappointed. His cow family has also been in the forefront of the spot lights within our cow herd and he is anchored by the MRLN 100K cow which was the capacity queen and a powerhouse matron that we utilized for her ease of keeping and overall soundness to create generations of lineage in which never miss! Unfortunately we lost Bullet Proof so this was the last natural calf crop we will have from him and with a very limited amount of semen on him, his offspring will be very limited on the market in the future.

Full Fleckvieh. When we decided to bring bulls to Equation for the first time, we knew they needed to be the full package deal that represented the diversity of our program. ALLM Colossal has raised us some of our most powerful calves over the years and this guy is no different. Being our heaviest, best gaining bull in the pen, Eskimo is the true definition of performance. His dam is a young, thick-boned, larger framed bull-making machine and has wonderful mothering abilities. Lady Siski is one you'd have a difficult time finding any faults with. I have no doubt in my mind that Eskimo will produce you top-notch females and make an impressive impact to your bull program. We don't need to be obvious so be sure to pay attention to this guy's extraordinary length and muscle development. To boot, his genetic package will add a big red bow on top of his head just in time for Christmas.

Full Fleckvieh. As mentioned previously, these future herd sires were chosen to showcase our program. Eskimo displays the performance behind our horned department while Ember is one of the feature bulls in our polled lineup. This bull just keeps on gaining. All of our calves are fed a grain-free ration that allows them to grow to their full and honest potential. Ember is a soggy, docile bull, which are traits we are seeing in Blueprint calves. Not to mention, his hair coat and eye appeal makes him irresistible. BEN Mona Legend continues to flourish in our program not only with her calves but also with her infamous personality. She showed us she's still going strong by raising us our high selling bull calf at the March 2017 Red Deer Bull Sale. Blueprint calves are making quite an impact in our industry and we are confident that Ember will continue that shock wave in any program.

1164176. Observed bred April 3. Ultrasound safe.

It is with mixed emotion that Deloriss 620D will be leaving the farm. We are excited to offer this outstanding She Devil descendant for your appraisal, however, we wish that she was staying at home to build her legacy here. The dam of this massive barreled, deep ribbed, long spined heifer hasn't created 620D by chance. Her first two calves pasted through our bull sales and averaged an astounding \$11,375. Not bad for her first two tries. When we bred her a third time to Double Bar D United, the \$102,000 high seller, we had high expectations. The result couldn't have been any better. Deloriss has been a standout since birth with many admirers over the last two years. Bred to our new calving ease specialist, Skywest Domi for an early January calf.

Tania is a striking Viking daughter that is sure to impress. She has feminine features with the mass and depth of body to make a tremendous brood cow. Tania is the first female to sell off our popular Viking bull. His sons were very well accepted this past spring and with his strong maternal lineage we are very excited to get the daughters into production. Tania's dam has been a no miss cow since selecting her out of the inaugural Western Harvest as the high seller. She is a cow with tons of capacity, shape and strong udder. To add to the intrigue, Tania is bred to the exciting JNR's Titanium. He calved extremely well with moderate birth weights but maintained high growth potential. A ¾ sibling to this breeding was the pasture favorite among visitors this summer.

Bred AI March 27 to Anchor D Macs Ego 132B P800826. Exposed April 5 - May 15 to JNR's Titanium 1143132. Ultrasound safe to AI.

Mari is a long bodied, heavily muscled, well balanced female. Lots of pigmentation and cherry red coloring make her easy to notice. Mari is sired by Philosophy, a bull that garnered much attention through Equation a few years ago. This female's dam is an extremely attractive female with ease of fleshing and high performance. She is backed by the tremendous MTV Toni 1F cow family who has been extremely influential through notable daughters like MTV Becky at Sunny Valley. MTV Mary is a maternal sibling to Garner, former herd bull for ourselves and Kulyk Simmentals. Mary 19T also raised a high selling bred heifer to WJ Simmentals in 2014. Mari 624D is bred early to the exciting young calving ease sire Anchor D Macs Ego 132B, combining great calving ease and maternal power.

100% Fleckvieh. Classified and Willie have done it again!!!! Ellie Mae is the type of female that anyone would love to have in their herd. She is loaded with hair, broodiness and eye appeal. A genetic full brother sold this past March for \$14,000 to Swantetwitt Simmentals. Her dam is a hard working young cow who we believe will make an impact in our herd. A full sister will calve for us this January to our Kaptain 19C. Take a close look. Ellie Mae is loose made and soggy with loads of rib shape and a hindquarter that all breeders desire.

100% Full Fleckvieh. JNR Calianna is a true gem. Concept is a bull we raised that from the time he was young was destined for the next piece of the puzzle. He combines the Anchor "T" 50U cow family through Salton, Crackerjack and MFL 59E cow on a maternal side and sired by none other than Bullet Proof himself, the genetic masterpiece brought endless potential to our program. Calianna's dam is JNR 344Z which came from an embryo I had bought from Gibbons Farms, sired by Jahari and out of what was one of my favorite cows out of the MFI dispersal, MFI 19L who is still going strong at almost 17 yrs of age. There's no guesswork here at all, as she's a female that has the potential to write her own legacy!

Welcome! After a one year hiatus, we are absolutely thrilled to be back at Fleckvieh Equation 2017. Our selections this year continue to showcase our breeding philosophy - you will find strong maternal lines across the group, with deep extended pedigrees to ensure quality and consistency. The heifers have been double vaccinated and will receive scour-guard before sale day.

If you have any questions about our heifers or our program, please do not hesitate to contact us. We look forward to visiting with you on December 17th in Red Deer.

Bred AI March 25 to Sanmar Polled Pharao 12P P618914. Exposed March 31 - June 3 to APLX Rambo 4B P1126410.

Full Fleckvieh. Heavily pigmented and dark cherry red, Flora combines the power of FGAF Windsurfer with the maternal strengths of JB CDN Hennessey. Flora's dam, Anchor D Fergus, was our pick from the 2014 Pasture Treasures sale. We were drawn to her pedigree that stacks maternal strength in K2 Fergie, Kananaskis and RH Patricia, with the paternal power of Anchor "T" Legend, Jahari and Arni 8M to create a pretty cool young cow that we are really excited about. We have been very pleased with the consistency of the Hennessey offspring - his calves all arrive easily and his daughters combine lots of capacity with feminine front ends. Flora is Jeanne's favorite of the sale heifers this year, so all the volume comes with a quiet temperament that might just enjoy a scratch!

Bred AI March 26 to Sanmar Polled Pharao 12P P618914. Exposed March 31 - June 3 to APLX Rambo 4B P1126410.

Polled/Scurred Full Fleckvieh. Loaded with volume, Ivy is our second WowEffect daughter and goes back to Beech Bros Imperia, one of the high selling open heifers in the 2010 Equation sale. While we lost him after breeding season this spring, WowEffect is poised to have a tremendous impact on our herd. Fourteen daughters are walking here, combining to form quite an impressive group with that 'Wow' factor. Ivy is double polled (and Igenity tested as heterozygous), but please note that she developed small scurs as a calf and is registered as such. Bred to Sanmar Polled Pharao, the odds are ever in your favor for a polled baby in early January.

Bred AI March 25 to Dora Lee Eclipse FF9R S639824. Exposed March 31 – June 3 to APLX Rambo 4B P1126410.

Full Fleckvieh. Cynthia represents the first opportunity to purchase a FGAF WowEffect daughter at auction. Soggy, deep, and earning immediate attention from our pasture visitors this summer, it is no surprise that Cynthia is also a direct daughter of one of our founding females, Dora Lee Christina 28S. Christina was selected due to her incredible depth of pedigree, combining Holb, Solway, Romulus and LJB Jade. She has been a true matron for us, with daughters, grand-daughters and great-grand daughters retained in our herd, a high selling daughter in Applecross Candice at Equation 2015, and high selling sons in APLX Santana 11Y and APLX Javar 18A. Named for her Grandma, we are confident Cynthia will carry on the family tradition and develop into a top end brood cow.

Bred AI March 25 to Dora Lee Eclipse FF9R S639824.

Polled Full Fleckvieh. There is always one heifer that is tougher to part with than all the others, and this year it is Pippa. Pippa is the first calf of Applecross Piper (one of our top young polled cows), and is exactly what we strive to produce for our replacements: loads of volume and capacity, while still retaining neck extension and femininity, to form a complete and balanced female. Pippa is also the first daughter to sell out of our polled heifer bull APLX Rambo, and we just love this combination of the Eagle Ridge Unbelievable and Spruceburn Pauline cow families. Dark red, pigmented and a one-shot AI to Dora Lee Eclipse, Pippa should have a long future as a front end female.

Committed to Quality Performance & Integrity

Welcome to the 2017 edition of Transcon's Fleckvieh Equation. Shelley and I are extremely pleased to be part of this prestigious sale and are exceptionally proud of our offering this year. With only a few heifers in the bred pen to choose from we thought it would be best to select a couple of open heifers for this year. We look forward to catching up with everyone over the weekend and visitors are always welcome at the farm.

Full Fleckvieh. Clearwater Desire is a heifer that we selected right out of the keeper pen. We really appreciate how she is put together and I feel she will go on to produce some great ones. Last winter we calved out our first Vintage daughters and are pleased with the calves they raised; one will certainly be a feature in the 2018 Bull Spectrum bull sale. Her mother is one of our first home raised heifers and her older sister is one of the breds we chose to keep on the farm. We are proud to offer up Desire, from our front pasture to yours!

Full Fleckvieh. Clearwater Daiquiri is a maternal sibling to the heifer purchased by Anchor D in last year's sale. Her mother is a cow that every visitor on the farm notices and appreciates her moderate frame, exceptional muscling and overwhelming capacity. Daiquiri's sire is a son of Dovea Horst and we are extremely pleased with his first calf crop; remember the feature bull I mentioned coming up! Daiquiri is made up of genetics that work, take a close look at her on sale day.

Bred AI March 26 to Virginia Radison 5Z 773557. Exposed April 15 - June 1 to Starwest Canadian Legend 1150768.

Full Fleckvieh. Skywest Destiny has been a heifer that I have been very fond of since she was a calf. She's a big framed heifer with lots of rib and an awesome udder developing. I encourage you to have a good hard look at her, being a FGAF Barbossa daughter and being bred early to Virginia Radison, I'm confident her calf should be a hell damer.

Bred AI March 27 to Virginia Radison 5Z 773557. Exposed April 15 - June 1 to Starwest Canadian Legend 1150768.

Full Fleckvieh. Skywest Dena is a sweet, thick, moderate framed heifer that I'm confident will make a great cow. Her dam is a big framed cow on a big solid foot with a real nice udder. Dena's sire, Virginia Augustus, has done an awesome job making some great females for me, so I decided to finally part with one. Being bred early to Virginia Radison, I believe she will have a great calf.

Exposed April 13 on to Lazy RS Mr Carey FF 1146494. Preg checked safe. Due February.

LRS 173D and LRS 122D are probably the two most complete females I have raised. LRS 173D is packed with powerhouse genetics and shows it. She is a Smithbilt Molson 21M daughter who has made many great females. You all know that I don't push my animals and these two have done it on their own. She is bred to my heifer bull, LRS 152C. I used him last year on five heifers and it worked very well. He is another Anchor "T" Metro son and has Antonius on the dam's side twice.

This young lady is the result of breeding Regio to one of my top fullblood cows. Ziggy Lady is a larger framed heifer calf that exhibits lots of body length who walks out on a strong set of feet and legs. This buckskin colored calf is different in color but when you analyze her you will appreciate her quality.

Image is the heifer that I was hoping for when I made this cross, a polled heifer calf with an extremely different pedigree. Her dam's sire is known as a calving ease specialist and her sire adds a lot of power to his offspring. This young heifer calf not only has power and pedigree, she does it on an exceptional set of feet and legs.

We would like to thank the sale members for this great opportunity to be part of this sale.

We are featuring four 100% Fleckvieh polled heifers for your buying pleasure. All of these heifers were bred to one of our outstanding herd bulls, Lone Stone Baron 104C. This bull is a well balanced herd sire. We are pleased to say that we have one breeding season of calves retained in our herd and are looking forward to future offspring.

If you have any questions about these animals, feel free to give us a call and we will be happy to answer any questions that you may have.
