

RENDEZVOUS FARMS

6th Annual

"Fleckvieh-Influence" Bull & Female Sale

Saturday, **DECEMBER 12, 2009** 1:00 p.m.
Ste. Rose Auction Mart, Ste. Rose du Lac, MB

Welcome to our 2009 Sale

November 15, 2009

My dear friends,

Wow, what a year! We've certainly been challenged in 2009.

To our dismay, 24 year old son David was diagnosed with Crohn's disease on Sept 01. He had spent a summer full of suffering, including a 30-pound loss of weight in over a month, which was unacceptable. In early October he was hospitalized at the Dauphin General Hospital and was administered the total parenteral nutrition procedure. He has since progressed and returned home. I am strongly convinced that my dear son will be able to continue his lifelong dream and vision of a fulfilling and productive life in agriculture. One must continue to believe in one's aspirations, which is a precious help in recovery.

My youngest son Gerald, 19, in spite of his serious allergy problems on the farm, has nevertheless stepped in to help keep the farm wheels turning. I also highly appreciated Laurent, my dad, who, at 83, did almost all the combining and so many other fall chores. I have greatly valued his encouragement and advice in these troubling times.

Regretfully, because of this major setback in preparation for our cattle sale without David, we have tried our very best to piece together this catalog, with David's input from his hospital bed. Therefore, you may find that this year's catalog may be somewhat lacking in its usual completeness of information.

Our 6th Annual Bull and Female Sale is just around the corner! This year, we are again proud of being able to offer our customers close to 100 lots of engineered pedigreed Simmental livestock for your evaluations on December 12th, 2009. Due to the particular situation we find ourselves in prior to this Sale, we felt you would be better served if this Sale were held at the Ste. Rose Auction Mart Ltd. location, instead of on our farm as in previous years.

Most of you already know the quality of our 3-generation-old family run and operated Simmental purebred organization at Rendezvous Farms. As you have witnessed in the past years, we are continuously endeavouring to offer you first-class genetic combinations. We are thus constantly aiming to provide you with the right livestock selections for your herd.

From my own perspective, I believe that there is a renaissance of hope in the cattle business. We must remember that tomorrow's success is built upon the decisions that we make now. The reasons are legion why agriculture will survive. Hence, those who face tough times head-on in agriculture, along with learning and growing, have a vastly higher probability of emerging successful.

Once again, this year we are pleased to have Transcon Livestock Ltd's organizational expertise and longtime auctioneer, Jerry Kanewischer to auction off our cattle. Due to his recent rapid recovery David will be pleased to answer any inquiries concerning details of the cattle on sale. Please feel free to call my dad or myself for any other data and or farm visits, or the use of our sight unseen purchase program. Moreover, Transcon Livestock Ltd. or any of our able sales representatives listed in this catalog can also be reached for additional information.

Again, never surrender to your vision of a better tomorrow. The task of going forward with one's cow-calf herd remains a priority to enhance one's future wealth, defined by the decisions of today. So please join us at the Ste. Rose Auction Mart and Restaurant on December 12th at 11:30 for a complimentary warm dinner and refreshments before our 6th Annual Simmental Sale to begin at 1:00 p.m.

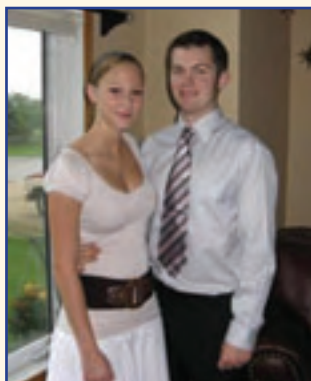

God bless us all,

Most sincerely,

RICHARD R. MAGUET

Richard & Pauline Maguet

Insurance

Lois McRae, Stockman's Agencies

Join us for a pre-sale lunch at 11:30am.

Viewing of Cattle

Sale cattle may be viewed anytime prior to sale day.

Photography

Front cover pictures & all sale cattle photographed by Richard Maguet.

All cattle appearing on the front cover are sale animals.

Herd Health

All cattle have been treated with Ivomec and are on the Pfizer Gold Program: Bovi-Shield Gold 5, One Shot & Ultrabac7/Somubac. Bred heifers have all received their first shot of Scourguard 4KC.

Footnotes

All livestock comments written by David.

Payment options

The terms of the sale are cash or cheque on sale day. Bull buyers have the option to pay half the purchase price on sale day, with the balance at 0% interest, due when the bull is picked up, or on April 1st, 2010, whichever comes first. A post dated cheque dated April 01/10 for the balance must be provided at time of settlement. Bulls purchased under this option must be wintered at Rendezvous Farms.

Wintering

Buyers have the option of having their yearling bulls wintered and semen tested ready for April 1st pick up for \$200 payable on sale day. If bulls are left at Rendezvous after April 15th there will be a charge of \$3.00 per day to be paid when the bulls are picked up.

Insurance

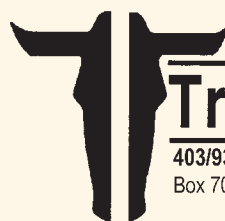

All bulls wintered at Rendezvous Farms must be insured. Agents available at the sale.

Guarantee

Bulls wintered at Rendezvous Farms are guaranteed breeders. Should any Rendezvous bull fail to be a satisfactory breeder, he will be replaced with a bull of equal value and quality or a credit will be given towards the purchase of another Rendezvous bull. At no time shall Rendezvous Farms' liability exceed the purchase price. Heifers represented as 'bred' are represented as 'being pregnancy tested safe in calf' have been examined and declared safe by a licensed veterinarian. They are considered breeders without further guarantee.

Terms & Conditions

The sale will be conducted under the standard Transcon Livestock Corp. Terms & Conditions. Copies will be available at the settlement desk.

on October 8

Sales Management Comments

Generation succession is an inspiring situation to witness in today's agriculture community. Simply to see farm families working side by side, generation by generation, has become a rarity. The youth of this world, who are the heirs to the food producers of the world are becoming less and less interested in the family farm. The relevance of these comments directly plays toward Rendezvous Farms and the infrastructure of the three active generations operating this family farm. To have multiple generations of Maguet family benefiting from a lifestyle not only provided to them but also one that is providing for them is uplifting. As a cattle producer, it must also be assuring that your hard earned money that you budget to spend on bulls is going right to a true farm family.

I witnessed Laurent Maguet purchasing three new herdbulls this past spring, so of course, they have just serviced the cows, and don't play a direct role in this year's sale, but the point is the never-ending search for herdsires always continues at Rendezvous. The newest bull that will play a huge role in this year's sale with his excellent set of sons standing beside the other sire groups is the Red Simmi "CMS Icon". I had the responsibility of purchasing him "sight unseen" for the Maguets and look forward to assisting the sale of his first calf crop at Ste. Rose. It is the opinion of most commercial producers that they prefer to buy their bulls from breeders who in turn have their own bull battery operating as they themselves would. Simply, as a registered breeder, if you don't have the confidence to purchase your own herdbull(s), why should a commercial breeder buy their bulls from you? Most breeders use the 'financial crutch' as an excuse to not buy herdbulls and that they cannot afford the bull they want which is always an easy statement to make 'after the sale'. The truth is they are not confident enough to buy a bull. Not the case at Rendezvous or anywhere that good cattlemen operate, you will see an impressive set of herdbulls with a good group of sons for sale and daughters already working in the herd or destined to be future replacements. Much like the family element, the cowherd succeeds from one generation to the next.

On behalf of the Maguet families at Rendezvous Farms we invite you to their annual bull and female sale, which incidentally will be held @ the Ste. Rose Auction Market this year. Give us a call at Transcon if we can assist you with any purchasing decisions or absentee bidder order-buying services.

See you in Ste. Rose,

Jay Good,

Our senior herd sire, pictured last fall at 8.5 years old. Still looking as sharp as the day we bought him out in Alberta from Virginia Ranch. Kingbuster has had a profound effect on our herd; the females he has produced are tremendous mother cows. They all have beautiful udders, good dispositions and are always holding themselves in very good condition, no matter the time of the year. The Kingbuster females are coming to the forefront of the herd, producing excellent calves, year after year. Many top cattlemen in Manitoba and eastern Saskatchewan have used Kingbuster sons in their herds with very good results, and if you haven't we urge you to do so; it will be to your herd's advantage. Kingbuster is extremely long, low set and when you view him from the back, that's when you really appreciate his natural thickness. His beefy quarters are matched by none. I must also touch on his calving ease as this is no small bull, but he is by far, one of the easiest calving bulls we have ever used. We have noticed a short gestation on his calves; when they're born, they come easily and are quite small...but, man, do they ever pick up after! We have been more than pleased with all the progeny Kingbuster has sired.

It is with sadness that we announce that this will be Kingbuster's last group of bulls on offer. We highly suggest that if you have not used a Kingbuster son in your program, it would be a wise move to purchase one this year. This herd bull extraordinaire has made a huge and lasting impact on our herd and many herds of our customers.

We are proud to offer our first set of Icon bull calves here in Manitoba. We purchased Icon from Czech Mate Simmentals and Remington Cattle Co and it has been one of the best decisions we have made. Since we couldn't attend the sale, Jay Good of Transcon, with his sharp eye for cattle, inspected him and purchased Icon on our behalf. He was the high selling herd bull of the day, commanding \$16,000. Stephanie and I had the opportunity to view Icon's dam, CMS Melody 03M, last fall and were we ever impressed. A deep bodied, beautiful, fault free cow that is a herd bull maker. CMS Red Polled Icon 16P is the homozygous polled, non-dilutor bull that we had been searching for. He is long like a freight train, moves like a cat and is extremely quiet. This bull is exceptionally smooth and has a really nice head, translating into calving ease. Just under 50 Icon calves were born at Rendezvous and we never assisted one cow. They come small and easy at birth and then just take off. These Icon calves display a lot of style, dark color, length, soundness and growth. Buy an Icon bull with confidence or better yet, buy a few and run them together.

The high selling bull at the Top Guns III sale we purchased through Jay Good of Transcon, for \$9,100. What a great investment this bull has been for our herd! Paramount passes on his strong red color and pigmentation to all of his calves along with his tremendous length and square quarters. Crossing Paramount on Kingbuster daughters seems to really work well for us. He has been a very consistent producing bull and his calves have great hair. Paramount's sons have been very well received. In our last two sales his bulls have been our highest averaging.

Full Fleckvieh, with a touch of South African blood, this meat machine is definitely one of the thickest bulls we have ever owned. His muscle expression is out of this world! Pilot has a great spring of rib, lots of eye appeal and super length. His bone structure is just right and he calves like a charm. This bull travels like a cat and has excellent feet and legs. His mother is a super, dark red Shareholder daughter that could raise herdbulls, and that's exactly what she did with Pilot. His calves grow out to be like their sire; square hipped, long as a freight train and damn good. This is your last chance to acquire a Pilot son since he has now resides at Jerry Luba & Sons in Angusville, MB.

Jahari 5055 is another full Fleckvieh bull we have used with great results. He was one of the lead off bulls at Dale Murray's in 2006 and one of the heaviest as well, weighing in at 1620 lbs at 13.5 months of age. His sire is the well known and respected Shawacres Jahari who has had quite an impact on the breed in recent years. Proven breeding on both parent's sides. We were very pleased with Jahari's first set of calves; they were built right and displayed good muscling and color. They were also popular among our customers. This year's calf crop is just as good; check out his sons and daughters selling.

Homozygous polled, multi Red/Black genetics and a non dilutor...and yes, the answer is, he is good! We were searching for a new "red" bull in the spring of '06 when one day, our good friend and consultant, Wilf Davis gave us a call about a pretty good red bull he had found. Laurent was sent out to see this bull and agreed with Wilf. He was worthwhile buying, so we ended up being the successful bidder on Red Devil. One must really take time and appreciate this bull, look at him from behind and I guarantee you will like what you see. He has such a nice square hip to him full of meat. He is a moderate framed, easy walking herdsire. Devil displays a lot of style and sure doesn't lack any substance! A real easy bull to work with; he has impressed many astute cattlemen.

A red goggle eyed Marcus son out of a BEL Steward 2nd cow. We purchased Splash privately from Clint Marchant out at Cartwright. This is our second heifer bull we use on Supreme daughters; he has a low birth weight of 90 lbs and is smooth bodied. Like the bulls in his pedigree, Splash calves very well on heifers. Just ask Gordon Evenson of McCreary how he liked his Splash calves. Take a look at his impressive calving ease and milk EPD's. A bull with great length and style, he has turned out to be a great young herdsire who doesn't lose his condition. Splash has one bred heifer in the sale and many females are bred to him.

Supreme 4037 was selected by my grandpa at the MFI sale a few years back and has definitely exceeded our expectations in what a heifer bull can do. Not only does he calve well, Supreme's calves come out with great paint jobs, just like daddy. Supreme's calves are a lot like fine wine; as they mature they just keep getting better. This guy is very docile and easy to work with and his calves are the same way. There is a large Supreme 4037 influence throughout our sale offering. Many of the bred heifers carry his service and all the bulls and bred heifers sired by Supreme are out of first calf heifers. It's not too often a heifer bull will have many of his calves selling, but Supreme does, which tells you something about the way he produces. We had the misfortune of losing Supreme this summer after breeding season. A few heifers carry his service as the 2010 crop will be his last. In only a few years he brought many positive attributes to the progeny he produced.

Caesar is one of three new herd bulls we purchased from LaBatte Simmentals at his spring bull sale in Moose Jaw. We are really excited about this young up and coming herd sire. He was used quite heavily this spring, exclusively in the heifer pen and we are quite anxious to see his first calf crop. With his low 82 lbs birth weight and smooth shoulders, both Barry and ourselves agreed that he would definitely work on heifers. Red Caesar is also homozygous polled and features outcross genetics to our 30 years of Simmental breeding. Select heifers carry his service, check them out and take some home.

Laurent selected three future herdsires from Barry LaBatte (and his grandson) for \$25,750.

We have used Bombshell successfully on heifers for the last few years. We really like the results; the calves come very easy at birth and are very vigorous. They grow out very well, being moderate framed, low set and very easy keeping. The Bombshell calves are structurally correct and are good natured. We really like the muscle expression on the bulls being offered in our sale. Remember all of the Bombshell bulls selling are out of first calf heifers with the exception to one. We really encourage you to take a good hard look at these Bombshell bulls as they can fit into anyone's herd.

Here's a smokin' powerhouse of a bull. This big burly beef bull has been a standout since birth. He is deep ribbed, long and full of meat. He also has an excellent hair coat. If you're in need of a bull that will add size and scale to your calf crop, this is the real candidate. Use him on some British based cows and the calves he'll produce will be in demand by the feedlots. He has a balanced set of EPD's excelling in yearling weight and milk. My grandpa calls this bull a Paramount Power. Sale day weights should be quite impressive. Length equals weight. Bring him home.

In the 30 years under our belt of breeding Simmental cattle, if I can permit myself to say that we've raised some pretty good bulls over the years. Well, this bull here is quite possibly our best so far, we'll leave you be the judge of that. This excellent individual has been a star since he was born. He's had all the indications of being a herd bull extraordinaire, bar none. His length is unmatched by any, his nice thick quarters are full of solid meat and he is so structurally correct. He is essentially a carbon copy of his sire, Paramount, who is proven. His dam is the cow that we all want as mothers of our herd bulls. She is an easy keeping, deep bodied, thick made Kingbuster daughter with a great udder. Finding a top end Fullblood bull is becoming harder and harder to find every year; we believe this bull has what it takes to be in any breeder's herd. You'll drive many miles before finding another bull with everything this guy has to offer. Producing bulls like 532W gives us a huge sense of accomplishment and makes the everyday challenges worthwhile.

RENDEZVOUS MS BUSTER

Ronald Raffray

has been with us for most of the last 22 years helping us in winter time and with calving chores. Thanks for all the dedicated help and friendship Ron!

Stephanie with a newborn

Every time I start writing something about these Paramount sons, I get all excited. That's how high he sets the bar. This beef bull is no slouch, he's deep sided, long and heavily muscled. He's been picked out by quite a few people that have been at the farm. The dam has been a really consistent producer for us. She has sent two bulls through our sale already, bringing top dollars and going to very reputable herds. Last year's bull went to work in Jason & Sherry Lee Bednarek's 1200 + cow/calf operation. Her 2006 son sold over the phone to Jason Becker from Saskatchewan. We also have a full sister in our herd and she's just awesome. The proof is in the pudding.

A really complete, beefy Paramount son full of meat and muscle. This guy is really well filled out, it's pretty difficult to find any holes in him. I really like the way his quarter is made and how square it is shaped. He has a moderate birth weight of 99 lbs and yet is one of the most powerful bulls in the group. He is definitely the commercial cattleman's kind of beef bull. Use him on Simmentals, Angus, Charolais, Herefords or anything in between and I bet his calves will be some of the best. Be sure to check this bull out, he has a great potential to make his new owner a lot of money. Clarence Bauer of Roblin has used a maternal brother in his good herd.

558W is definitely an all around beef bull that will add pounds to your next calf crop while maintaining calving ease and maternal traits. We've always admired this good haired, long spined, easy keeping bull. He is well filled in the flank and is low to the ground. These are the bulls we like to produce. His dam is moderate cow who ranks very high at our farm. She is the ideal type of female that consistently gets the job done with minimal effort. She has produced four, back to back bulls, all selling through our sale. All four of her sons have been featured each time; this year is no different. Her sons have gone into some top end commercial herds; Barry & Blaine Magnusson of Arborg, Raymond Girard of Lake Francis and Napoleon Roussin of Ste. Rose. Who will own this year's bull is the question?

We've continued to breed strong Fullblood bulls like 511W for a very simple reason, because we believe in them and so do our customers. Anytime the question is asked, "What kind of bull should I use to increase my weaning weights in the fall?", our answer will always direct you to bulls like 511W. Plain and simple. The more pounds you can wean off, the more money in your pocket. This red, goggle eyed bull should draw a lot of attention; don't be late sale day because I'm sure he'll be at the top of the sale order. Evaluate him carefully.

This fella just didn't want to co-operate on picture day, but when you do see him, you'll be wondering if he's a red Simmental or a Fullblood. Answer, yes, a fullblood, talk about a great paint job; that's what Paramount does, he's a non-spotter, non-dilutor. A long young bull with a low 92 lbs birth weight. A maternal brother was purchased sight unseen by Roch Desrochers of Weedon, QC. Roch has been a great customer and friend over the years.

This bull has been an exceptional individual since day one. Since Kingbuster is no longer with us at Rendezvous Farms, we probably should keep part interest in this bull to replace him. He is probably as close to one of the best bulls Kingbuster sired in his illustrious career here. 521W has all the tell tale Kingbuster traits; thick, beefy quarters, wide top, good hair, large testicles, awesome length and fine bone and I could go on and on. Breeders take a hard look at this bull, they don't come around like this every day. The dam is one of our best cows we have ever produced; she is dark red, goggle eyed, has good feet and legs, great udder and stands correctly. She is always picked out by visitors at the farm. She has also had a lengthy production record, since day one, we have bred her to Kingbuster and that cross has never disappointed us. Two full brothers were purchased by Breault Ranching, Toutes Aides, MB. Just ask Clayton or Shauna about the #521 bulls, they will give you an honest answer of just how well they've worked in their large reputation herd.

A lighter colored bull with a moderate 96 lbs birth weight, he should calve as well as his sire. He has good wavy hair and lots of middle. His dam is one of our oldest cows, going on 15 years of age, she will again be calving this winter. She still has perfect feet and legs, an excellent udder and is very sound for her age. With six daughters producing in our herd, that in itself is a pretty big statement. Progeny of hers have gone to Rafter M Bar Simmentals, Armand Verhaeghe, Ronald & Walter Marohn and Rod Fehr.

This fleshy, loose hided fullblood bull will add size to your calves without sacrificing calving ease. His dam was purchased at the Stulberg dispersal and traces back to one of Larry Stulberg's favorite cows, SU Alana 111A. The Stulberg herd was known to produce top end performance bulls in Alberta. 418W is definitely the same kind. He displays a good spring of rib and has a nice, clean front.

This is Richmond Miss Karl's last bull since we had the misfortune of losing her in June. Since that time, 47W has been without a mother. He fared quite well throughout the summer and has developed himself quite well considering he had no milk all that time. This soggy, deep bodied, easy keeping Pilot son is definitely worth having a look at. Time tested genetics here. Miss Karl has produced exceptionally well for us, she has progeny working in these fine herds: Duane Caumartin, McCreary, Jason Nickel, Moosehorn, Denna Farms Ltd., Ste. Rose, Limestone Farms, Rorketon and Virginia Ranch, Alberta. What more can we say!

Full Fleckvieh. This Pilot son had the misfortune of losing his mother at a very young age. Unfortunately we had no foster mother for him, therefore he had an unfair disadvantage until weaning time, of course through no fault of his own. Since weaning, he has picked up and will continue to do so. Once mature, he will be grown out, just as well as his pen mates. 414W has a beautiful color, length and is smooth bodied. He should calve well, just look at his confirmation. His mother was a very docile, solid red, red faced Fleckvieh cow.

The only Supreme son in our sale this year. We wish we had more but with many of last year's bred heifers being serviced to Supreme, it only left us with a handful for ourselves and most had heifers of course. A typical Supreme son with a low birth weight yet has lots of meat and muscle. He also has great numbers, with a 4.5 for calving ease. An end of February calf, his stance reminds us a lot of last year's second high seller that Bob Wilson purchased for the well respected Little Willow Creek Ranch, Frenchman Butte, SK. Talking with Blaine Harland, he told us that they were very pleased with their purchase and really liked the hair coat and build of their new bull. I'm sure we will see some great progeny in Little Willow's future sales off of their Supreme 4037 son.

A clean, red white faced bull out of a deep bodied Powerplay daughter. This fella has a good hair coat and a nice stride. If you're in need of adding some pounds to your calves, 3W will do the job. Use him on some Hereford or Red Baldy cows and the results would be awesome. Peter Smigelski of Rorketon has a full brother working in his herd. His mother is a very quiet, deep bodied female.

Here's a good, smooth haired Jahari son. He is moderate in frame and low to the ground. This fella is an all around thick built package. His full brother sold in last year's sale for \$3500 to Breault Ranching of Toutes Aides. Clayton and Shauna selected three bulls last year for their 600+ Angus x Simmental cow herd. Not only do they excel in their large cattle operation they also have a custom silage business whom we highly recommend to anyone.

Check out this whopping good Icon x Rocky son, a total outcross for anyone's program. It's pretty difficult to get them any better or deeper bodied than this guy. Just evaluate his proper structure and the power he beholds. This fella is low to the ground and just solid as can be; he should have some friends sale day. His mother is a deep bodied, good milking cow who has been a consistent producer. Richard Puhach of McCreary and Walter Marohn of Walederssee are both using maternal brothers to 37W. Once again, they were some of the deepest bodied bulls on offer when they were purchased.

Another long, smooth made Icon son. This eye catching rascal has always been naturally muscled and easy keeping. He is low to the ground and has good testicles. I've always been a fan of this bull, he's developed very well all throughout the summer and will continue to do so. The dam is a productive young cow that is very long and has a nice tight udder. Her first calf is also in the sale, selling as one of the feature bred heifers, Lot 93.

Folks, have a good, hard look at this tremendous individual. A knockout since he was a week old, this bull is just a whale of a calf. If you like your bulls to have a top as wide as your kitchen table, 518W fits the bill. This solid built beef machine is the kind that makes a lot of happy customers. A real power bull that will add a lot to anyone's herd. His size is impressive and yet he's very smooth and has a nice clean front. Remember, these Icon sons calve like a breeze, it's all in their conformation. There's no doubt he will be at the top of most rancher's must buy list.

We don't usually name our bulls, but Stephanie decided to call this guy "Waldo" when he was born. This Red Polled, blazed faced bull will surely be easy calving like his sire. Evaluate his smooth shoulders, nice head, fine bone and you'll come to the same conclusion. He is also long and should fit nicely into anyone who has a late spring calving program. The dam is a young, easy keeping Kingbuster female. Her first son sold last year to repeat customer and good neighbor down the road, Napoleon Roussin. Her second son is 605W, he sells December 12 at the Ste. Rose Auction Mart...don't forget to join us for a free meal and complimentary beverages.

This soggy, big hipped, wide topped bull has been a real standout all throughout the year. He is just one heck of a powerful meat machine. His length and sheer scale is quite impressive, without forgetting to mention his great depth and thick made quarters. This brute is the kind of bull that will make you smile every time you appraise him. When Transcon's Glenn Norton was out on a pasture tour this summer, he remarked how powerful this bull looked. 562W should have some friends sale day. His mother is 13 years old and still in calf for 2010. She has been a terrific producing cow, also being the mother of Rendezvous Muscle Man who was used in the Woodsong herd and then went to Rancho Alejandra-Ej Ochos out in Mexico.

Check out this straight topped, well built beef bull. Amazing depth, coupled with awesome length, this is truly a desirable herd bull prospect. His beautiful color is really eye catching. Remember, order buyers like calves that catch their eye right away, 412W's calves should be no different. The Icon x Mania combination has really brought the best of both worlds together. This is a bull that should be high on anyone's list. The dam is a deep ribbed, easy keeping, thick as a tank, good milking cow. Not to mention she is the quietest cow in the herd and also Stephanie's favorite cow out of 200 here at the farm. She also has two sons working in the Ste. Rose area, one is five miles south of us at Eugene & Christine Gingras' ranch and the other at the Bonin Farm, ten miles north of our place.

We wanted to try Icon on a heifer when we first bought him, therefore we used him on one of our very best heifers and this is the resulting calf. A thick built bull who came to life easily with a 95 lbs birth weight. This meat wagon has developed nicely into a moderate framed easy keeping individual. His color is very appealing and he is just an overall nice package. The dam as we stated is one of our top 2007 models, she is as thick as they come, dark red with goggles and quiet as lamb.

LOST RIVER LADY 16U

BW: 100; 205 day: 671.

EPDs Fall 2009: 2.5 4.0 43.5 69.2 3.5 32.4 10.6

A March born Icon son out of a deep bodied, red, goggle eyed Shenandoah cow. This rascal has really kept up with the January and February boys. He'll grow out to be a power bull, just like his daddy. 406W has a really nice, appealing head and moves like a cat. A maternal brother was purchased by Joe LaGarde of Ste. Rose a few years back.

A young April bull, but we know he has the potential to be someone's next herd bull. This is the third year in a row that the 69M cow has a son selling through our sale. Last year's bull sold sight unseen over the phone to Dennis & Gwen Weeks of La Riviere, MB. Dennis has been a customer of ours for at least 20 years and he has a very good eye for selecting bulls. Therefore he purchased two bulls from us last year with only one conversation over the phone. The high selling bull in our 2007 sale was mothered by 69M and sold once again over the phone, to the highly reputable herd of Ferme Carboneau of St-Oilon, QC.

The youngest bull in our offering; he may be smaller than the group now, but always factor in age because once he matures he will rival any other bull. This smooth made bull would be good insurance as a spare bull. The dam is a dark red, goggle eyed Kingbuster daughter who has been producing very well. E&C Livestock of Laurier selected a maternal brother to 39W in last year's sale.

436W came to us in dam from a bred heifer I purchased from Black Diamond Simmentals last fall. I think the heifer did a pretty good job on her first calf. This Bombshell son has a lot of power and substance bred into him. He has a nice appealing head and stands correctly. He'll sire some heavy weight steers and desirable replacement females. Multi generations Red.

It's not every day we come across a bull like 507W. This guy has something special, just look at those THICK, wide made quarters that hang low. Richard says he has the same kind of thickness and quarters like his grandsire, Kingbuster. This outstanding individual is low to the ground, solid built and just easy keeping. His depth is unparalleled and his structure is flawless. The dam is a first calf heifer who never lost any condition after calving. She has a perfect udder and we couldn't have asked for a better mother cow. This is only her first calf; we have a feeling that she will be putting more sons like this into our future sales. With everyone trying to extend their grazing seasons, it's bulls like 507W that need to be purchased and used. The moderate framed, easy keeping type will thrive in those kinds of conditions.

A moderate Bombshell son who had the misfortune of losing his mother in June due to lightning. Since that time, he's been without milk and pastured with the rest of the group. Of course, an unfair advantage for this fella. The genetics are there to prove that he will grow out just like his brothers. Don't forget, the more bull power the better, accidents do happen as happened to his mother and an extra bull can sure save the day.

Another dark, solid red, polled bull out of a first calf heifer. This bull is exceptionally long, smooth bodied and should calve very well. He also displays a nice spring of rib and has a good hip. Truly a rancher's choice bull, he should cover a lot of ground. Pick up a few of his brothers and turn them loose this spring; you'll be able to go seeding without worries.

If you're in search of a low set, soggy, deep bodied, polled beef bull, look no further. This thick butted rascal is a real beef machine. He's always been so easy keeping and has a really sharp profile. This bull stands correctly and has a terrific bone structure. I've always admired this Bombshell son since a young age, he stacks up to any other of his pen mates. A herd bull prospect that needs to be circled in your catalogue. The mother did a super job raising her first calf.

My dad usually doesn't have any "favorites" in the group, but this bull might be an exception to the rule. This thick butted, fleshy Bombshell son has been a standout since birth. He is a very complete package, displaying great depth and awesome length along with great feet and legs. His color is also very attractive and we really like his hair coat. This bull is very hard to punch any holes; he is properly filled everywhere. 516W is also very good natured. There's no doubt he will mature into a tremendous herd sire.

This young guy was born unassisted to a first calf heifer. If your goal is to find an easy calving, low birth weight, red polled bull, look no further. A well structured individual that has all the criteria for calving ease, especially with an 84 lbs birth weight and +12.5 for CE in his EPD's. He is also long, smooth and fine boned. I feel that I'm repeating myself when I talk about these Bombshell bulls, but that just shows how consistent and even they all are.

This chunk of a bull redefines thickness. He is all meat and no potatoes! This big guy has had these impressive quarters since he was a week old. Just look at how wide topped and squarehipped he is. Did I mention he was as long as a freight train. Quite likely one of the longest bulls we have ever produced in 30 years of breeding Simmentals. If you've been searching for a red, polled, long and thick bodied bull, look no further, otherwise you'll wear a set of tires off your pickup truck trying to find another one like him. Don't forget these are outcross genetics; if you've got a lot of Bodybuilder influence in your herd, 417W would really compliment those females. If you're curious about his dam, she is no different than her son. She is low to the ground, beefy as you can make them, very long and has a great udder. Have a serious look at this meat machine.

Here's a very popular Supreme daughter who has many things going for her. She is very well built, all even throughout her structure. 32U has been a pasture favorite among many touring this summer. She is very feminine, long bodied and quiet. Bid with confidence and buy this girl, you'll be happy you did. We still have 32U's grand dam producing on the ranch at almost 13 years of age and has always calved in January. That Dividend cow is one of the soundest cows we have ever owned. This is a cow family that ranks very highly here.

Bred to Silverlake Splash -657232- April 27/09 and exposed to same April 08 to June 25/09.

Solid red, double goggle eyed beauty here. This awesome Supreme daughter will turn heads on sale day. Look how smooth and structurally correct she is. Thinking about adding a few top end Fullblood females to your program, this is one that would fit the bill. 44U reminds us of our high selling bred heifer from last year's sale who was purchased sight unseen by Westgold Farms Ltd., Minburn, AB.

Full Fleckvieh Fullblood. These Supreme daughters are just like peas in a pod, dark red with goggles, feminine and moderate framed. We really shouldn't be selling so many of these Supremes since we had the misfortune of losing that great herd sire this summer. Pick them up while they are still available. If you look at the pedigree, it includes some outcross genetics we don't see as often.

Here's a powerful Jahari 5055 daughter. She has great depth, length and thickness. Just imagine those wide topped steers and tremendous replacement females she'll produce. First time buyers, David Rhodes and family of Virden, purchased a maternal sister at last year's sale. The Rhodes purchased 4 bred heifers and 1 bull for their good herd. Having visited with David and family this spring, they stated how happy they were with their purchases. This is something that, as a breeder, we really enjoy hearing.

This long, straight back, well balanced female is sired by Jahari 5055 but sure blends in with the Supreme daughters as well. A maternal sister who was quite popular at last year's sale, sold to the Rhodes of Virden, MB. I really like the cow family behind this heifer; a stroll through our herd will show you the dam, grand dam and great grand dam all working here at Rendezvous Farms. Fertility and longevity are two important traits in the cattle business; this cow family definitely proves it.

Exposed to Silverlake Splash -657232- April 08 to June 25/09.

Here's an attractive SU Pilot female. Beautiful paint job; she displays a lot of depth and thickness. It's difficult to be parting with all these good heifers, but we have to offer quality stock to the industry, which is our mandate as seedstock producers. Barry and Pam Honish of Rorketon selected a maternal sister last year. The Honish's ended up purchasing two bred heifers and one bull for their reputable cowherd.

Bred to Silverlake Splash -657232- May 25/09 and exposed to same April 08 to June 25/09.

I'm going to start sounding like a broken record going on about these Supreme daughters. I think the picture really describes this heifer. Easy keeping, mellow, moderate framed; all the attributes we look for in selecting replacement females. These are the kind of females that will make you money, especially once this cattle market turns around, which it has to. Remember the old adage, buy low, sell high; this fall will be presenting all cattle producers with some hidden opportunities like what we are offering here at our sale. Note, check out her brother selling as lot 57.

106U is a big broody kinda heifer that will be similar to her mother. It's hard to believe that she's three months younger than her pen mates. A sound footed individual with length to burn. Breed her to a Fullblood or Red bull and she'll make her new owner some coin. Remember, we sell cattle by the pound, this female will wean some heavy calves. Good friends and neighbors down the Ste. Amelie highway, Armand and Colleen Verhaeghe, purchased a sister in last year's sale. Armand said that his heifer calved unassisted and he was very pleased with his purchase.

Bred to MFI Supreme 4037 -629449- April 10/09 and exposed to same April 08 to May 15/09. Exposed to IPU Red Caesar 11U -PG700415- May 15 to June 18/09

Here's a daughter out of the first cow I ever owned, 400E. This 14 year old cow has never missed one year, she has been a terrific Meister cow with an excellent udder. Her daughter, 431U should be the same, lots of scale and an all around good mother cow. Siblings to 431U have gone to Clint Cleave, Ochre River, Jim Geisel, Makinak, Gilles Parthenay, Ste. Rose and Walter Marohn, Waldersee just to name a few.

Bred to Silverlake Splash -657232- April 24/09 and exposed to same April 08 to June 25/09.

A fine boned, feminine heifer who is very quiet and docile. She has a low 83 lb birth weight and being bred to Silverlake Splash, it should be smooth sailing come calving time. Her mother has a nice tidy udder and did a good job on her first calf.

I really debated about selling this cherry red goggle eyed female, but it's part of our commitment to the cattle industry in offering quality replacement females. So here she is, definitely a good prospect for anyone looking to add to their herd. The dam is a Mania female out of a Kingbuster cow. That cross is something that produces terrific mother cows. I just wish we had more of them here. Check out this heifer's maternal brother, 416W, a powerful blaze faced Icon son.

Bred to Silverlake Splash -657232- August 29/09 and exposed to same April 08 to June 25/09.

A young heifer who will most likely mature to be very similar to her dam; moderate in frame, tidy udder and a good producer. A full brother to 454U was purchased sight unseen by a super nice man by the name of Roch Desrochers, Weedon, QC. Roch has purchased multiple lots from us in the last 7 years, all over the phone without seeing any of them. We always enjoy chatting and learning with this astute cattleman.

Possibly one of the longest breds on offer. This dark brown, wide topped, easy keeping female has a lot of potential. Since we already have a full sister in our herd, we decided to offer 505U in the sale. There's no doubt she will produce as well as her sister did this year. Have a good look at this gal.

EPDs Fall 2009: 1.5 4.6 37.4 59.5 1.0 29.4 10.7

Exposed to MFI Supreme 4037 -629449- from April 08 to May 15/09. Observed bred to CMS Red Polled Icon 16P -PG620039- on April 19/09. Exposed to IPU Red Caesar 11U -PG700415- May 15 to June 18/09.

An eye appealing dark brown heifer whom we've always been quite fond of. She has a nice head, long, deep body and has been picked out by quite a few people during pasture tours. A very easy keeping, good natured individual. If you can't make it sale day, 537U would be worth evaluating. Explanation on 537U's breeding dates. We found Supreme injured the morning that 537U was in heat & didn't know whether he had bred her or not. We didn't want to take a chance & therefore bred her to Icon in an attempt not to lose a cycle. She conceived, at that time, but we are unsure to which bull, until she calves. Red & Polled will be Icon, FB & horns will be Supreme.

Check out this eye catching, dark red goggle eyed heifer. Moderate framed, easy keeping and has a great disposition. We really like the beautiful heads on these Supreme females, they make great mother cows. The Supreme x Kingbuster combination is always a good match. Just ask the Harland's of Frenchman Butte, SK about their Supreme x Kingbuster bull that they purchased sight unseen last year. They were quite happy with their new addition.

Here's a heifer that my dad, Richard, always marked quite highly among the group. She has so many things going for her that leaves no reason not to bid on this beauty. A very stylish heifer with lots of character and eye appeal. A lovely, feminine head with a nice smooth body, bred to the easy calving Splash bull. Have a good look at this heifer's full brother, lot 30, he's a spectacular Icon son that will really impress you. Just goes to show how well the mother of these two animals is producing.

Bred to Silverlake Splash -657232- April 26/09 and exposed to same April 08 to June 25/09.

I was reluctant to include this heifer in the sale offering, but since we have a full sister in the herd the idea was a bit easier to accept. This is the type of easy keeping females we strive to produce; we wouldn't hesitate to recommend her to anyone over the sight unseen purchase program. She is low to the ground, moderate framed and will develop into a great mother cow, just like her sister. There won't be too many more chances of acquiring a Kingbuster female since the 09 calf crop was his last. Grab the opportunity while you can.
