SIBL Simmentals Half the Herd Sale

6. BLI PICTURE 328A

FULLBLOOD FEMALE T1127519 BLI 328A 28 January 2013

Sells open and ready to flush.

Full Fleckvieh. BLI Picture 328A is just as her name states, a Picture. This tremendous female would be our cornerstone, donor female if we were continuing with a fullblood program. Truly fault free in her design, sound in her skeleton, big topped, deep sided, soft made and attractive. Awesome in her udder structure and very correct from the ground up. We chose to leave 328A open as she calved a bit later this year and once we had made the decision to disperse our Fleckvieh cows we felt it was best to offer her open as opposed to being bred later to a red or black bull. We have retained her 2018 and 2017 born daughters and her 2016 daughter is working at IH Simmentals. 328A is sired by BLI Warlord 915W who we sold to Prospect Hill Simmentals for \$15,000 and his first daughters that were offered for sale averaged \$16,000. 328A has endless potential and deserves to be in a donor program.

Bred natural service R Plus Hitman 4194B PG1134497. Ultra sound 55 days pregnant July 23.

Full Fleckvieh. 228Z is a big bodied, soft made female that does a good job producing high performing progeny and stems from one of our oldest cow families. Be sure to analyze the sound structure and quality of this impressive, powerful female. 228Z has produced bulls that have sold through our bull sale that have gone on to work in some very good commercial programs. 228Z's service to Hitman is sure to be exciting as he has worked very well on our Fleckvieh females. 228Z has earned her place here as one of our few remaining Fleckvieh females and we are proud to offer her here.

Bred AI May 6 to Crossroad Radium 789U 695165. Ultra sound safe to date.

Full Fleckvieh. 34U is an own daughter of Emperor which also makes her a half sister to BLI Warlord 915W. 34U has earned her place in our program with her trouble free production record, her flawless udder and overall mass and body. Keato Meadows own a Laki daughter that we sold through the Fleckvieh Equation sale, Rubens Simmentals purchased a son, we have retained a daughter sired by Hitman, and her 2018 Hitman sired bull calf is in the bull pen this year. 34U is bred to the consistent, easy calving Radium for what should be a quality calf.

Bred natural service Alliance Black Detonator 5D BPTRS1169286. Ultra sound 50 days pregnant July 23.

Full Fleckvieh. 723E comes right out of our ET program and is mothered by BLI Special 207Z the full sister to BLI Warlord 915W who sold to Alliance Simmentals through Fleckvieh Equation. 207Z worked well with the various bulls she has been flushed to producing both quality bulls and females. 723E is a full genetic sister to BLI ALL Castle 504C who sold here a couple years ago for \$15,000 to Mountain View Holdings and was very popular in the barn that day. Another full brother sold through our bull sale this spring to Tyler Copland at Tees. 723E in her own right is dark red, big bodied and sound. Bred to the black blaze face Detonator bull offers a unique twist of genetics and we are very happy with the group of calves we had born here this year and chose to clean up on our heifer pen with him based on how well he calved and the quality offspring he left. Here is your chance to buy into one of our most productive Fleck cow families and have her go on and produce in your herd.

72	6.5	2.3	59.9	78.2	29.7	5.8	59.6

Open.

Full Fleckvieh. 820F is our only full Fleck open heifer and she is a good one. 820F was mothered by a Philosophy 2 year old that unfortunately aborted her calf late in the season so is not on offer with our Fleck dispersal. Once again we have focused on a few highly productive Fleck females that have encompassed a few key cow families. 820F's grand dam (BLI Special 207Z) sold through Fleckvieh Equation to Alliance Simmentals and we flushed her on shares for a couple years as well as displaying her at Farmfair as a 2 year old. This highly maternal bred female has an excellent mix of phenotype with the genetics to go on and produce for years.

11. KEATO PLD EDEN 750E

POLLED FULLBLOOD FEMALE P1230796 KMST 750E 29 December 2017

Open.

100% Fleckvieh. It's with mixed emotions and excitement that we showcase Keato Pld Eden. She is a polled female that we believe could be a corner stone to any polled breeding program. Kaptain is a bull we raised and knew from a young age that he would be contributing to our program, in both the heifer and cow pens. Eden's' maternal bloodline runs deep in the herd through our donor cow, Sienna 131S. She has multiple daughters working here for us and, most notable, a son that is working for Eagle-Ridge Simmentals for 7 years.
