# Beechinor Bros. Simmentals

**W**elcome to our tenth annual sale, wow where has the time gone? Before we get into talking about this year's offering, we would like to again take a moment to say a little something, Thank You. Whether it is bidding, buying, offering a helping hand, giving knowledgeable advice, taking the time for a tour and visit or allowing us to farm your land. Without your support we wouldn't be able to continue doing what we love.

Our main goal is to bring you an animal that is of the highest quality and are proud of the animals we offer to the industry. We spend countless hours looking for our next breeding selections, with the idea that each animal will need to create offspring that will increase profits for those who make the investment. Each year we go out to find new genetics that we feel will not only improve our herd but inevitably increase the quality we can offer to our clientele. Over the past couple of years we have added a large group of cows to our red, black and fullblood programs which for the most part have come from the Skors Dispersal. Their impact is only just starting to show the long-term effects and know that we will be talking highly about these cows for years to come. Although 2021 had several challenging aspects, we were extremely excited for the future in the beef industry.

Again this year we are excited to offer offspring out of our walking herd bulls, Elevation, Sawchuck, Challenger and Crocket to name a few. All four of these bulls have exceeded our expectations and will have an ever-lasting impression on our herd. Elevation, Challenger and Sawchuck's first daughters are now in production, and one has to be excited about the impact these young cows have already had and will continue to have on our herd going forward.

All the yearling bulls have been fed together since the beginning of September. The bulls are eating a TMR diet that consists of corn and cereal silage, chopped hay and a starch free pellet. All the ingredients are tested and balanced to allow the animal to show their natural growing abilities and achieve a strong ADG without harming their long-term development. We do not push the feed to our animals and pride ourselves on the fact that many customers express how their bulls actually gain weight or maintain their condition through breeding season.

For those of you who are new to our program, we are a family run purebred Simmental operation. We will be calving out just over 300 purebred females, some of which are part of our embryo program. We are fortunate to still be farming along side my parents, Barney and Melody. Over the years they have been our major support system giving us years of knowledge and many hours of help. Along side the purebred cows, Mom and Dad also run a large commercial herd. Although Mom and Dad own these cows, we feel fortunate to have them around as they help keep us focused on the overall end product that everyone is trying to achieve.

As always, we are excited to have Beechinor Land and Livestock, Stefon and Rebecca Beechinor, DGR Cattle Co., Daryl and Roberta Renaud and Skyline Simmentals, Amanda Steffler joining us this year. Be sure to check their offerings out as there are several interesting and high-quality individuals from each consigner.

All the bulls are gene tested in one form or another. All the Fullblood bulls have been tested for the dilution gene. A non-dilutor will not throw a grey calf if crossed with a black cow. The red and black bulls have been tested for the homozygous polled gene. A Homozygous polled bull will poll 100% of his calves. Also, this year we tested the black bulls for coat colour. The calves of Homozygous black bulls will always have a black hair coat.

If you have a minute, I invite you to give me a call and help you find the bull that will suit your needs. We feel there are a variety of different bulls and are more than happy to help make sure you find the one you are looking for. We know that sale day is busy for you and that there can be schedule conflicts. If for some reason or another you are unable to join us on sale day, we highly encourage you to come to the farm and view the bull pens at your convenience. If you are unable to be present on sale day and are wanting to participate, we encourage you to phone us or take advantage of the trusted and professional staff of Transcon Livestock or Bohrsen Marketing.

We look forward to visiting,

*John Beechinor*

*Barney & Melody*

*Brett, Jaidyn and Brooks*

*John & Michelle  
Kyle, Easton, Austin (Bob) and Kaidynce*

# Sale Day Information

## Schedule of Events

**Sunday, February 27**

Open House 1:00 - 4:00 pm

**Monday, February 28**

Pre-Sale Viewing - 9:30 am

**Beechinor Bros Simmental Sale - 1:00 pm**

## Sales Management Team

Jay Good .....403-556-5563  
Glenn Norton.....780-542-0634  
Darren Paget .....403-323-3985

## Consignor Contact Info

John Beechinor.....403-352-8704  
Stefon Beechinor.....403-597-4001  
Amanda Steffler.....587-930-8033

## Sale Staff

Auctioneer.....Don Oberg  
Ringmen .....Robert Lind, Mark Stock, Darren Paget

Cody Haney, Bohrsen Marketing.....403-845-8806

## Sale Headquarters

Comfort Inn & Suites, Sylvan Lake.....403-887-7884

**Insurance** Kolton Kasur - Canadian Farm Insurance  
780-387-8376

## Delivery

All bulls that are remaining to be housed after the sale must be insured. Bulls will be housed free of charge until April 15, 2021. Animals will be delivered free of charge to points across Alberta, Saskatchewan and Manitoba. This will be done at the buyer's convenience, however, if the truck is in your area you may be asked to take your bull early. We will do our utmost to deliver your bull to your yard.

## Sight Unseen

If you are unable to attend the sale, but are interested in bulls, please feel free to give the consignors a call prior to sale day and they will personally go over the bulls and your program to recommend the animal that would meet your needs. Following that, the Transcon Livestock Team will represent your needs in a professional and confidential manner.

## Sale Terms

Animals sell under the Transcon Livestock Corp. Sale Terms & Conditions which will be posted on sale day.

## Health & Fertility

All bulls will be scrotal measured. All bulls over 12 months of age will be semen tested. All bulls were treated with Ivomec and such products and have received all their vaccinations. Contact seller for details on programs. All sale bulls have been given Fusogard vaccine for foot rot prior to the sale.

## Volume Discount

We would like to offer to our past, present and future customers, as a gesture of appreciation to anyone who purchases 3 or more BULLS, a discount of 5% off of their TOTAL INVOICE. Thank you for your support!

## EPD Explanation

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its ancestry performance. EPDs do not compare across cattle breeds. They are individual-based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. The accuracy of EPDs for calendar year bull calves is generally about 20% (one out of five times) so use it cautiously as one of several selection tools.

## Spring 2022 CSA EPD Averages

CE 7.2 BW 3.7 WW 75.9 YW 111.8 MWW 66.3 MCE 4.0 MILK 28.3

# Welcome from Transcon

"BOMBPROOF", to use horse terminology, wow, are these bulls quiet! They are a real treat to walk through the pen with, so cooperative and at ease. As one of the nation's most annually anticipated bull sales, Beechinor Bros. & Guests offer higher than average volume, quality, diversity & responsibly developed bulls. All your bull requirements can certainly be satisfied here!

As I progress through these comments you will notice the ongoing theme to the herdsires that have been seriously invested in.

Starting with the Fullbloods, Black Gold Elevation leads the way as the largest sire group, leaving his patented "stamp" to all his progeny. Complimenting them in this demographic are sons of the \$100k Virginia's Sawchuck, although fewer in numbers because of a big run of daughters born in '21, they still stand out. Speaking of "Standout", sons of him are again included in the "A.I." section of the Fullblood group.

Sons of the \$50+k, Skor's Challenger, are the most in numbers for the Red Simmental division. They all attain a uniform look - moderate frame size, big ribbed and dark red. Skor's Crockett has a nice set of sons in this category too, particularly one out of the Beechinor donor cow "Nydam"! "Red Wolf" has sons that are calving ease by design, with a particular blaze-faced son who's very noticeable in the pen.

Moving to the black bulls, there is a wider range on sires, but also includes more good sons of "Challenger"! The great Skor's Enticer, aka "4W", leaves his low-birth/explosive growth option in a couple of sons, whom fit nice with the Skor's High Roller progeny. Larger framed and long spined would define the Connected sons.

Very popular in past sales have been the extra age, or fall born bulls, from Stefon & Rebecca's Beechinor Land & Livestock program and once again there are sale features from this age bracket. Two polled Fullbloods with cow-family power in their blood should be considered by the serious cattlemen. There are also 2 really strong Red Simmi bulls that also look and read right out of this age group. As you walk through the yearling bulls in their entirety, the red tagged BLL bulls stand amongst some of the best.

It's very nice to see a young breeder like Amanda Steffler and her Skyline Simmentals operation progressing each year in both more numbers and more quality. Of course she's had some pretty darn good coaching and her bulls have certainly earned their spot in the bull sale development pens at Beechinor Bros.!

These are all very wonderful, fair and professional people with very strong family ideals, that are excellent to deal with. Past buyers will attest to this and we certainly suggest the consideration to any potential new buyers.

We would be pleased to visit with any of you about the cattle and the people behind them at anytime. For any of you who can't personally attend, don't hesitate to call the TRANSCON cell phones listed for professional absentee buyer representation. We pride ourselves in the confidence and honesty we have provided to the public for over 50 years!

For the Beechinors,

*Jay Good*

Elevation is a bull that we purchased as the Canadian high selling Fleckvieh back in 2018. We knew he was good and after hours of research decided that he would be the one to leave a big impact on our herd. What we didn't know is how consistent and how big that impact would be. Over the last three years his calves are born with ease and boy do they grow. On top of that he has done an exceptional job of adding capacity, hair and dark red colour to all his

calves. We are currently calving his second set of daughters and wow their udders are exceptional. The first daughters did a fantastic job on their first calves with many of them putting sons in this sale. Expect his sons to sire a group of strong uttered females. Over the last two years we have offered Elevation daughters at the Western Harvest Bred Heifer sale and the reports are that those females are doing an exceptional job for their new owners.

## 1 BEE DURHAM 36J

Durham is a heavily pigmented bull who I believe is so much so that it has created an almost diamond effect. This liver red, heavy haired, soggy bull has been among the favourites from the very start and hasn't missed a beat. This isn't a big surprise as his mother, 36B, is a big soggy cow who is very easy to look at with her tremendous udder and overall presence. One should note that Durham is solid red down to the ground on his front feet and only has a small flick of white on his hinds. This then extends down into a big dark hoof. **Dilutor Free**

BEE FLOSSIE 135Y

Surprise, surprise another dark red Elevation son. Victory Peak is a bull that we have really liked from the beginning. It didn't hurt that the year prior his mother had a full sister who was among the best replacement heifers. She went on to be one of our feature bred heifer at the Western Harvest Sale this past fall. From a young age Victory Peak has expressed his easy fleshing ability and ease of movement. As an added bonus he comes with great attitude. His mother is one of several Magnum daughters who we have come to rely on for production. These cows have strong udders and are loaded with milk. If you are looking for a bull that can load the trailer with big calves in the fall and leave top end replacement heifers, here he is. **Dilutor Free**

Everest is a smooth skulled bull that it built right. He starts with a clean front end and ends with a big beefy rear end. In between those marks he possesses great depth and his topline is as big and flat as my kitchen table. His dam, 327F, was the high selling female in Anchor D Ranch Simmentals bred heifer sale. We had seen this female at a few of the YCSA shows (where she had been crowned champion) and when she was in the offering knew it was an easy choice. Her beautiful temperament and terrific udder are only a couple of her outstanding features. Watch for this female to continue to leave her footprint as the years go on. Be sure to put a checkmark beside this guy if you like them dark red. **Dilutor Free**

If you like them thick with a ton of rib shape then I have the bull for you! Denali is a bull that like his mother has great spring of rib and thickness throughout. He also comes with my favourite hair coat and that dark red colour. We purchased Denali's dam out of the Fleckvieh Equation Bred Heifer Sale where she stood out to us for her exceptional depth, foot structure, colour and perfect udder. Denali showed such good promise from the beginning that we bred his mother back the same way. Needless to say he has a little brother that is already trying to follow in his foot steps. Be sure to mark this guy down on sale day. **Dilutor Free**

SIBELLE GOLDA  
DFM EDWIN 51E  
KOROL MANDY 347M

Where do I start with this guy? Long spined, dark red, full goggles, lots of meat, good feet.... You tell me which one you like more. Himalaya started out at a moderate 81lbs and exploded on his mothers milk to a whooping actual weaning weight of 844lbs by the end of August. I'm not very good at math but his weaning weight is over 10X his birth weight. His dam 865F is a hard working cow that was among the very best bred heifers we had in her respective year. She has a perfect udder and her teat size is ideal. As you go through the catalog you will notice that the Dirty Harry daughters are very productive females. **Dilutor Free**

Makalu and Bold Peak are full brother by pedigree and their mothers are actually twin sisters. Originally, I was going to write each bull their own comment but when these two guys stood side by side I realized how similar they were. Both bulls are moderate framed, heavily muscled, dark red, thick hair coated bulls with big goggles. Easily said, a very impressive pair. Their dams are also very similar in many aspects having great udders and feet. I should also point out the biggest difference between the two is that they are born almost exactly a month apart. Both have small birth weights. You won't be wrong with whichever one you choose or maybe run full pedigreed brothers side by side for some added consistency. Just an idea. **Both bulls are Dilutor Free.**

Cascade is a bull that arrived about ten days earlier than we expected. This definitely attributes to his smaller birth weight. That being said this long spined good muscled bull is a member of a genetic line that is extremely consistent at reducing birth weight. Both his dam and grand dam have done it on several occasions. One would think that these cows were smaller type females but they are actually the opposite. Both Cascades dam and grand dam are big females with perfect udders and have the uncanny ability to have small calves that grow up into big heavy offspring. This guy is definitely worth a good look. **Dilutor Carrier**

Carleton is a long spined bull on a nice frame. He is going to be an easy calving bull as he has a smooth front end that transitions into a wide rear. The more I look at this bull the more he impresses me. He has a great spring of rib and a tremendous hair coat. We purchased his dam out of the Ferme Gagnon and East Harvest Sale where she was a high selling female. She was bred and raised by Alcovia Simmentals and don't regret bringing her west for a minute. This heavy milking, perfect uddered cow has a perfect track record. Her first calf is a top notch bred heifer this year, Carleton is her second and she has another beautiful heifer calf at side this year. This double goggled bull is definitely one to have marked if you like them to calve easy and make tremendous replacement heifers. **Dilutor Free**

A heavy haired, thick butted, long spined Elevation son that is hard not to like. Temple's dam, 22E, was my pick of the Lone Stone bred heifer offering in her respective year. Our son Easton decided that he wanted to buy her.... So, he now owns this outstanding cow. Her first calf sold in the 2020 Western Harvest Sale and ended up being one of the high selling females in that sale going to Keet Simmentals. Brett just sent me a picture of that female and "WOW" is the only way to describe her. 22E herself is a moderate framed cow that milks extremely well. A bull that is backed by two highly productive parents. No guess work here. **Dilutor Free**

We have been using Standout for several years and he's a bull that just never gets old. He continually adds performance to his calves and has the amazing ability to throw that solid colour pattern very consistently. Rambler like all his brothers before him is deep sided and has plenty of thickness. Rambler mother's side is also known for their big time rib shape and overall sogginess. Both his mother 862F and grandmother 225Y have calved early this spring. I may have really liked this calf last spring and the proof is that I bred Rambler's mother back to exact same way. Ramblers baby brother is looking very impressive..... Just so you know. **Dilutor Carrier**

A polled bull with lots of muscle. Order coming right up. Avalanche is a big topped, big butted bull that has been a show off since he was young. When it comes to polled fullblood cattle it is no secret that it can be challenging to keep that extra muscle in them. However, that being said Avalanche, gives his horned pen mates a run for their money when it comes to the thickness competition. His dam, 098D, was purchased in Ferme Gagnon's 2018 Production Sale where she was one of the feature and high selling lots. We were in search of a new donor female, and she hasn't let us down. Her first calf had several admirers leading up to our Bull Sale but unfortunately, he injured himself only a couple days prior. Her second was a female who was a stunning female we offered in the 2021 Western Harvest Sale. Avalanche is her third and we are anxiously awaiting the arrival of her fourth any day now. Jumbo is a bull that I really admire for his sheer depth of body and overall spring of rib. He is sired by the proven calving ease Radison bull who we have had amazing success with. We calved our first Radison daughter this spring and man I wish I had more. They are easy fleshing females that are full of milk and doing outstanding job on their first calves. Jumbo's dam, 910G,

was on the no touch list when Jay came to do his female selection back in 2020. Part of this was that we had sold a very good full sister to Rand Mar Management and Farm the year previous as our high selling bred heifer. Don't let the H in his name fool you as he was born just a couple days before the new year. **Dilutor Carrier**

Oxford is a bull that has been in the works since the day I AI'd his mother. The intention was to try to create a heifer bull out of a cow that had a proven track record for calving ease and mix it with a bull that also had a proven track record for calving ease. That's right a double shot of proven calving ease! Now 95% of the time when I try this, I get a heifer but this time the stars aligned. His dam, 765E, is a moderate framed cow that has an extraordinary udder and is a easy to spot when showing people around. Her first son sold to Madge Simmentals where he has been the main heifer bull. Her second calf just had her own baby and wow what a beautiful pair they are turning out to

be. All this shouldn't be a surprise as both her mother and grandmother also have bulls in this very sale. Also note Oxford ranks in the top 3% for calving ease and top 5% for birthweight. **Dilutor Free Co owned with DGR Cattle Co**

Whetstone will be this years lone Climax son. We have utilized Climax through our AI program since 2016 and have several daughters in production. He does an amazing job of stamping all his daughter the same. To us the strongest attributes he stamps them with are perfect udders, small tits, great colouring and outstanding feet. Whetstone's dam, 627C, is a female we selected after purchasing pick of the heifer pen from JNR Farms. She has turned into a moderate framed, heavy milking female who likes putting calves into the replacement pens. Her first son is working for the Vert's just down the road and I have two daughters working for me. Whetstone will make her 4/4. Also note that Whetstone and his dam are both solid colour with large wrap around goggles. **Dilutor Free**

I don't usually keep twins but when I do there is a really good reason. Conway and Darwin are not only very good deep bodied, long spined, thick muscled brothers but they stem from royal lineage. Their father is none other than our senior walking herd sire Challenger. Head over to the beginning of the red section to learn more about what I think of him. Next his dam is none other than the great, 241Z, who produced our high selling \$30000 bull from last year's sale, selling to Skyline Simmentals. We were lucky enough to buy a semen package back on him and let me tell you those calves are something to marvel at! Look for more great offspring from this great cow in the years to come as she is currently in the donor pen waiting for her turn to be flushed. **240J Homo Polled, Hetero Black 241J Homo Polled, Hetero Black**

Hagen is another bigger framed, long spined black bull that is sired by Challenger and comes from a good Skors cow. The year that the Skors dispersed we did a pasture tour and Hagen's dam had a bull calf who made a guy's jaw drop. That bull weaned off at close to 1040lbs at the end of August! Prior to the sale we decided that the "Y" group of cows was older than what we thought we wanted. The good news here was that there was a daughter in the bred heifer group that sold prior to the cow. Long story short they both came home and have both put either a bull in the bull sale or a daughter in the replacement heifer pen since. Proven genetics on both sides of the pedigree. **Homo Polled – Hetero Black**

Jarvis is a higher performing black bull that stems from an extremely productive cow family. This heavily haired, deep hearted, deep bodied bull is an interesting pedigreed calf that is a combination of two maternal pedigrees. On the top he is backed by the great 176Y cow that had an outstanding career at Skors Simmentals and on the bottom he is backed by the great 508C here at our place. Jarvis' dam is a full sibling to our 2020 high selling black bull and has a maternal brother on the next page that will be sure to get some attention. Here is your chance to add some power to your herd and still maintain that maternal lineage in the heifer pen. **Homo Polled – Hetero Black**

Crossroads Connected is a bull we came across in our hunt for a Black herd bull. There were several criteria that we were trying to meet. Deep barrelled, loose hided, above average performance, heavy haired and long body where just a few. Connected himself nailed all those but added some chrome to the package and was backed by a very strong cow family with a bit of Fullblood influence. To us this made him our top choice. When sale day arrived, we weren't the only ones that had found him as he sold for an outstanding \$100,000. Needless to say, we swung but just missed. Lucky for us we took another swing and were able to secure a semen package on this guy. What a wonderful addition he has been, adding length of spine, performance, depth of body and great hair coats. We look forward to his daughters coming into production next year as we have a feeling they are going to be highly productive cows.

Kraken is a bull that has had a little extra something about him since a young age. The white on his face definitely made him easy to spot but then as you take a closer look you come to realize how good he actually is. Michelle told me early last spring that Kraken was her pick for the top black bull and to this day I haven't told her she is right. Not because she isn't right but because it tastes and sounds funny coming out of my mouth. I am hoping she doesn't read this comment as I would hate for her to find out! Kraken's dam, 748E, was the top replacement female in her respective year and has yet to disappoint. Her first calf was a member of the Western Harvest Bred Heifer Sale group selling to Rainy Creek Farms. Her second was a bull calf who sold to the great Boulerville Family and Kraken is her third. Today this big ribbed, soggy cow has an outstanding Tycoon son walking beside her. I should also mention that Kraken pushed the scale down to 984lbs at the end of August! Take a real good look here! **Homo Polled – Hetero Black**

If you're looking to add some frame to your herd you might want to consider Jackpot in your search. When this guy was born, I could swear his head hung out of the front of the sled and his hinds hung out the back. When this happens, I know there is a good chance the scale is going to read heavy in the barn. However, the longer the calf the more they weigh in the fall too. Jackpot took advantage of his momma's high volume of milk and grew to an impressive 924lbs by weaning day. Callie 533C, Jackpot's dam, is Bob's cow, our third son. She herself has raised highly sought-after sons before this who have also topped our sales. Bob was really excited this calving season as Callie finally gave him a heifer calf! **Homo Polled – Hetero Black**

Black Prince is a bull that has had all the bells and whistles from the day he was born. He is deep, fleshy, long and comes from an outstanding Skors cow. As we toured the cows prior to the Skors dispersal sale, Terry was sure to show me two sisters. These sisters stemmed from a bull that they raised called Skors Black Joker 217Z. What I remember most is Terry's comment about how he wished he had kept more daughters out of this bull. Now I understand why! Not only is 315B a big framed cow who produces moderate birthweight calves. She also must have loads of milk in her picture-perfect udder as her calves grow like crazy. Make note that Black Prince isn't the quietest bull in the pen and doesn't like being alone. Usually, I wouldn't offer these bulls in the sale. However, the quality is all there, and I believe in the right situation this bull could add a lot for his new owner. **Homo Polled – Coat colour pending**

Goodyear is the second son that we will have on offer out of our walking black herd bull, Michelin and 50B. Goodyear's full brother sold in last year's sale heading deep into BC to Brian and Carla Wamstecker's ranch. Michelin comes by his name honestly as he ended up getting a tire stuck on his head for nearly a month as we tried to figure out how to corral him to get it off. Blinders on a bull makes chasing extremely difficult. Goodyear is a moderate framed bull that is deep sided and has an outstanding hip on him. Goodyear's dam, 50B, is a percentage female that stems from the good uddered, good milking 50 line. If you are looking to add a little chrome to your calves here's another bull who has it built in. **Homo Polled - Homo Black Co-owned with DGR Cattle Co**

Sampson is a long spined, big barrelled performance bull with a cool twist to his pedigree. His sire is our newly acquired red herd sire Skors Crocket 250F. Long story short we really liked Crocket as a yearling and when the opportunity came up to buy him as a two-year-old the decision was easy. Check out Crocket in the red section to get a better understanding of what we think about him and his future! Sampson's dam, 514C is a moderate framed, strong uddered cow with an action packaged pedigree. She stems from the great Yara cow that we sold in the inaugural Friday Night Lights. Yara became a leading donor cow for Rust Mountain of North Dakota. Her sire Captain Morgan is known for producing outstanding cattle in several countries around the world. **Homo Polled – Hetero Black**

SKORS BLACK ENTICER 4W  
SKORS BLACK RICKY 111W

Turret is one of three Capacity sons we will have on offer this year. Capacity is a bull that created a big stir in the industry a few years back and after seeing a group of his first daughters sell, I knew that I had to try to incorporate this genetics into our herd. There is a reason they called him Capacity, that is exactly what he adds to his calves. Turret himself is a deep sided bull that still has good length and is clean in his lines. Turret's dam, 100F, is a deep ribbed, blaze faced cow that has an extremely square udder. This bull should calve extremely well. **Homo Polled – Hetero Black**

**\$8,000.00**

SUN STAR RED GRACE 54P

Where to start on Dark Knight? Well, I should probably tell you he is long, deep and heavy haired. I would also like you to know that he comes from a long line of strong genetics that have longevity built in. His great grandmother, 54Z, is still working for us and still has a perfect udder, teats and feet. 54Z put another daughter in the replacement pen this year and just had another daughter here a few days ago. Dark Knight's dam, 423B, is no stranger to putting top end calves into the Bull and female sales either. She has had two sons pass through this sale selling to Bigview Stock Farms and Chance and Amanda Thompson. She also had the high selling heifer calf

three years ago selling to Butte Pebble Cattle Co. If you like owning the good ones, take a look here. **Homo Polled – Hetero Black Co owned with DGR Cattle Co**

Commander is a bull that seems to command your attention. For some reason he finds a way of just showing himself off. I don't know if it's his excellent structure, depth of body or great hair coat but there is just something that grabs your eye. Commander's dam, 189D, is a big bodied, strong uddered cow that also has an extremely heavy hair coat. She is a direct daughter to the cow maker Enticer 4W who really showed his ability in the Skors dispersal sale. I found it very interesting that the most productive cows were all Enticer daughters. If your after cow power and want to raise a strong set of females Commander's pedigree defiantly leans towards that outcome.

From Performance bulls to Calving Ease bulls. Jarome marks the first of several good bulls that I would recommend to people looking for a bull who leans to the calving ease side. This soft sided, moderate framed bull started at a tiny 63lbs. His dam, 307G, is a moderate framed first calver, who has a nice tight udder and came to us from the Skor Dispersal sale as a heifer calf. Jarome's sire, Skors High Roller 34C, is no stranger to our heifer pen. We have used him for several years and have had so much success calving him that when the semen ran out, we went out and bought a son. Note that he is in the top 10% for CE and top 4% for BW. **Homo Polled – Hetero Black**

McGuire is a spitting image of so many brothers before him. Small headed, smooth shoulders and a nice big rear end. Not only did we go out to buy a 34C son to use in our own heifer pen, but we liked the 34C progeny so much that we were sure to bring his mother home from the Skors dispersal. Not to jinks things but there might be a very neat brother to 34C in next year's offering! McGuire's dam, is again a first calf heifer that did an amazing job on her first time out. We were really excited to see what she would do as she is one of the first daughter to calve from our 2019 high selling bull Brimstone. Needless to say, he didn't disappoint.

Reg may not be big but he will be a bull that will last in a heifer pen for years. I don't usually udder the words heifer bull without some hesitance, but this guy has generations of calving ease built into his pedigree. His sire is none other than Cliffhanger. A bull we used in our heifer pen for several years and once he became too big to breed heifers, we collected a large volume of semen on him and have been utilizing him through our AI program. He has worked so well over the years that my dad has AI'd a very large portion of his commercial bred heifers to him for the last two consecutive years. Make note that the Cliffhanger daughters are also putting bulls in this very sale. Reg himself ranks in the top 2% for both calving ease and birthweight.

Another 4W son out of one of our strongest cows. If you haven't read the above comment on the maternal strengths of 4W, I would suggest having a quick read. Stenson is another bull that is double bred for maternal greatness. His dam, 477B, is a moderate framed, deep bodied, hardworking cow that likes raising big calves. She raised one of our high selling black bulls in 2018 selling to X-Factor Simmentals and in last year's sale had our feature black bull, O'Keefe, who fell only a couple % short on semen testing day. Lucky for us he was able to clear up after a couple weeks rest and we used him ourselves. His first calves are here, and we are more than pleased with the results. A little different pedigree that is full of maternal power.

Challenger is a dark red moderate framed bull who we purchased as a high seller from Skors Simmentals. He is a bull that is very clean fronted and with that extra length of spine. Challenger is backed on both the top and bottom sides of his pedigree by maternal greatness. His females look outstanding and are basically carbon copies of one and other. For the past three years our top red female has been a Challenger daughter. For the most part they are extremely dark red and are soft made with great temperaments. We are currently just wrapping up calving his second set of daughters and are really happy with both their udders and teat size. His bull calves are typically born smaller and have that little extra style to them. He has put a nice square hip and large barrel into all of offspring.

Hewitt is another dark red bull who will be one of the younger bulls in the pen. Don't be fooled though as he stands with his older brothers without missing a beat. I think if he were a month older, he would put a few of them to shame. It was obvious from the beginning this guy had it. His mother, 643D, is a moderate framed cherry red cow with an impeccable udder. She produced one of my favourite bred heifer back in 2020 who is now working for Skyline Simmentals. She also has a daughter working for us and is a maternal sister to the great Yara cow who is leaving her mark in both Canada and the US. Be sure to find this guy on sale day. **Homo Polled**

I'm not sure we can get anymore capacity into a bull! Dalton is a bull who has shown his incredible depth of body since the very beginning. His dam, 612D, is a cow we picked up out of the Skors dispersal sale and was original raised by M&R Cattle Co. We were drawn to her due to the fact that she was backed heavily by the Twin Chief breeding program that we have had great success with over the years. 612D herself is a large framed cow that has loads of milk and also has that big sweeping rib cage. Dalton will definitely add volume great maternal strengths to his offspring. **Homo Polled**

I don't know if we have ever used a bull that stamps his sons and daughters quite like Challenger does. Last year we only had a small number of sons in the sale and a very big group of daughters in the replacement pen. This year is almost the exact opposite have a big group of sons and a smaller group in the replacement heifer pen. This is strictly due to the numbers born for each group. Interesting how this can happen from year to year. Sanford is one of these stamped sons showing his depth, muscling and dark red color. His dam, 299Z, is a large volume cow who is half fullblood by pedigree. She has a nice little blaze and has the ability to raise those big calves. Sanford will be her fifth bull calf. One of those was a full brother who sold in last years sale to the Gadsby Colony. **Hetero Polled**

Aberdeen is another 52Y implant son that is very similar to Harkin. These moderate framed, dark red, easy fleshing bulls come to you with different sires but have many similar attributes. Read the above comment for more info about 52Y and her daughters. Aberdeen's sire, Missile, is no stranger to adding sons to our bull pen. Over the years we have had several sons pass through this sale and are very impressed with the production of his daughters. When we started using Missile, we really liked how soft he made his offspring and loved the thickness he added. His daughters are now passing these same attributes into their offspring. Make note that we had only had two straws of semen left

Skors Crocket is a bull that we really liked as a yearling and when the opportunity came up to purchase him as a two-year-old it was an easy decision. There were a number of factors that lead us to this bull. We liked his incredible length of spine, ease of muscling, large testicles, strong structure and being a direct Crocket son didn't hurt either. As many of our loyal buyers will already know, we had a Crocket son years ago that left us way to soon due to unfortunate injury. His name was Revolution! As time moved on, we

Yikes! Talk about a spitting image of his father! Gandalf is a bull that has show his extreme ease of muscling since he was a wee little lad. He may not be the darkest red bull in the pen but he makes up for that is sheer mass and volume. Gandalf's dam, 54X, is a cow we purchased out of the Kopp dispersal sale and after a couple calves knew she had to be flushed. Currently there are 30 direct offspring registered under name and this doesn't include any of her grand children. The most interesting part is that she has been crossed with 12 different sires and each cross has yielded outstanding offspring. A true testament to how strong this cow is. Note that this fellow is a natural calf from this one-of-a-kind female. I look forward to hearing about Gandalf's daughters!! **Hetero Polled**

Cyclone might be the longest bull in this year's offering. This length was very apparent for a very young age. Originally, I thought this guy lacked middle but because of his length it creates an optical illusion. Once this guy gets into a squeeze it is amazing how much volume he has. Speaking of big volume, Cyclone's dam, 163A, comes to mind. This large framed, dark red, big capacity cow goes back to the great Red Fortune 176Y cow, thus making her a maternal sibling to Challenger. All that length and volume talk combined with maternal power equals pounds. This might be why Cyclone weaned off at an outstanding 874lbs at the end of August. In case you didn't see from his picture.... Cyclone comes with that exciting chrome package. **Homo Polled**

Cromwell is a dark cherry red Connected son who is long spined and has a great thickness. We have been very impressed by the frame and length Connected

CROSSROAD CONNECTED 12G  
SIRE OF LOT 72-74

has added to our offering and are really looking forward to impact his daughters will bring when they start into production. Cromwell's dam, 139Z, has been an incredibly productive cow for us. Winnie, 139Z, is a deep barreled, picture-perfect cow that has bred extremely well over the years. Cromwell will mark the fifth of her progeny to be offered for sale. She has had a daughter who sold as a bred in the Red and Black Sale. The other three have been sons selling to Speedwell Farms, Sande Cattle Co and Hoofin' On Er'. Here is your chance to get a piece of excellence. **Homo Polled – Dilutor Free**

Yale has had several visitors pick him out as the top of this year's red bull pen. He is extremely square hipped and has a topline you could set a pizza box on. This is combined with a deep swinging rib cage and more than adequate length of spine. Yale comes from a high-performance cow we selected out of the Skors Dispersal Sale. 121C, Yale's Dam, is a deep ribbed, square uddered cow who has done a great job thus far. Her first calf for us just calved and has a great bull calf at her side. A definite sale feature here. **Hetero Polled**

Cypress is the second Roosevelt son in this year's offering. We were drawn to Roosevelt by his dark red color, incredibly strong foot structure and a dam who has outstanding rib depth and a fantastic udder. When you analyze Cypress you will see all these features..... less the udder part..... part of this is due to the fact that his dam, 510C, is a broody female that may be the deepest ribbed cow on the farm. 510C is the result of a flush done on the KOP 67U cow which makes her a maternal sibling to our old herd bull Commotion. If you like big volume cattle don't let this bull pass you by. **Homo Polled**

Warrior is a Roosevelt son who is built right. Structurally he is very sound and phenotypically he is also the way we want them. Since birth this guy has had great muscle expression and outstanding length. Warrior dam, 692D, is a daughter to our flush cow Ms Tracker 49X. 692D is a long spined female that has a great udder and brings in a sharp looking calf year after year. We bred her back to Roosevelt thinking that it had to be time for her to have a heifer calf..... needless to say in the middle of January she gave birth to another baby boy. Yes, that's right we have never gotten a heifer out of this great cow. One of these years she will have to give us a heifer..... I hope. She currently has sons working for Drew and Deanna Keiver and Creekside Cattle Co. **Homo Polled Co Owned with DGR Cattle Co**

Where to start on this tremendous bull? The day this blaze faced arrived I was attracted to his perfect blaze face and in my opinion perfect size for a first calf heifer. In the following weeks it was hard to believe how quick he muscled up and really started to show himself off. As the summer went on he continued to fill out and by weaning it was hard to keep your jaw off the ground. A year prior to all this I spent some time in Manitoba looking for our next red heifer bull and narrowed it down to two. I was able to bring Red Wolf home with me and bought semen on the second. Unfortunately for us, Red Wolf sustained a career ending injury in the first week of breeding. Hence the reason we only have Chester in this year's sale. After a long recovery we were able to draw semen on this great bull and look forward to using him through our AI program. Chester's dam, 915G, is a daughter to our highly proven heifer bull, Cliffhanger. On the bottom side of 915G's pedigree you will find the high selling heifer calf from the Workman Dispersal. I invite you to study his EPD's as he is above average in 14 out of 15 categories. **Beechinor Bros Simmentals will be retaining 50 straws of semen for in herd use only. Homo Polled**

The year before we bought Cliffhanger the Workman's sold a power bull that we really liked. At the time we weren't looking for a new cow bull but when the chance to buy a semen package came up, we were excited to get our hands on one. We couldn't have predicted how strong these calves were going to be. Not only were they heavy haired but had a lot of volume. Teeter is as loyal as they come. As soon as he sees you, he comes right over for a pet. He comes by the honestly as his dam, 36C, is the exact same way. Whether you are looking for depth, hair, performance or temperament Teeter has it all. **Hetero Polled**

Barnard is another deep bodied, heavy haired, thick made bull out of Max Factor. This bull spent the summer just up the road at what we call our show pasture. Not only does that mean he was in our opinion one of the top bull calves, but his mother has to be a highly reliable cow. 190D, Barnard's dam, is exactly that. Not only was she Terry's favorite young cow but she done a great job for us. One should note that she also has a good Red Express daughter working for Lawson Bros Ranch. **Homo Polled**

A moderate framed Max Factor son who has plenty of top and thickness for a bull who started with a small 78lbs birthweight. The part I could wrap my head around is how well he grew through the spring and summer. I knew he had a chance of weighing up but I wouldn't have guessed he would push the scale down to 870lbs (his actual weaning weight). We believe that this happened due to the fact that his grand sire Cliffhanger did the exact same thing. Nestor's dam, 812F, is a moderate framed cow with an impeccable udder. If you look deep into her pedigree you will find our great flush cow 54X. An excellent balance for maternal and power here with a nice set of EPDs. **Homo Polled** Co owned with DGR Cattle Co

The consistency within these Max Factor bulls is hard not to be impressed by. We are big fans of show Yellowstone and I told Michelle that I would name a bull Jimmy. Now if you don't watch the show, Jimmy is a character who is a hard-working individual that has to work his way up to earn everyone's respect. This Jimmy isn't much different. He wasn't that big when he started but worked hard and grew into a bull that pushed a few of the others into the steer pen. As time goes on he continues to impress. Jimmy's dam, 61B, is a cow we purchased as the high selling heifer calf out of the Blacksand Dispersal sale. To date this big barreled thick made cow has had two bulls and two heifers. Her heifers have become cows for Big Rock Simmentals and ourselves. Her first son works for Brush Hills Ranch and Jimmy is her second. **Homo Polled**

BI talked earlier about the strength in the Red Whiskey daughters and the maternal power of the 54X cow family. Well Bennington is the result of that combination being crossed to the proven calving ease bull Approval. This bull has a soft spot with me as he would tag along with me during my health checks each day and loved to have the odd pushing match. To this day he is very well mannered and enjoys hanging out during visits to the picture pen. Bennington's dam, 945G, was a first calver last year and did an excellent job on her first calf. She has a perfect udder and optimal teat size. Which isn't a surprise as that is the story with all our 54X daughters. Dark red with a great balance of calving ease and maternal greatness. Be sure to find this guy on sale day. **Homo Polled**

Go figure, another good bull out of a Cliffhanger daughter. As these females get into production, we are seeing just how strong these young cows are. They aren't the biggest cows in the herd, but they sure have the ability to raise heavy calves. This particular Cliffhanger daughter belongs to our eldest son Kyler. In grade one he chose Sir Sandford's grand dam out of the bred heifer group. She was a big bodied fullblood female who was a Viper daughter. That makes Sir Sandford 1/4 Fleckvieh. Sir Sandford's dam, 983G, is a moderate framed cow with a beautiful little udder and an exceptional haircoat. With calving ease on both sides of his pedigree I wouldn't be afraid to use this guy in my heifer pen. **Homo Polled**

Benson is a long spined, bigger framed bull who had a very short gestation. He arrived a couple days before Christmas, and this explains why his name ends in an H. Red Deputy is a bull we have used for several years within our heifer pen and haven't had a minutes worth of trouble calving him. Benson's dam, 937G, is one of the first Challenger females to calve for us and we aren't disappointed. The Challenger females have generally remained moderate but all have strong udders and seem to have more than adequate milk. This can be seen in Bensons 924lbs weaning weight. That's right his actual weaning weight was 924lbs off a first calf heifer. What more could you ask for. Make note that Benson's great-great grand dam also has a son in this year's sale. BEE Cromwell 39J is his name. **Homo Polled**

Rutherford may not be the biggest bull in the pen but how could he be when he started at 59lbs. If you're looking for a easy calving heifer bull, I might have just the guy. On the top side of this pedigree you will see our old heifer bull Cliffhanger. It will be a long time until we can find a bull that is as trouble free calving as what Cliffhanger has been. On the bottom side, Rutherford's dam, 956G, is a small framed, light boned female that is actually a full sibling to our old herd bull Commotion. If you are in need of a dark red, smooth made heifer bull that won't outgrow his job, take a look at Rutherford. **Homo Polled**

# SKYLINE SIMMENTALS

Welcome! This is the most exciting set of bulls I've had to offer to date. These guys have put their work in and are ready for their new ladies! The new sires we've used this year have really worked out well. Capacity and Max Factor are well known in the industry and there's a good reason for that, they know how to make bulls and females! BEE Maverick 117F has made his mark on our herd at home leaving us with wicked bulls on the purebred side and big steers on the commercial side, along with fancy productive females on both sides!

I couldn't be happier with the quality of these bulls this year! Due to the drought in our area these guys were pulled off the cow a little earlier than usual but they haven't missed a beat! The dams to these bulls really know how to make them good. These cows are solid made with good udders and solid feet.

Check us out on Facebook to see more supporting photos for these bulls!

If you are unable to make it sale day please do not hesitate to call us or the trusted team at Transcon Livestock! Wishing everyone the best of luck in 2022!

Amanda Steffler

Jackpot is the type of bull we strive for at Skyline Simmentals. Extremely soft made, massive through his middle with great muscle expression. This guy has everything you need. Fancy made but yet still packs a punch. It's hard not to watch him go by. If that's not enough he's got great testicle development and big feet. His sire capacity, has already made his mark on the industry and I believe this calf is a great example of that. If you're looking for a bull to add softness and middle to your females, but pack the pounds on the bulls/steers in the fall look no further. This guy means business. **Hetero polled**

This bull has been a standout since day one. Jigsaw is a deep red, long bodied wide bull who is following in the footsteps of his sire, BEE Maverick 117F. This bull is built solid with a massive top, smooth front and great feet. He moves out very nicely and is hard to miss. His dam is a dark red big middled female who knows how to make a bull, and has proven that with her first two calves already! Jigsaw carries himself well, like he knows he's got some good stuff going on. It's truly hard to fault this guy. **Hetero polled**

## BEECHINOR LAND & LIVESTOCK

Welcome to the 2022 edition of the bull sale. The cow/calf sector is looking for a big year and the skies the limit if timely rain hits the prairies. Our family has had an exciting start to the year as we welcomed our daughter Kennedy in mid January. We've been involved with this sale since its inception and are excited to display one of the strongest sets of bulls to date. When we started operating under Beechinor Land and Livestock, we focused on highly productive cow families with strong maternal and economically important traits. As you read the footnotes you will see how much emphasis we put on these cows and their abilities. We've also invested heavily in herd bulls to match them, with the likes of Sibelle Sugar Ray and FGAF Electric Avenue. Both these bulls provide polled progeny with performance. Again, this year the Jan/Feb born bulls have been fed and managed with the Beechinor Bros bulls on a TMR and the Oct/Nov born bulls have been pail fed pellets to manage intake and provided with self feed 1st cut hay. These fall born bulls offer a couple more months of maturity and stature. This year we have added 5 open replacement females. These girls were weaned in October and grazed on banked grass until mid December before coming into the yard. We look forward to seeing lots of people out on Feb 28th and would love to answer any questions or tour you through the pens beforehand.

Stefon, Rebecca, Tyce & Kennedy

SKORS BLACK FORTUNE 43R

When we heard news of the Skor dispersal there was one cow that we knew we had to have, Skor Red Fortune 176Y. To our disappointment 176Y had been bred to some poor-quality semen for a couple cycles the previous year and when she did eventually catch it caused her to calve late. Skors purposefully kept her open, began to flush her and decided to hold her out of sale to be a building block for a potential rebuild if they chose to. We tried hard to convince them to sell her privately but had no luck. We teamed up with some partners to buy one of her daughters as a high seller out of the dispersal. Then early the next year along with Red Top were finally able to convince them to part with 176Y where she quickly entered our flush program. There are very few cows in the breed with a track record like 176Y. With high selling sons like Skors Challenger at Beechinor Bros, Skors Bootlegger 102D at Red Top and Skors Bootlegger 102B at EDN. Then with a couple high selling daughters at the dispersal and she has amassed a natural progeny average over \$20000. We had been saving a couple straws of the great IPU Revolution for a cow just like 176Y. Revolution stood at the top of many shows and won many banners but more importantly left a lasting impression on many herds through his sons and daughters. Both Rebel and Anarchy show strong consistency and are at the top of the pen for growth with great stature, long bodies, thick builds and a great calving ease/birthweight to weaning weight/yearling weight EPD spread.

Another strong herdbull prospect out of the Skor Red Fortune 176Y donor cow. When we purchased 176Y she came along with a package of Bootlegger embryos which we were excited to implant. An extremely proven cross which produced two great breeder bulls in past Skor bull sales. Moonshine is a dark dark red bull with nice frame size and a big full hind quarter. He is a smooth made bull with lots of length and the type to add growth to his progeny. He has two flushmate sisters in the replacement pen that have us very excited about the future of this cow family in our program. These fall-born bulls have proven to give a few more months of maturity and a little less hassle at breeding time. **Homo Polled Non Dilutor**

TWIN CHIEF UNVEIL 405U

As his name suggests, this rugged beef bull is a pen leader in terms of performance, and he crushes the scale down. He weaned off just shy of 1000 lbs. at end of August and continues to lead the pack.

WHS CALADRA 111C DAM OF LOT 101

He's a large statured bull with a long, deep body and strong muscle pattern. He is an interesting genetic combo being a red factor bull out of a fleck sire, which gave him a spot of white on his face. His dam is a correct uddered cow who produces lots of milk and consistently weans off some of our heaviest calves. A daughter of Caladra was a feature at Red & Black in 2020 selling to Rainy Creek Farms. The last couple years, big steers have brought a substantial premium and you can look for this guy to sire a group of steers that will be heavyweights. **Hetero Polled Non Dilutor**

The cross with Sugar Ray was one of Unbelievable's best and this pair of beef bulls is great proof of that. You'll want to put a few checkmarks beside Foreman 126J if you're looking for one to add some power in a polled package. He has a nice, thick red hair coat with that rugged herd bull look, lots of capacity and length of body. Rocky 119J is a polled bull with a great look to him and easy-going nature. Lots of mass with a big square hip and wide top. He is one that developed quickly into an eye appealing package and continues to impress. Their dam was a no miss cow with a long list of features and high sellers, selling across the country and into the US. Unbelievable 1U was our main herd matron and donor cow for many years but is gone now so there won't be a lot of opportunities to secure a direct son going forward. She has produced us many impactful daughters with high maternal merit and I would expect the daughters of these two bulls to also be excellent cows. A full sister sold this fall to our good friends in Quebec, Ferme Sibelle/Ferme BMS for \$20000. Another full sib sells in the open heifer section, and we've got one more in the replacement pen that is an easy favourite.

Elevation bulls have been popular the past years showing off easy fleshing ability, some user-friendly calving ease and style. His daughters are showing high potential to continue these traits. The maternal ability of Equation's daughters should continue that trend as well. His dam Emma has been a female factory with daughters at Beechinor Bros, Starwest, Virginia Ranch and here. A granddaughter of Emma is a feature amongst this year's open heifer group as lot 110. She also produced a high performing son for Allan B. Olson out of last year's sale. **Non Dilutor**

An easy doing herd bull prospect that has as much middle as one could have. Fission combines that with a strong natural muscling ability and incredible mass. His dam Vanessa has been the picture of consistency selling sons to Dallas Phillips, Rob Sweet, Watergrove Ranches as one being retained for Dad's commercial herd. A daughter was purchased by Starwest for \$32000 and has been a great producer there. Another daughter at Johns produced the Western Harvest high seller in 2020. This extremely strong footed cow family is one that is quietly raising to the top with feature sons in most of past years bull sales including this one with lot 16 and lot 107. The Electric Avenue x Viper breeding has been an instant success with BLL Petra topping this past years Pasture Treasures at \$40,000 to Beechinor Bros/DGR. **Dilution Carrier**

Electric Avenue has matured into a top herd bull that we have no hesitancy in breeding to a vast array of cows with great results. His bull calf numbers have been limited due to more heifers being born and had the misfortune of losing a couple to freak injuries this year. However, with the two on offer this year, you can see our enthusiasm in this sire's ability. **Hetero Polled Non Dilutor**

A moderate framed Electric Avenue that gets noticed quickly for his blood red colour and strong profile. Smooth polled and from a strong uddered, high producing cow whose last calf topped the 2020 Fleckvieh Equation at \$35,000 as an open heifer to Century Simmentals. Bessie raised both Voltage and a twin sister. She's got another Electric Avenue bull calf at side that is one of our early favourites again.

Sugar 142J is a polled heifer with a ton of potential out of a proven cross. Two flushmate brothers sell as lot 102 and 103, another full sister was a Pasture Treasures high seller to Sibelle/BMS and they are extremely happy. Sugar drew the short end of the recip mother quality. She was self-weaned in May and did the rest on her own. She is coming along well but with a little patience this could be a diamond in the rough.

return undeliverable catalogues to

## TERMS & CONDITIONS

**TERMS** The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

**BID** No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

**SALES TAXES** Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

**DISPUTES** In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

**PURCHASER'S RISK** Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

**INSURANCE** Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

**US BUYERS** There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

**CATTLE PICTURES AND INFORMATION PROVIDED** The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

**ANNOUNCEMENTS** All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

**CERTIFICATE OF REGISTRY** A registration/recording certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

**SHIPPING** Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

**BREEDERS GUARANTEE** As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price.

**EXCEPTION TO GUARANTEE** In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

**HEALTH** It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

**EMBRYO & SEMEN** Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

**ACCIDENTS** Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

**RIGHTS AND OBLIGATIONS** The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

**TRANSCON LIVESTOCK CORP IS AGENT ONLY** It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.
