BEECHINOR BROS.

*W*elcome to our eleventh annual sale. 2022 has been an exciting year around the farm. January started out by watching the builders put some of the final touches on our new calving barn. Although we didn't get the use of it for the 2022 calving season it sure got everyone excited about doing it all over again. To add to the excitement of the 2023 calving season we decided it was time to step out and buy the best polled Fleck bull we could find. \$355,000 later we welcomed Rumble to the sire line up! Then of course we made it through breeding season, seeding, pasture turn out and harvest. Again, we find ourselves back at the beginning and like always we find ourselves needing to stop to say Thank You! Whether it is bidding, buying, offering a helping hand, giving knowledgeable advice, taking the time for a tour and visit or allowing us to farm your land. Without your support we wouldn't be able to continue doing what we love.

Our main goal is to bring you an animal that is of the highest quality and are proud of the animals we offer to the industry. Each year we go out and find new genetics that we feel will not only improve our herd but inevitably increase the quality we can offer to our clientele. Again, this year we are excited to offer offspring out of our walking herd bulls, Elevation, Sawchuck, Challenger, Hercules and O'Keefe to name a few. All of these bulls continue to exceed our expectations and will have an ever-lasting impression on our herd. Elevation, Challenger and Sawchuck's first daughters are now in full production and one has to be excited about the impact these young cows are already having and will continue to have on our herd going forward.

All the yearling bulls have been fed together since the very end of August. The bulls are eating a TMR diet that consists of corn and cereal silage, chopped hay and a starch free pellet. All the ingredients are tested and balanced to allow the animal to show their natural growing abilities and achieve a strong ADG without harming their long-term development. We do not push the feed to our animals and pride ourselves on the fact that many customers express how their bulls actually gain weight or maintain their condition throughout breeding season.

For those of you who are new to our program, we are a family run purebred Simmental operation. We will be calving out just over 300 purebred females, some of which are part of our embryo program. We are fortunate to still be farming along side my parents, Barney and Melody. Over the years they have been our major support system giving us years of knowledge and many hours of help. Along side the purebred cows Mom and Dad also run a large commercial herd. Although Mom and Dad own these cows, we feel fortunate to have them around as they help keep us focused on the overall end product that everyone is trying to achieve.

As always, we are excited to have Beechinor Land and Livestock, Stefon and Rebecca Beechinor and Skyline Simmentals, Amanda Steffler joining us this year. Be sure to check their offerings out as there are several interesting and high-quality individuals from each consigner.

If you have a minute, I invite you to give me a call and help you find the bull that will suit your needs. We feel there are a variety of different bulls and are more than happy to help make sure you find the one you are looking for. We know that sale day is busy for you and that there can be schedule conflicts. If for some reason or another you are unable to join us sale day, we highly encourage you to come out to the farm and view the bull pens at your convenience. If you are unable to be present on sale day and are wanting to participate, we encourage you to phone us or take advantage of the trusted and professional staff of Transcon Livestock or Bohrsen Marketing.

We look forward to visiting,

*John & Michelle
Kyler, Easton, Austin and Kaidynce*

welcome from *Transcon Livestock*

Bombproof, bulletproof and kid-proof would all be great adjectives for this bull pen! If disposition is a sincere quality you want in your bulls, this is the sale!

But of course, to work from the ground up, the genetics are leading. Sire groups featuring Elevation, Challenger, Beast, O'Keefe, Electric Avenue, plus the A.I. sires offer so many options in this sale which is now one of the largest in Canada!

Because these are such good people, with exceptional customer service, they have one of the largest in-house crowds of any bull sale, but also have the volume and quality to set you up in any price range. Do you like steak? Hope so, you'll get a beautiful meal on the Beechinor tab on sale day!

This sale offers the opportunity to crossbreed your cowherd, even if they are all Simmental, but let's understand that combining the Fullblood strains with the Black & Red pedigrees gives a big ole shot of hybrid vigor. It is crossbreeding within a breed!

It's a great event to see because of the quality that the Beechinor Bros bring to the table, are complimented by the bulls that brother Stefon & family include and the best set of bulls that young, enthusiastic Amanda have ever had in the development pen are comparable!

Please join us on sale day right outside of Bentley, AB, just off highway 20. Don't ever hesitate to call on us to assist with any bidding and potentially buying options you may require. Our cell phones are always on.

See you near Bentley,

Jay Good

INSURANCE Kolton Kasur · Canadian Farm Insurance.....780-387-8376

DELIVERY All bulls that are remaining to be housed after the sale must be insured. Bulls will be housed free of charge until April 15, 2023. Animals will be delivered free of charge to points across Alberta, Saskatchewan and Manitoba. This will be done at the buyer's convenience, however, if the truck is in your area you may be asked to take your bull early. We will do our utmost to deliver your bull to your yard.

SIGHT UNSEEN If you are unable to attend the sale, but are interested in bulls, please feel free to give the consignors a call prior to sale day and they will personally go over the bulls and your program to recommend the animal that would meet your needs. Following that, the Transcon Livestock and Bohrson Marketing teams will represent your needs in a professional and confidential manner.

SALE TERMS Animals sell under the Transcon Livestock Corp. Sale Terms & Conditions which will be posted on sale day.

HEALTH & FERTILITY All bulls will be scrotal measured. All bulls over 12 months of age will be semen tested. All bulls were treated with Ivomec and such products and have received all their vaccinations. Contact seller for details on programs. All sale bulls have been given Fusogard vaccine for foot rot prior to the sale.

VOLUME DISCOUNT We would like to offer to our past, present and future customers, as a gesture of appreciation to anyone who purchases 3 or more BULLS, a discount of 5% off of their TOTAL INVOICE. Thank you for your support!

EPD EXPLANATION EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPDs incorporate the individual animal with its ancestry performance. EPDs do not compare across cattle breeds. They are individual-based per breed. EPDs indicate a probably variance above or below breed average for that trait for a given bull's progeny. The accuracy of EPDs for calendar year bull calves is generally about 20% (one out of five times) so use it cautiously as one of several selection tools.

His sons continue to impress us year after year with big square hips, heavy dark red hair coats and big ribs. These sons tend to always be the top of their respective pens. Elevation is a bull that has definitely earned his place as a true great!! You will also see as you are going through the catalog a number of bulls who are mothered by Elevation daughters.

Where do we start on Elevation. Let's start from the beginning. From the day I laid eyes on him I know he had the potential to be a great fit for our program. What I didn't know is that he would stamp our program with top end females that one would say are cookie cutter. Great uddered, good milking, perfect coloured and nice temperament are some of the first words that come to mind.

As you walk through the bull pen you see this guy and BOOM, you're in love. This bull is extremely soft made with an impressive barrel, huge top and a huge square hip. His dam is a second calver that we have extremely high expectations for. Not only was she one of the top heifers in her respective year but her full sister was our high selling female in the 2020 Western Harvest Sale who is working at Virginia Ranch for Randy Ward. 910G, Boom's dam, is a big middled cow who showed last year she had what it took by putting her first son in the sale and he is now working for Larry Bartz. A big-time bull with a bigtime pedigree! Note his February 12th Birthday!

Jackpot!!!! This bull has been too good to be true since the moment he stood. He was one I remember showing off as a calf and thinking all summer, please don't let anything happen to this one! When you see him, you are attracted to his big barrel, square hip, dark red colour, heavy hair coat and his overall volume. His dam is a beautiful Magnum female that our daughter Kaidynce selected out of the bred heifer pen in her respective year. The children tend to get the good ones.... Wink wink. 649D, as the cow is known, has raised us several daughters over the years, one of which also has a son in this sale. Actual Weaning Weight August 25 - 968lbs. **Tested Dilutor Free**

Upgrade is a bull who is hard to pass by without catching your eye. His dark red colour and softness draws your attention and then as you get closer his heavy hair coat, gentle nature and overall thickness is hard not to like. Make note of his small birth weight to big weaning weight spread! His dam, 838F, is no stranger to raising high quality calves either with her first offering selling to Blue Zone Livestock in Manitoba. This young female is a picture perfect uddered cow that belongs to our middle son Easton. Upgrade's Grand dam, 464B, was Easton's selection as a bred heifer and she has turned into an outstanding cow. If you retain your own females this would be one to mark high on your list! **Tested Dilutor Free**

If you like dark red and highly productive cattle, I would definitely recommend taking a good look at this guy. Activation is a deep ribbed, big square hipped bull with excellent testicle development. His dam, 5B, is a big bodied female that continuously puts sons and daughters in the keeper pen. To date she has been bred five different ways and each breeding has resulted in a calf worthy of being registered. A full sibling to Activation has sold to XRC Simmentals and we have two sisters that have calved this past January and are looking to be top end cows. One of them is a full sister to Activation and has an impressive Viper bull in this sale. **Tested Dilutor Free**

Another strong Elevation son that has had a special look to him from the very beginning. Insurgance is a good framed bull with large wrap around goggles and a great top line. We purchased his dam, 95G, from Skylark Simmentals knowing the Radium daughters were producers. We have been very impressed with 95G and her ability to milk hard while maintaining body condition. 95G herself is a dark red cow with lots of rib and strong feet. Please make note that this bull likes to stand at the back of the pack. **Tested Dilutor Free**

Dark Cherry Red!!! Here he is! This smooth made, wide topped, double wrap around goggled bull might be the buy of 2023. He is one of the youngest bulls in the pen but you can hardly tell. With a little more time I feel he could develop into a herd leading sire! Stimulate's dam, 75E, has been a very productive female and will be flushed this upcoming spring. 75E was purchased as one of the high Selling females from the 2019 Western Harvest Bred Heifer Sale. We retained her first calf for ourselves, and she calved this spring with an excellent heifer calf. Her second calf sold as one of our high selling bred heifers this fall going to the great Cow Boss Simmentals herd. **Tested Dilutor Free**

Elevate is a bigger framed, dark red, fully pigmented bull with a great heavy hair coat. His pedigree is full of greats, top and bottom, and I could go on for days about each of them. Just ask Harry about his Juni 960J cow and then we can work forward from there. Needless to say, I flushed Elevate's full sister last spring as a first calver. Note I usually only flush older cows.... hint hint. That same sister weaned her first heifer calf off at an outstanding 912lbs. 571C, Elevate's dam, is a highlight female who is a cornerstone female for us. This last fall we sold a maternal sister to Elevate who was one of our high selling bred heifers going to Crossroad Farms in Saskatchewan. Actual Weaning Weight on August 25 - 896lbs. **Tested Dilutor Free**

KOROL MANDY 347M

Revival is so heavily pigmented that he is almost solid coloured. Last year we had a full brother that sold to Morgan Sigurdson and his nephew Wyatt. Like his full brother he is full of meat, has a great hair coat and a solid set of feet. Revival started out at a moderate 76lbs and exploded on his mother's milk to a whooping actual weaning weight of 847lbs by the end of August. I'm not very good at math but his weaning weight is over 10X his birth weight. This is the third time in a row his dam, 865F, has done this and again this year she has a low-birth-weight son at foot. 865F is a hard working cow that was among the very best bred heifers we had in her respective year. She has a perfect udder and her teat size is ideal. As you go through the catalog you will notice that the Dirty Harry daughters are very productive females. **Tested Dilutor Free**

Energizer is a bull with some more frame and exceptional length of spine. He also comes with my favorite hair coat and the darkest red color we can ask for. We purchased Energizer's dam out of the Fleckvieh Equation Bred Heifer Sale where she stood out to us for her exceptional depth, foot structure, color and perfect udder. Last year Energizer had a full brother in the sale selling to many times customer Jason Szymanek. Needless to say, he looks to be following is his big brother's footsteps. Be sure to find this guy down on sale day. Actual weaning weight on August 25 - 902lbs

If you like selling those big heavy calves at the market as much as I do then don't be afraid to add this guy to your list of bulls to take home! Although this guy has some added frame, he still maintains that great muscle shape and depth throughout his mid-section. Swagger's dam, BEE 561C, goes back to the cow BEE Xever 61X. We retained all three of her daughters and they are all big, strong, deep ribbed cows with lots of milk. I would love to see a pen of replacement females sired by this guy! A full brother to this guy sold to Heinz and Sonja Stalder in our 2021 Bull Sale.

Viper has had a major impact on our herd and several others across the country. In the past couple years Viper along with his daughters have created a major impact on the industry creating high sellers in both bull sales and bred female sales. Most notably for us was his grand daughter who sold for an impressive \$41000. Viper was dense made with a massive hip, smooth shoulders and a big belly. He was one of the soundest made, free moving mature bulls you'll ever come across. His eye appeal made him very competitive in the show ring being named reserve Junior and Senior National Champion in his respective years. Here is a chance to acquire a son from a bull that has already left an imprint in the Fleckvieh world.

This Viper son is one that I remember being born. Not only did he have the 'it' factor from the beginning, but his momma was a female that was ranked among the best bred heifers in her group. Resurgence never stopped impressing and has caught the eye of several cattlemen and cattlemen over the last couple months. His ease of fleshing and long heavy hair coat combined with those big goggles makes him easy to spot. His dam has an absolutely perfect udder and small teats which comes as no surprise as both side of her pedigree are known for tremendous udder qualities. Note his 75lbs birth weight which turned into a whooping 856lbs by the end of August! Please note that we registered Resurgence as polled but when we shaved his face, he does have small scurs. **Tested Dilutor Free**

This soft made big topped bull is one that is hard not to follow around in the pen. His big rib cage along with his ease of fleshing make him a standout. The saying big butts, guts and nuts definitely rings true for this guy. That being said, this long spined, good muscled bull is a member of a genetic line that is extremely constant at reducing birth weight. Both his dam and grand dam have done it on several occasions. One would think that these cows were smaller type females but they are actually the opposite. Both Cascade's dam and grand dam are big females with perfect udders and have the uncanny ability to have small calves that grow up into big heavy offspring. This guy is definitely worth a good look. Actual weaning weight on August 25 – 874lbs.

A polled Reputation son who has that extra frame and dark red colour. This added frame has been pushing the scales down and even surprised us a little when the scale read 926lbs at the end of August. Although this shouldn't come as a big surprise as his mother is known for bringing big calves in every year. Sensation will mark the fifth son to make it into the pen which can be a hard task as we only keep less than half of the bull calves born each year. 326A, Sensation's dam, is a big volume cow that puts everything she has into her calves. One of these "calves" is currently a walking herd sire for J - Bar Simmentals and a maternal sister to Sensation has just calved for Waldron Simmentals.

Rum Runner started with a nice 88lbs birth weight and it didn't take him long to start showing off. Every time I look at this bull I think to myself, can he get any longer? This big butted, large testicled bull comes with a very intriguing pedigree. We purchased his dam, 7H, from the good people at Ferme Forbell in Quebec. Her sire is none other than the great PRL Houston. We have always like seeing his name in pedigrees and when we found a direct daughter knew it had to happen. When she arrived home we loved her depth of body, red colour, and absolutely perfect udder. This year she has a beautiful polled Rumble heifer calf at foot. Oh, did I mention this heavy muscled bull is polled? **Tested Dilutor Free**

Combat is a bull we have been very high on since a young age. This heavy muscled, polled, calving ease bull is out of a first calf heifer and our new heifer bull Battle. Not only were we excited as he was one of the first calves to arrive from Battle but we felt his dam, 34H, was a very special polled female. We were so impressed with her overall type and udder quality as well as how she was producing that we decided to flush her. Take note it is very rare that I flush young cows... like almost never. Also, one should take note of Combat's 11.3 CE EPD. If you are in the market for a new calving ease bull, be sure to find this guy. **Tested Dilutor Free**

Speaking of polled cows that we have high expectations for. Dually is a dark red, smooth made, deep bodied son of Battle. He is another bull we were watching closely and haven't been disappointed. To date the Battle offspring are born with extreme ease and have lots of vigour. Both of these characteristics are very important to us, especially on our first calf heifers. Dually's dam, 84H, is a polled Elevation daughter that has an outstanding udder and stems from a long list of outstanding cows. To make a long story short, 84H is a maternal sister to Madge Simmentals proven heifer bull BEE Leon! Make note of this guys 12.5 CE EPD.

Here's something a with a bit of a twist. Don't worry the bull is just fine. His pedigree is just different from our usuals is all. Showdown is actually a bigger framed, long spined, heavily pigmented bull that came in dam from a heifer we purchased from Virginia Ranch. We selected her for her outstanding udder and teats along with her tremendous depth of body. Having a polled head may have played in the decision as well. 049H, Showdown's dam, did an outstanding job on her first calf and we were happy enough to go back and buy a half-sister this fall. **Tested Dilutor Free**

Well, well, well. After some time away, Titanium has made his way back into the loop. When Titanium moved to Quebec a few years back we knew that we would eventually go back to using him. After a couple years of calving out his daughters and AI'ing him to the commercial bred heifers we knew we wanted him back in the rotation. Titanium has always been an easy calving bull hence the reason to use him on bred heifers. Cornwall is a dark red, heavy haired bull whose dam was a first time calving Sawchuck daughter. 31H, Cornwall's dam, is also a dark red female with a picture-perfect udder. Also note that the following bull is a maternal brother to 31H.

We have been using Standout for several years and he's a bull that just never gets old. He continually adds performance to his calves and has the amazing ability to throw that solid colour pattern very consistently. Big Wig, like all his brothers before him, is deep sided and has plenty of thickness. Big Wig's mother's side is also known for their big-time rib shape and overall sogginess. I may have really liked this breeding combination and the proof is that I have bred Big Wig's mother this way more than once. Big Wig's full brother sold in last year's sale and is currently working for Erskine Farming. Actual Weaning weight on August 25 - 856lbs.

Are you looking for a big, soggy, powerful bull? I found him!!! His name is Immortal and he will definitely grab your attention. This dark red Standout son is a bull who hasn't stopped growing since his arrival on January 11, 2021. His mother, 610D, is a heavy milking performance Viking daughter that has yet to disappoint. She has the ability to raise top end calves year after year. Immortal himself pushed the scales down to a whopping 1012lbs on weaning day at the end of August. To say this cross is working is an understatement. Two falls ago, Immortal had an outstanding full sister sell to XRC Simmentals. Last year his high performing full brother sold to Creekside Simmentals and a full sister was born at the beginning of January. Any guesses what I might be breeding 610D to this year? If you like to sell the big ones, I will point you to Immortal. **Tested Dilutor Free**

Tycoon is a bull who has been used with extreme success in several herds throughout North America. As we travelled the country side looking for functional cattle we were continually drawn to the fact that the Tycoon's offspring were always among the top. Whether it be in the bull pen or the heifer pen it was hard not to notice the pure presence these animals possessed. Their added length, frame, dark red colouring and overall eye appeal made it an easy decision to add these genetics to our herd. Rumour has it that the first daughters are proving to have exceptional udders and are producing top end calves. We are looking forward to seeing Tycoon's first daughter come into production here as they are standing out in the replacement heifer pen!

Almighty one!!! Well here he is Almighty himself. This dark red, big footed, bigger framed bull comes with a lot of middle and that ever important stretch of spine. Almighty started at a modest 88lbs at birth and by the end of August his mother's rich milk helped him push the scales down to 875lbs. Speaking of his dam, 677D, who is known for being one of the biggest barrelled red cows on the farm and for having an outstanding udder. She also put a good bred heifer in our 2021 bred heifer offering. Almighty will leave an excellent set of sons and daughters. Don't let this one float away!

Napoleon stems back to the "9X" cow that has definitely left her mark. Check out her Challenger son if you don't believe me. Like his dam and grand dam, Napoleon is extremely dark red and should have the ability to raise those big meaty calves. 853F, Napoleon's dam, is no stranger to raising offspring that make the keeper pens. To date she is 3/3. Her first was a very strong bred heifer last year that has already put a bull in the bull pen. Her second was a bred heifer that went through the Western Harvest Sale this fall selling to the good people at Westerose Stone Simmentals and her third is Napoleon. A bull we feel will have lots of friends come sale day. Actual Weaning weight was 912lbs on August 25. **Tested Homo Polled and Dilutor Free**

Supreme is a dark red bull that really surprised me. He was born a very moderate 77lbs to a moderate framed cow. Needless to say, I kind of wrote him off as not having much of a chance. Well, was I wrong. His dam, 926G, didn't waste any time and it was obvious by pasture time that this guy had a real chance of being in the top 50%. By the end of August, he was better than the top 50% weighing in at an amazing 868lbs. 926G is a moderate framed, dark red Challenger daughter that obviously has the ability to milk. Who doesn't like a curve bender? **Tested Homo Polled and Dilutor Free**

This dark red, big middle Tycoon son was going to be the last of the Tycoon sons I had to offer. Well for this year he will mark the end, but the good news is that I was able to secure 20 more straws of the great Tycoon bull and be assured they will be going into some top end cows this spring. Czar himself is another dark red, big middled bull who has a good top and feet. His dam is a bigger framed Crocket cow that originated from the Skors herd and is a consistent producer bringing in heavy calves every year.

Challenger is a dark red moderate framed bull who we purchased as a high seller from Skors Simmentals. He is a bull that is very clean fronted and that extra length of spine. Challenger is backed on both the top and bottom sides of his pedigree by maternal greatness. His females look outstanding and are basically carbon copies of one another. For the past three years our top red

female has been a Challenger daughter. For the most part they are extremely dark red and are soft made with great temperaments. We are currently just wrapping up calving his second set of daughters and are really happy with both their udders and teat size. His bull calves are typically born smaller and have that little extra style to them. He puts a nice square hip and large barrel into all his offspring.

Again this year, it was really difficult to decide which Challenger bull should start his section in the catalog. Contender won the honour but only by the smallest of margins. This long spined, deep hearted, big barreled, dark red bull comes from one of the broodiest cows on the farm. Like his dam, 594C, Contender is an easy doing bull with an excellent temperament. One should also know that Contender has a full sister working for us and last year her son sold to Torbay Farms and Sande Cattle Co. I remember the day this bull was born as I couldn't believe he wasn't a twin with a 78lbs birth weight but after checking, found out that his sister was the exact same. Luckily, like his sister, he grew like a weed to an outstanding 914lbs by the end of August.

Combatant is another Challenger son that stems from the great "9X", cow who has stood the test of time. This bull was a calf that I have really enjoyed watching develop and has been at the top of the pen from the very start. With his dark red colour combined with his capacity and length, he is hard not to like. His dam, 9X, is a cow that I will have a hard time replacing. She was a big framed female that was dark cherry red and had a perfect udder and feet at 13 years of age. Some interesting facts about her, every calf of hers has ended up in the replacement pen (10/10), she was the dam to Skors herd bull Destruction, she always calves in the first month of calving. Fertility and longevity mixed with maternal power and high-end production... sounds like

something we all need. Combatant has another very good full brother that sold to Torbay Farms and Sande Cattle Co last year. **Tested Homo Polled and Dilutor Free**

Ramses and Finnegan are genetic full siblings and when looking at them they are extremely similar. Both these bulls are extremely long spined, moderate framed, smooth made bulls with nice small skulls. When delivering bulls in Manitoba I went through a pen of bulls and kept looking at a bull with exceptional length of spine and tremendous muscling. With having commercial cattle, I knew how important these two characteristics were when selling animals by the pound. A couple weeks later this long spined bull named Hercules made his way to our farm. One should note that a maternal sister to Finnegan sold to Ag-Land Farms and has already produced an outstanding son for them. As you continue through the comments you will hear me repeatedly mention the impact.

King Tut is a masterpiece. Every time I look at him, I ask myself what more could a guy ask for? Deep sided, yes, long spined, extra yes, big butt, yes, smooth made, yes, good neck extension, yes, big foot, yes, a little chrome, yes, the list goes on and on! If you are looking for a bull that will produce sons who push the scale down and daughters that will do the same, I would take an extra-long look at this guy. King Tut's dam, 24B, is a big bodied, good milking, Fleckvieh cow that raised an outstanding bred heifer that sold in the Western Harvest Sale and is now working for the prestigious Virginia Ranch herd. **Hetero Polled by Parentage and Tested Dilutor Carrier**

The more you analyze these Hercules bulls the more you realize just how functional they are! I know as I have watched these bulls and their excellent sisters develop this past winter. The longer they develop, the more I wish I had used him heavier last spring. One thing for sure he is going to have a busy 2023! Pharoah is another really good Hercules son with lots of middle and that extra length of spine. Hercules does an amazing job of transmitting this to his offspring. We selected his dam, 2A, from the Skors dispersal for her impressive broodiness and ease of fleshing. This cow has daughters working across the western provinces with one in Manitoba, one is Saskatchewan and two in Alberta. Actual Weaning Weight on August 25 – 872Lbs

Dark red, deep bodied, lots of hair, long spined..... yes, these would be some of the ways one could try to explain Gladiator. However, it may be just as simple to say he is just plain outstanding. This easy doing bull has been a bull I have always really liked and had a strong feeling he had the chance to be something special. Part of this comes down to the fact that his mother is a 'Nydam 54X' daughter who like 54X can seem to be bred to almost any bull and produce a sale feature every time. Gladiator is a bull I feel will create a very impressive set of sons that will be very well liked at sale day and a group of daughters that should become very productive females. Braveheart is a bull that just doesn't seem to stop. This dark red, heavy haired, long spined, performance Cliffhanger son is a bull that loves to grow. Along with his big top and large feet Braveheart was able to push the scales down to a whopping 960lbs at the end of August. This is a true testament to the hard work his dam, 720E, who puts everything into her calves year after year. As I sit and write these comments her, daughter, one of our top end red bred females, is thinking about laying down and having her own calf. 720E herself is an extremely consistent producer. She has registered every calf born and has an amazing ability to wean off the heaviest calves year after year.

Crown Royal is a full brother to a couple of bulls who have sold in the last couple years and are currently working for Horizon Ridge Farms and Garth Titford. Like his brothers before him, I have liked this guy from a young age for his smooth lines and great muscling. We have really liked his sire Red Whiskey's ability to add a ton of volume while maintaining length. We have been very impressed with his daughter's milking abilities and believe they will be great cows. This combined with 603D, Crown Royal's dam, should add some great maternal characteristics to your herd. 603D herself is a bigger framed cow that is a heavy milking, good uddered Commotion daughter. The cross between Red Whiskey and 603D has worked extremely well.

This bigger framed, long spined bull marks the beginning of the Lombardi sons. We were in search of a new heifer bull who would calve well but still maintain performance. After doing some searching and with some help from our good friend Cody Haney we were able to locate a good bull at Rendezvous' Bull Sale. Lombardi has done everything we asked of him. He calves extremely well and calves have the frame to grow into good sized animals. McCalfrey is also a direct son to the strong 212A cow. If you follow pedigrees closely you will notice that 212A is the great grandmother of our \$120,000 BEE Alpha 915J that sold last spring.

Double bred calving ease. Owens is a bull I would recommend for the heifer pen. This moderate framed dark dark red, thick haired, smooth made Lombardi son is sure to calve. When this guy arrived with a very small 60lbs birth weight I didn't think he would have the performance to fit into the bull pen. Boy was I wrong, no he wasn't the heaviest bull at weaning but his 754lbs was more than enough to keep him in the game. 22H, Owen's dam, is a blood red moderate framed first calf heifer that did an outstanding job on her first calf. As a side note this guy has a +15.3 CE (top 2% of the breed) and a -2.1 BW (top 1% of the breed) for EPD's. Owen's grand dam, 55D, is a good producing cow that also has a son in this sale.

Here is bit of a twist on a good thing. We bred a really good black Captain Morgan daughter to our new blaze faced Skors High Roller son named Huxley. We were hoping for a black blaze faced calf but got a bit of a surprise when a little red bull calf arrived. Amazon is a moderate framed, good haired bull with a nice little flick of white on his forehead. With this guy's smooth lines, nice 78lbs BW and +11 CE EPD, I would assume he should be an easy calver and a bull I wouldn't be afraid to use on my heifers. 1H, Amazon's dam, is a bigger framed beautifully uddered female with lots of rich milk. She has another good son walking beside her this January.

Approved is this year's lone Approval son. I talked earlier about the strength in the Red Whiskey daughters and the maternal power of the 54X cow family. Well Approved is the result of that combination being crossed to the proven calving ease bull Approval. Approved's dam, 68H, was a first calver last year and did an excellent job bringing Approved in at weaning time weighing an outstanding 864lbs. She has a perfect udder and optimal teat size. Which isn't a surprise as that is the story with all our 54X daughters. A great balance of calving ease and maternal greatness. Be sure to find this guy on sale day. Last year we had an outstanding full genetic sibling that sold to the great Janzen family at Rosemary!

O'Keefe is a bull we were very excited about back in our 2021 Bull Sale. He was going to be our feature Black bull and had several, highly reputable breeders interested in him. At the time we were very disappointed as we were unable to get him to score above a 60% on his semen test. In the vets opinion it was due to cold shock as he had several bent tails. Two days prior to the sale we made the decision to pull him from the sale as we were afraid we weren't going to be able to get a passing test in the future. About five weeks the decision differed bulls were being retested and we thought we would see if he improved. Improved he did, scoring an 88%. At this point the breeders that were interested in him had found their bulls and of course were already well into breeding. We decided that he could run clean up for us and when his calves started arriving in early February it was obvious we needed to use him heavier and even went and collected semen on him. This baldie faced bull has a deep sweeping rib, large square hip, big strong feet and loads of hair. As you will notice he does an outstanding job of transmitting this into his offspring. A little different pedigree that is full of maternal power.

To say this guy had the look from the beginning would be an understatement. He was a calf that would steal your attention within seconds of walking into a pen. Still today as you tour the bull pens in doesn't take people long to point and ask me "who is he". Scorpion is a blood red, chromed up, deep mid sectioned bull who comes in a heavily muscled moderate package. 759E, Scorpion's dam, is a broody, big bodied female who is a direct daughter of our Skors Dancer donor cow. With the combination of O'Keefe and Missile expect this guy to sire soft made, deep bodied attractive offspring. Make note that Scorpion is a beginning of February born and stands in easy with the January born bulls. A very good bull with an outcross pedigree for the red factors. Take a good look here.

A bigger framed O'Keefe son with all the goods. Lots of hair, good bone, nice muscling, long spined, big nuts and yet still smooth made. The children all thought I should name this guy Nike as he has a check mark of white on his forehead. I liked the name Gulliver and I am the boss... Who are we trying to trick, we all know Michelle is the real boss!!! Speaking of females, 901G, Gulliver's dam is a big bodied, heavy milking Skors High Roller daughter that was a member of a choice lot at Western Harvest back in 2021. It was a coin flip on which heifer I would be bringing back home. Her full sister sold to Blazin J and has already been added to their donor pen.

I just can't express in writing how impressed we are with O'Keefe. Here is another prime example of the impact he is creating. Cormac has that herd bull look to him. Big barrelled, good haired, wide topped and long spined with that easy doing look. Cormac's dam, 189D, is a big bodied, strong uddered cow that also has an extremely heavy hair coat. She is a direct daughter to the cow maker Enticer 4W who really showed his ability in the Skors dispersal sale. I found it very interesting that the most productive cows were all Enticer daughters. If your after cow power and want to raise a strong set of females Commander's pedigree definitely leans towards that outcome. A maternal brother to Cormac sold to our good neighbors, The Butcher's, in last years sale. **Tested Homo Polled PENDING and Homo Black PENDING**

year later Skyline Simmentals selected him to be their main herd sire and he sold as our high selling black bull. We knew we wanted a piece of him so after the sale we inquired on buying back a semen package. I promise Amanda that I would not over use him for a couple years and give her a chance to sell some progeny first. I have stuck to this promise and I can promise you one thing. This spring marks year three and I will be using him heavily within our program. Beast sires' calves with added frame, length, muscling and depth. Both his female and male calves are among the top of the replacement pens. Oh and his dam, 241Z, is officially in the donor pen with embryos frozen in the tank!! Be sure to check out Skyline's awesome Beast calves in their section of this sale!!

It is extremely rare that I keep twins intact. When I do, you should pay extra attention as they have to be something extra special. Behemoth is a very balanced bull with a huge top, monster hip, soft sides and tremendous feet. Like I said, I usually would steer this guy but being a son of 197E I couldn't bring myself to do it. Behemoth's dam, IPU 197E, is a blaze faced cow who has already built an impressive resume. In the fall of 2020, her daughters were a choice lot at the Western Harvest Bred Heifer Sale and they were very well received with the choice heifer selling for \$14,000 and going to Blazin J Inc. The heifer we brought back home has a very good O'Keefe son in the sale. I should also mention that 197E and Connected are both blaze faced which should make this guy's blaze a little more predominant. **Tested Homo Polled and Hetero Black**

A combination of maternal strengths, length of spine, depth of body, blaze face, hair, ease of movement and more! Carabineer is a bull that I have really liked since the start. It definitely helps that his dam, 71Z, is cow that we have bred several ways and has the ability to just make it work. This deep bodied perfect uddered cow has been flushed a few times and her daughters are following in her footsteps. To date she has put 4 females in the replacement heifer pen, three which have stayed home and one working at Double Bar D. On the bull side she has had 7 sons already walk through the bull sale with Carabineer being number eight. Unfortunately 71Z was injured during last years breeding season and tried her best to raise this guy. This will be the last of her sons to grace the sales ring as she had a difficult time getting around over summer and we knew it wasn't fair to her to try and keep her through the winter. Highly proven genetics on both sides of the pedigree. **Tested Homo Polled and Homo Black**

Do you like big butts...? Well, I do and this bull is one that has had a massive hip in him from the beginning. The muscle expression and overall width makes it impossible not to stare at! I went on a quick tour at Perkin Land and Cattle and after seeing Captain Blaze and his sheer depth combined with his huge bubble butt, I knew I wanted some to breed my cows to. I had a Skors cow, 87A, that would cross extremely well with and bred her this way back in 2020. That breeding turned into an outstanding heifer that spent her summer in what we call our show pasture and is now one of our top if not the top black bred heifer. We liked her so much we bred 87A back the same way. Emmet is the result of that breeding and man how can't you like this guy. 87A is another great Skors cow that has the ability to raise those heavy calves. She is a bigger framed cow who is full of milk. If you like muscle, shape and performance this might be a perfect match!!! Actual Weaning Weight on August 25 - 850lbs. **Tested Homo Polled and Hetero Black**

Like I said in the previous comment, it is so hard moving on from something that works so well. Sherlock is a clean fronted, long spined, bigger framed bull who comes with a nice small skull. Like the other Skors High Roller son in the previous lot this guy comes with an excellent set of EPD's. 25H, Sherlock's dam, is a big framed, beautiful uddered, big ribbed young cow that looks to be very promising with another good January born calf this year. Sherlock started at a small 75lbs and did very well on his first-time momma, coming in at 802lbs at the end of August. This is a bull I wouldn't be afraid to use in my heifer pen. **Tested Homo Polled and Hetero Black**

Welcome to the 2023 edition of the bull and female sale. Last fall's calf run saw great prices and as I write this the prices for calves selling at auction marts continue to climb. With the 3 year La Nina beginning to weaken and the prospects of a new weather pattern with more precipitation coming, there are lots of reasons to have optimism in the cow/calf sector. 2022 was a banner year for us with the addition of our daughter Kennedy last January followed by fantastic bull and female sales. We'd like to thank everyone for their support of our program. We started Beechinor Land & Livestock with an emphasis on cow families with strong maternal and economically important traits. You'll see this as a common theme in the footnotes of the bulls. Sires are chosen for their ability to sire useful offspring both male and female. Once again the Jan/Feb born bulls have wintered at Beechinor Bros on a TMR and the 3 October born bulls have been pail fed pellets to manage intake and had free choice 1st cut grass hay. A nice set of registered open heifers join the bulls in the sale. These heifers have been slowly developed and have had pre breeding vaccinations to be ready to join your herd for breeding season. We invite everyone to the Beechinor Bros sale building on February 27th and would love to answer any questions or tour you through the pens beforehand.

Stefon, Rebecca, Tyce & Kennedy

Our lone black offering and he is a tank. He's a rugged dude with a good amount of bone, a pile of meat, deep body and lots of hair. His dam is the definition of a brood cow with a deep sweeping ribcage, extra muscle and has a great set of feet and excellent udder. Rainy Creek Ranch bought a daughter and we've also retained a high producing female from her. Washingtons maternal brother led the entire 110 head pen last year in weight but unfortunately injured himself the day prior to the sale. These Roosevelt cattle have lots of growth and Washington is unique being a black son of his.

Brass is one of the youngest bulls in the sale, with one of the smaller birth weights. Normally not a combination to have a chance to make a bull sale and sell before you turn 1 but that hasn't stopped this half fleck/ half red factor bull. His dam was our favourite red female in her respective year and she did a bang up job on Brass. She is a transplant daughter of one of our top flush cows Pocahontas 61C, dam of lot 99, lot 120 and the ever popular Red Mountain. 14H is a correct made female with a nice udder and lots of milk. By combining red and fleck genetics you get the best of both worlds and a cross that only Simmental can provide. Owned with Red Top Livestock. Hetero Polled Dilutor Free

Reddington was the most talked about red bull of 2021 and commanded an impressive 160000. Red Top was a contending bidder and was fortunate to secure an exclusive semen pack. We bred him to our excellent producing Pocahontas 61C and were rewarded with this smooth made big, stretchy, dark red herd bull with nice muscle expression. He started off with a nice low birth weight and then started cranking it up, a combination that is hard to obtain. Clinton is the type that can produce those valuable heavy weight calves in the fall. His pedigree contains many great cows so the daughters will be ones to retain. Owned with Red Top. **Homo Polled Dilutor Free**

Enterprise is a true feature. Right from an early age he exploded with growth and hasn't slowed down. Weaning off just shy of 1100 lbs and posting a 1550 lb weight at 11.5 months, he's certainly been impressive to watch develop into an attention grabbing stud. Even with his immense size he maintains a sound structure. He really ties together what we're trying to produce on our red side. A bull with about as much length of body as you will find, outstanding muscle shape, and good frame size. He carries a large set of testicles and is very docile. His Revolution sired dam is a cow that continually gets brought up when we're discussing cows that should be in donor program. She raises the heaviest

Anchor D Blair 191B has been one of most consistent producers of top end prospects on the farm. Previously she produced Ducati for Parview/Virgina, two daughters in Starwests herd and another in Richlans. Then after two Sugar Ray daughters, one of which was retained with hopes of a future donor and the other recently selling for \$40000 to Faulkner Farms in Arkansas out of Equation, we were excited to team up with JNR to breed Blair to Baldwin. Baldwin was a previous high seller of JNR who is proving to be a big time herd bull for them and Wolfes, and you'll also see proof of that with Bedrock. With lots of muscling, depth and a herd bull look he led the group in performance at weaning and really hasn't slowed down. Actual August 28 WW of 1005 lbs **Dilutor Free**

Unique would be a good word to describe this guy. The impression Great Guns Wyatt made in person was so significant as a young bull more than 10 years ago on a trip to Texas, we jumped on the opportunity to purchase some semen when it presented itself. I expectantly bred him to a couple special cows the first year and was pretty excited when this cherry red, heavily pigmented, hairy, thick, polled bull calf was born. Tombstone is a bull that combines a couple special cows in Kandy 1K and Unbelievable 1U, he has a blend of calving ease and power with a pedigree thats a little different than what you'll see in a lot of polled cattle today. His young dam is one of our favourites with sons working at Knights at Tees and Buits at Bentley. Her daughter was extremely popular in this past fall in Equation selling for \$21000 to Clearwater. A full brother to Tombstone already grabs your attention at Hendies side this year with a nice birth weight and similar traits. **Dilutor Free**

Bert's grand dam one was of our original purchases coming from the great Stulberg cow herd. Big Bertha was a foundation cow for them raising top end commercial and breeder bulls year after year and we were fortunate to put some embryos in the tank even as she hit her twilight years of 18. Even at that age she was a massive cow with tremendous feet. Bert shows her stature being a large, long spined bull, off a first calver. Once again the combination of some calving ease and growth. He will be one to consider to produce big statured steers and strong replacements with high maternal ability.

A power bull with the added advantage of being homozygous polled this bull has an abundance of muscling with an extremely wide top, big butt and likely one of the longest bodied bulls in the sale. His angus cross recip dam was bought in the fall just prior to calving carrying a little extra flesh and then proceeded to go a little over gestation as embryos sometimes can. Combined with his extra length of body, this resulted in a little larger birthweight in a simple, unassisted calving. His pedigree is something different from what we've offered before and carries some very strong genetics on both sire and dams side. You won't find this level of growth and size in many polled

Linne is a good honest female that is built for the long haul with longevity bred in through the great Dora Lee program. Her grand dam Dora Lee Celine was raising top end calves up to 14 years old. And on the Electric Avenue side we acquired his strong uddered and great footed grand dam Dora Lee's Duchess in her twilight years but unfortunately had a set of tangled twins that required a C section at 13 years old that was her demise. Linne's dam, 74E, has become a favourite around here with her calm demeanour and great look. She has already had a high selling female through Pasture Treasures, selling to Anchor D.

Hetero Polled If you like calves that come out easy and wean off heavy, look no further. Kryptonite was a bull I always made sure to look at when going through the bull calf pasture. Every time I saw this calf he was more impressive. Being out of a first calver I did not place high expectations on him but wow! He was one of the heaviest calves to wean off in August. He is very smooth shouldered, long spined and deep sided. Our walking heifer bull Edge, who we still have and will use in the 2023 breeding season again at 7 years of age, has been one of the most reliable bulls we have had. He calves extremely well on our heifers year after year. Kryptonite's dam, Honey, is a granddaughter out of the well known Chanzie cow, which makes sense as to why she did such an amazing job on her first calf! She is a solid footed cow with a great udder and disposition! Kryptonite is sure to impress wherever he ends up!

TERMS & CONDITIONS

TERMS The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

BID No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

SALES TAXES Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

DISPUTES In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INSURANCE Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

US BUYERS There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

CATTLE PICTURES AND INFORMATION PROVIDED The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

ANNOUNCEMENTS All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY A registration/recordation certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

SHIPPING Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

BREEDERS GUARANTEE As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price.

EXCEPTION TO GUARANTEE In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

EMBRYO & SEMEN Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

ACCIDENTS Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

TRANSCON LIVESTOCK CORP. IS AGENT ONLY It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.
