

6TH ANNUAL

JNR FARMS

BULL & FEMALE SALE

Saturday, February 10, 2024

4:00 PM MST | AT THE FARM

Welcome to our 6th Annual Bull and Female Sale!

Welcome to our 6th annual JNR Farms Bull & Female Sale. We would like to of course thank all of our new and repeat customers for allowing us to keep doing what we love, producing seed stock that is sustainable and profitable. The Cattle industry has and always will be the grass roots of our farming operation. As many know with us being 1st generation on our farm throughout the years we have diversified adding a few different custom Ag related entities aside from grain farming. Today we still Custom Spray and Silage, Regan does some custom bale hauling, and 5 years ago we decided to build a smokehouse which we custom process a variety of meat products as well as retail meat sales off the farm. With several "irons in the fire" we could not do what we do without the help our children Regan (Kate) and Rayanna (Konnor). Regan has started his own Welding company as a Structural and B Pressure Welder. Rayanna is in University working towards her Business Degree and working part time in the HR department at Freson Bros. We appreciate the help and time that they all offer and continue to be a part of the family farm.

We will continue to do butterfat testing in the upcoming years to compile results based on cow families. Our offering this year has an exciting variety of higher performance bulls including some intriguing embryo calves, to several calving ease prospects out of 2 new completely outcross pedigrees to our program. This year is our highest percentage of polled offered because both of our heifer bulls used were homo polled. Coming off a tremendous fall for cattle prices there is a lot of optimism in the industry.

This year our largest sire group is out of JNR Proxy, this is the first set of bull calves off him. Proxy is a polled power bull that is extremely impressive to look at. As in the past we offer the predictability of some of our proven sires like JNR Baldwin who knocked it out of the park his first calf crop with an outstanding group last year, as well as JNR Cashmere and JNR Cortez to list a few. This is also the first calf crop for Junior Herd sires BLL Foreman, KSL HonkyTonk and JNR Quest. With a large variation in sires we are proud of the consistency and predicability of our cow herd in producing a uniform bull pen none the less.

Our females offered are developed the same as our own replacements, they have been fed to make good honest cows with longevity kept in mind. These heifers represent both a variety of sire groups and proven cow families from our herd. There is also a number of heifers in the offering out of sires we have never sold publicly which allows the purchaser to have some different pedigrees than what they can get anywhere else.

We welcome everyone prior to sale day to come by and view or discuss our offering and tour the cow herd. We hope you can join us Feb 10th, and plan to stay for some post sale JNR hospitality and socializing.

Sincerely,
Jerry, Nicole, Regan & Rayanna Repka

**Please join us for pre-sale beverages and
a post-sale supper!**

It's a pleasure to welcome you to the 6th Annual JNR Farms Bull and Female Sale. Join us for a late Saturday afternoon sale followed by some of the greatest hospitality available all sale season.

JNR Farms cowherd is one of the strongest 100% Fleckvieh herds in the Nation. The detail that goes into the genetic makeup in the herd is second to none, so rest assured this is the ultimate place to source your next herdsire. Attention to detail happens daily at JNR, whether Jerry, Nicole and Regan are custom silaging/spraying, raising great cattle or preparing some of the best jerky sticks on the planet, you can count on it being completed with 100% effort.

Last year's high seller created quite a stir in the industry, selling for \$165,000! JNR Barbarian was purchased by LaBette Simmentals, Circle 7 & and Wolfe Farms. They are thrilled with this amazing JNR Baldwin son, an amazing individual so pay close attention to his half siblings this year!

Shortly after Christmas, I ventured out for my annual bull tour. I was excited to see another very strong set of bulls including definite breeder prospects. This is a good haired and strong topped set of beef bulls with almost 50% being polled with a couple special homo polled bulls in the bunch. The calving ease bulls will really grab your attention this year.

If you are in search of an outstanding Fleck bull, I think a trip out to JNR is a must! There is a bull for everyone in this group. Don't let last year's average make you think you can't afford a bull here, as 50% of last year bulls sold in the \$5,000-\$8000 range. There is always great value at this early sale. Take advantage of the great weather and get a look before the sale. I will be out for another look in late January so feel free to give me a shout as well.

Hope to see you Saturday and don't forget that it's a late afternoon sale followed by an amazing prime rib dinner! This is a highlight meal of sale season, and I love the fact that Jerry smokes the meat and slices it right onto your plate. The Repka's are great hosts and would love to see you sale day!

If you are unable to attend in person, feel free to give any of the Transcon team a call! The sale can also be viewed on Transcon Online.

For the Repka's,
Glenn Norton

Auctioneer: Ward Cutler
Ringmen: Darren Paget and Robert Lind

Sale Day Phones:

Jerry Repka	(780) 210-2333
Nicole Repka	(780) 656-5701
Regan Repka	(780) 656-8265
Jay Good	(403) 556-5563
Glenn Norton	(780) 542-0634
Darren Paget	(403) 323-3985
Cody Coupland	(403) 877-0799

Delivery: Free delivery on all purchases within the Prairie Provinces. JNR Farms will absorb the first \$500 of trucking costs on any purchases to British Columbia, Eastern Canada and the United States. Delivery of bulls will be approx April 1st, any bulls staying longer please make arrangements with us prior.

Videos: View at www.transconlivestock.com

Accommodations:

Vegreville Suites	(780) 632-2094
Super 8 Smoky Lake	(780) 656-3515
Hampton Inn Fort Sask	(780) 997-1001

Invoicing: Invoices will be sent only to the email address provided. Please advise if not received within 3 days of the sale please phone (403) 638- 9377

Transcon's Absentee Buyer Representation:

The Transcon Team is available to anyone that cannot personally attend to confidentially appraise, bid and buy on your behalf. This service is conflict-free as we are not paid any buying incentive fees by thesellers and we are not active Simmental breeders. This service is also provided free of charge to all prospective buyers. Please call our cell phones for any assistance you may require.

Prosper's dam is a maternal sister to JNR Baldwin, the Tajsa cow line has been a strong one with both females and bulls here for us. JNR Tajsa 712D is also the grand dam to Lot #15 and definitely a sleeper within the herd that has come through again with another great bull calf. Her 2022 sale feature sold to Ash Berwest Farms. Prosper has been a group favourite picked out by every visitor that has toured and has been a standout since birth. His shape, muscling and fluent walk is sure to catch your eye. JNR PROXY is making his debut with this calf crop and we are very excited with both his heifers and bulls. Prosper was in the top 3 of the bull calf crop for weaning weight and average daily gain with an actual weaning weight of 1041 with no summer creep feed. Step into this herd sire prospect backed by proven cow families here on both the top with Shamu, Pam and 1N cows and on the bottom side of his pedigree with the Tajsa line.

JNR Sienna 748E is a full sister to Lot #41's dam and the same cow family as lot #48. This cow also ranked in the top 5 this milking season for butterfat in our spring testing. Pursuit is an attractive looking bull with an average daily gain of 3.6 he ranked in the top 10 of his group. Check out his pedigree stacked with herd builders throughout! A powerful polled bull with endless potential. We currently have 16 females within our herd from the old CVX 127K cow.

This strapping polled bull calf of Rayanna's is one to take a good look at. The friendliest calf in the pen by far, Premier had a rough go and was orphaned at just over a month old. We paired him up with a heifer calf on a nurse cow and regardless he was an impressive calf throughout the summer. His dam JNR's Anna Martina had been an extremely productive no miss cow, fortunately for both Rayanna and us we each have a female retained in herd. Her daughter JNR Martina 926G has a standout bull calf Lot #38. Last years bull sold to Chris Bartel.

Phoenix is likely the soggiest guy of the group. He is super soft sided, deep middled and smooth made. His dam is a full sib to JNR SNIPER and this calf has always strongly resembled the look of JNR SNIPER. The JNR PROXY calves have a little extra muscle expression and softness. Phoenix comes from the Malita cow family. With in our herd 11 females calved out last calving season of which 10 calves either made the bull pen or replacement pen. You'll find 5 different mating's resulting in Lots #20, 23, 36 and 45 all of them having great potential.

When you talk about building off cow families this guy brings some JNR foundation together on both top and bottom side, with the twist of Ridges Damon. Going back to great matrons such as MFI 19L and JNR 403N this bull screams female maker that should add a little frame to his progeny. His dam Petra 742E is also the grand dam of lot #59. The Petra cow line can be found in 5 bull lots and 2 heifer lots as well as, 14 females currently in herd and 1 of which is currently in our donor lineup.

There is a saying I use when referring to this cow, If we had 100 cows like JNR Martina 560C that's all we would need. She is my ideal Fleckvieh cow, super footed, massive barrelled, huge pelvis, and clean fronted with the perfect skull. This cow speaks volumes for what this bull will do in his breeding career. The Martina Cow line also found in lot #3 & 38 is consistent, predictable and highly productive. We are so confident in this line we have a junior herd sire JNR HIGHLIGHT out of JNR Martina 560C with his first calves now hitting the ground that will make an impact in our future sales. Sarge has huge herd sire potential!

JNR Petra 819E (also a full sib to Lot #6 dam) is the combination of the powerful MFI 19L cow and calving ease JNR TITANIUM. Boom carries a pedigree cross of outstanding old and new genetics that programs can and have been built around. Boom has amazing softness with a great square hip and brings a bit more size through his genetic makeup. Boom is the first son offered out of JNR BERETTA who is a 3/4 brother to last years \$165,000 high seller JNR BARBARIAN. Last years bull sold to Beau and Kelly Richardson in Manitoba.

Another great bull calf from the Hanna Cow line like lot #14 & 24. JNR Hanna 991G is an impressive young cow who has put all 3 calves into the sale so far and has a very promising bull calf at side right now. Last years heifer sold to the good folks at Dobbie Simmentals. Burris will be a day shy of a year old sale day and the second youngest bull in the offering, but stands up against the earlier bulls no problem.

JNR Miss Knight is a 6yr old moderate framed blaze face cow that is stepping up and proving that the BAM-BAM x JNR STEELE combination just works. She has a flawless udder with beautiful little teats, a female we hope to retain more females out of in the future. This JNR CORTEZ bull calf is sure to catch your eye as with his paternal pen mates they pack a bit more size and bone. We retained her heifer calf last year and in our 2021 sale our friends from the Scottford Colony took a son home. Settle in with Cadillac and enjoy the ride!!

Yet another home run cranked out by BBBG Francesca 301C. We purchased this female from our friends from the BBBG group as a bred heifer and she has never missed. Her offspring are in the top of the pen every year whether a bull or heifer and she has been mated differently every time. There is no surprise this calf has turned out the way he is, both top and bottom side of his pedigree is filled with a solid production history, Cinch isn't by chance. He ranked in the top 6 for weaning weight with an actual weaning weight of 1061 lbs!

Smooth Polled

This is an interesting combination genetically with JNR CASHMERE on a Great Guns Willy Joe female whose bulls have been in the top end of the pen every time. A moderate very correct made female that screams maternal, phenotypically. Conquest's dam was my pick of the horned females in her birth year so combining her strengths and consistency with a homo polled bull made sense to us. Here is a calf with all the bells and whistles, deep cherry red, length, hair, pigment, and a smooth polled head.

HEYWOOD ENSIGN
SIRE OF LOTS 27 and 28

Cow families.... we can't emphasize enough how we have built our entire program around just a handful of cow families through both their daughters and sons. These two bulls are a true example representing the 1N cow which you will find not only in Lot #27-35 (out of 3 generations of donor cows) but that 35 out of the 61 sale calves offered this year go back somewhere in their pedigree to REGJ Mystic 1N a true foundation cow in our herd and the cornerstone to our JNR Graceful cow line. Sired by Heywood Ensign himself born in 1975, we have watched carefully over the past 25 years and waited for the right time to use him on a cow we felt would compliment him. They may not be the desired cherry red but damn what a way to open up the gene pool again with polled in the mix as well....soggy, hairy and established proven pedigree.

SIRE OF LOTS 30 AND 31

Lot 30 and 31 are Diluter Free.

To say the least, we were excited on ultrasound day to find out we had 4 pregnancies out of this mating from our homo polled powerhouse cow JNR Graceful 141Y. We ended up with 2 bull calves and 2 heifer calves. CB 2 has been a bull we have loved for years, his daughters are a bit larger and have the most feminine smooth heads with huge muzzles, which is something we strive to maintain in our selection process of our herd bulls. If you're looking for foundation genetics in a modern polled package DO NOT overlook these 2 bulls! With 787 calves registered to CB 2 aside from the 4 full sib embryos we had born in 2023 there isn't more than a handful of direct progeny in production today and none of which are polled so this truly is a rare opportunity.

A rarity here is to find a calf that doesn't carry the JNR prefix on either the top or bottom side of the pedigree. Flint is a maternal brother to our JNR SNIPER bull that we used for 6 years which has left us phenomenal daughters to build upon. Flint's Sire BLL Foreman is the "newbie" on the block and his first calves are really impressing us with both bulls and heifers. This calf packs a bit more jam for performance with the bonus of being polled.

The performance and development of this calf that will not quite be a year old come sale day is admirable to say the least. For our first calf crop with BLL Foreman we are very pleased and are looking forward to continuing to use him strategically as we move forward adding an outcross polled line within our herd.

JNR's Hellina at 14 years old did a fine job with this calf. A cow that at that age still had a picture-perfect udder with suspension like a second calving female. Unfortunately, this was her last calf as she came up open. If you're looking for longevity, maternal strength and polled Freeman is the bull for you!

Here is the REAL Macoy!! You can expect performance out of this calf no doubt, both sides of his pedigree read power and performance. Sienna 762E is the full embryo sib to Lot #2's dam, they are from a larger framed line. GGT Mac is a bull we pull out of the tank on occasion and are never disappointed in his calves. Last year's bull was a pen favourite selling to Waland Farms.

We have used Haxent to keep high milk values and udder structure in the herd. Petra 522B had the highest butterfat last year, and we feel crossing with a bull known for great udder attachment and milk quality would have been a huge asset if we got a female. Haxman should pass down these traits to his daughters who in turn should raise some outstanding calves. Petra 522's bull calf last year sold to Scotford Colony.

Quantum is a pretty special calf, his dam is a moderate framed young cow that has the tidiest of udders you could find. Last year her first calf, a calving ease bull sold to good friends Tom & Terri Jamieson (Commercial heifer consigners) which they used him on heifers, they are calving them out now with no issues. Quantum is built to calve yet has a ton of shape, solid top line, extreme length and good muscle expression in his hind quarter and is very fluent in his stride. From our Graceful cow line found throughout this catalog combined with the Ellen line!! We would be interested in buying back a semen pack or an interest in this bull to use in our heifer pen if the successful bidder would be interested.

One of the most interesting things about our breed is the variety in colour and markings, this cow family is very dominant on solid red. Harrison is the 4th generation of solid red on the bottom side. Harrison's great grand dam JNR's sue has produced highly productive cows in our herd and at 15 years old is still impressive to look at with a massive black foot, lots of hair, and very feminine with a beautiful udder which she has passed down to her daughters. She will be having her 12th calf for us this year.

JNR PETRA 522B

Liberty and her dam were a pair that caught our eye every pasture visit, although on one of the poorer pastures that was a dust bowl for most of the season they both came home looking fantastic. Liberty's grand dam is also the dam to lot #5 and again from the Petra cow line like lot #58. JNR ARMOR's daughters have tidy udders, good hair coat and we are very happy with their production. Liberty's dam is an absolute tank of a young cow.

A full sib embryo to lot #29. When we plan our flush matings we always have herd building females in mind to expand on influential cow families. This direct Antonius may not be the biggest heifer we are offering but she will no doubt mature into an extremely strong producing cow coming backed by 3 generations of donor cow.

JNR'S GRACEFUL

Kamika is a bit special to me personally as her dam JNR Graceful 613C is in my top 5 of our entire herd, and also a full sib to JNR Sterling that sold to Jayshaw Simmentals & Joe Holt in our 2020 sale which has done an extremely good job for them. We shouldn't be parting with this girl but with 53 replacements in our keeper pen 6 of which are from this cow family we figured this would be the year to let some leave the pen.

Additional Sale Information & Fullblood Heifer Breeding Options

- All Fullblood and Commercial heifers will be palpated prior to sale day.
- We offer to breed any full blood heifers sold in our sale to our walking heifer bulls. To be exposed Mar 20-May 10, 2024, ultrasounded the end of May at no cost to the buyer for feed or breeding. Bred heifers will have to be picked up by the purchaser the first week of June if this option is taken.
- All bulls will be Dilutor tested and available upon request.
- Insurance will be available sale day. If any animals are not insured the buyer assumes any and all risk.
- Weather permitting all bulls will be semen tested prior to sale day.
- The sale will be conducted under the standard Transcon Livestock Corp. Terms & Conditions. Copies will be available at the settlement desk.
- Transcon Online: View & Bid online at www.transconlivestock.com

Commercial Heifers consigned by Tom & Terri Jamieson

Phone - 780-206-7557

Welcome to the 6th annual JNR bull and female sale and our 4th year bringing replacement heifers. We would like to thank Jerry, Nicole and family for having us part of their sale and for coming out to pick another group of heifers this year. Not only are these heifers sired by JNR bulls but most are sired both on the top and bottom side. They have developed into great cows all the way back to our first JNR Salton and Willy Joe sons which we purchased back in 2012 and 2013. This year we are bringing another group of quiet family raised heifers. There is a selection of red and blacks. The reds have always been consistent replacements on our herd. The JNR sired black calves have shown great performance at wean time and the females provide excellent maternal strength. A big thank you to our kids Mason, Ivy and Claire who are a huge part of our farm and are a big reason why the heifer pen is so quiet.

Ivy, Mason and Claire
