25th

ANNIVERSARY

SELLING FLECKVIEH BULLS

50+ BULLS & OPEN HEIFERS | PICK OF THE HERD FLUSH | ELITE SEMEN LOTS

Welcome to our 7th Annual Bull and Female Sale!

WOW... 25 years of selling bulls!! Crazy to think of how quickly it has flown by. There are a couple of things that have remained the same over the years. First off is the appreciation for the many relationships and friendships we have built within this great cattle industry. Secondly is our vision of what we want out of our cow herd and the connection with the commercial market to help optimize profitability in our bull buyers bottom line through the use of JNR genetics.

We are in an era of great times in the cattle industry with record setting prices and the quality of cattle produced just keeps improving as the years pass. I've said for the past few years that the people that are in the cattle industry today are in it for the love of cattle and are extremely serious about the business. The past 3 years the heavier more performance oriented calves/heavyweights are fetching a premium. The extra investment it may take to own that "special one" you've selected with more performance will reap the benefits with return on that investment.

We have decided to add two momentous lots for this milestone in our bull sale career. Two semen lots will be offered on choice on bulls that have helped mold our cow herd. MFI Bam Bam and JNR Boulder are the only 2 bulls we have drawn qualified semen on in the past 15 years. The second unique offering for this occasion is a pick of the entire JNR solely owned cow herd to flush. We have never opened our herd for anyone to walk in and buy or flush anything from our our herd. We have maintained the philosophy that we will not sell the future of our cow herd for short term financial benefit and there fore once females were on the list to stay in herd that's where they stayed exclusively.

There are so many to thank over the past 25 years in this great business. First I'd like to thank Nicole for walking beside me and being the backbone to help execute and make this dream a reality. I can't thank her enough for the endless hours she spends keeping all this together whether it be doing all the paperwork or sitting in the swather or combine during harvest among all the irons we have in the fire. Our kids, Regan who takes off a lot of time from welding to help with feeding, running air drill in the spring, packing silage, all the clipping of the sale animals and the list goes on. It means the world to us to have him helping. Rayanna for fitting us into her University and work life to help with videos and picturing along with the "big" cattle days throughout the year and running many of our city errands. As well of course both Kate and Konnor for all their help throughout the year along side Regan and Rayanna.

Some very important people along the way include Art, Jean and Doug McDermand for the chance of a lifetime when they put their trust into Nicole and I at a young age with the private purchase of their cow herd 25 years ago, coming to an agreement over Mrs. McDermands peach and cherry pie.

Thank you to everyone at Transcon Livestock for being beside us every step of our journey in getting here. Glen especially for his tours and pasture talks and patient persistence to sell bulls publicly after just selling 1 or 2 of the "special ones" at Equation for a few years he insisted we could get better value for our top 4-6 bulls at the Red Deer Bull sale starting in 2016. After getting comfortable with that Glen was subtly adamant that we had the quality and numbers to "do our own thing" where we could showcase our entire pen that we had previously been selling privately up to 2019.

Thank you to the whole Jamieson Family for supplying the commercial heifers again this year. The group as a whole is very strong and quiet as can be. Feel free to talk to any one of the family Tom, Terri, Mason, Ivy or Claire about any of the heifers as they all are actively involved. A truly inclusively family run farm.

There are many more to thank and we appreciate everyone including our valued, loyal friends and customers for trusting in our program to help with your success. Once again Thank you!!

Sincerely,
Jerry, Nicole, Regan & Rayanna Repka
JNR Farms | RR1 | Willingdon, AB

**Please join us for pre-sale beverages
and a post-sale supper!**

It is with great anticipation that I welcome you to the 7th Annual JNR Farms Bull and Female sale and the Repka's 25th Anniversary of selling Fleckvieh bulls. They have offered two feature lots this year that you don't want to miss. If you haven't attended in the past, prepare yourself to see a set of powerful Fleckvieh bulls along with unmatched hospitality from the Repka's!

In my mind the JNR cowherd is one that needs to be seen in the summer grazing months to truly be appreciated. In my summer travels this is consistently one of the most impressive tours. The mother cows are not pampered in small pastures. They are required to cover large pastures with an abundance of bush and are expected to successfully bring in a big calf. No creep feed is provided so you can truly appreciate what the JNR cow and calf can produce on grass and milk.

Countless hours of planning go into the genetic matings at JNR, strategically blending polled and horned genetics while maintaining the 100% Fleckvieh status. Attention to detail is second to none at JNR Farms, so expect these genetics to push your program to the forefront of the cattle industry. Many great cattle in the business carry the JNR prefix, this is your opportunity to dig in and own one for your program.

This year's bull pen has a wide variety of polled and horned herd sire prospects with some great sire groups. JNR Barbarian sons (6 of them) are a very heavy muscled, soft made group with a couple of powerhouse polled bulls in the group. Barbarian was the high selling phenom from the 2023 bull sale! Parallel to the Barbarian sons, you will find a great selection in each sire group of great colored bulls with awesome hair coats, and a ton of muscle shape to them. This pen of bulls has something for everyone. From powerhouse cow bulls to polled heifer bull prospects that should create a ton of interest! The depth of quality in this pen of bulls is exceptional. It will be very easy to build a list of elite bulls that fit anyone's needs.

Lot 56 is a very exciting opportunity to secure a semen package on Bam Bam or Boulder. Semen on these herd sires is rarely made available. This is a chance to put your next flush into elite status.

As a sale feature, Jerry and Nicole have opened the herd for a Pick of the Herd Flush. The maternal power that is available is truly remarkable! Note, the outstanding cow pictures in the catalog, but this is just the tip of the iceberg. Their entire cowherd is phenomenal with many cows to choose from. The buyer will have 1 year from purchase to make their choice, allowing lots of time to research and make your selection. I truly believe this is an unmatched genetic opportunity!

To top off the sale, the Repka's have offered 10 heifers that carry that "mamma cow" look to them. The strongest group to date from top to bottom, it's very hard to just pick one. The genetic makeup in this group will make some top matron females to move any program into an elite level.

As tradition has it, we will wrap things up with Tom & Terri Jamiesons pens of commercial heifers. Every year they are very sought after and it's hard to guess in today's market where these outstanding heifers land. This is a great chance to pick up a uniform set of commercial heifers from some great people.

Kick off bull sale season by joining us in celebrating JNR's 25 years of commitment to Fleckvieh genetics on Feb 15th at the farm. Remember the best buying value happens every year at the start of bull sale season and the quality will not disappoint. Following the sale let Jerry carve you a slice of the best prime rib you have ever tasted!

Give any of the Transcon team a call if you require any assistance, we are here to assist in your herd bull and heifer search.

JNR GRACEFUL IMAGE 802E
DAM OF LOT 1

Polled, Dilutor Free

- One of my personal favourite cow families with 16 females currently in herd and 9 lots in the sale this year.
- An extremely predictable line with calving ease, tons of longevity and fertility.
- His dam 802E is carrying bone mass and a large foot with a polled pedigree.
- 2023 maternal brother sold to repeat customers Janelle & Darrel Richard
- 4 generations of donor cows behind him on the dam side 3 of which are currently producing in herd
 - *141Y (14 yrs old) gr gr granddam
 - *410A (11 yrs old) gr grand dam and mother to Lot #59
 - *613C (9 Yrs old) grandam and mother to Lot #5
 - *802E (7 yrs old) Dam
- A polled son out of JNR Barbarian our 2023 sale high seller to LaBatte Simmentals/Circle 7 and Wolfe Farms
- Barbarians are extremely thick, loose hided and are possessing lots of do-ability.
- 3/4 brother to Lot #5

- A standout bull with eye appeal and packed with performance and an actual weaning weight 3 lbs shy of 1000 with no creep!
- #3 out of the sale offering for ADG and #2 for actual WWT
- Should turn out to be a larger frame bull
- Dam is an embryo female out of the 1986 born Haxent bull known for being a female maker.
- His mother has phenomenal four quarter attachment and was in the top 10 this year for milk crude protein and his maternal sister was #1 for Butter Fat!
- This is just her 2nd bull to date with all 3 of her females retained in herd.
- His maternal brother sold in 2022 to repeat buyer Bernard Chamberland. This is a chance to get some interesting and exciting genetics as the only offering from this cow line.

- Possibly one of the deepest bodied polled cows we have raised with an extremely huge pelvis, big foot and beautiful skeletal structure.
- Dam is an 11 yr old direct BAMBAM cow never bred the same way twice and produces extremely marketable calves (pictured at 10 yrs old)
- He has been the quietest bull right from birth
- Growth/gain would have been far better had he not gotten stuck at the hips between 2 trees in the heat spell this past summer
- A moderate framed, thick and soggy bugger
- We currently have 17 females in herd from this cow family as well as our powerhouse polled PROXY bull

- Longevity is bred right into this bull with both maternal grandmothers now 13 yrs old and paternal granddam 11 yrs old
- Stacked with performance, udder quality and maternal strength throughout
- Torque has impressed us with his first calf crop, luckily for us he threw a lot of heifers for the replacement pen
- Dam has a perfect udder

- Ranked 8th out of 73 for weaning weight in his group
- His dam is now a 10 yr old cow that is an absolute standout with impressive volume and shape
- Maternal brothers have sold to long time repeat customers Bernard Chamberland and Jason Boon
- Last year his maternal sister sold to Beechinior Land and Livestock
- Moonshine is a strong mix of some of our highest producing cow families

Polled, Diluter Free

- Like his sire JNR Torque, this calf has been a standout from the start and always an eye catcher on pasture
- Dam is a direct JNR Cashmere daughter we purchased as an open heifer from the Lonestone Farms sale in 2020
- A beautiful uddered line with disposition second to none
- This polled Torque son should make growthy calves and females you will want to keep
- We sold a 1/2 interest in Torque to Kuntz Simmentals in our 2023 sale and unfortunately we lost him after just 1 breeding season
- We AI'd with him for the 2025 calving season so with minimal semen left in the tank opportunities to acquire his progeny will be very limited

- 13 yr old dam Apollo Martina 315Z has put 6 bulls in the sale pen
- A cow that still looks phenomenal at her age and always passes on heavy muscling and easy doing qualities
- His dam entered our donor program to add some heifers into the herd and continue to build off this cow family. This flush was to duplicate his natural full sister JNR Martina 239J that was our top heifer in her year (the dam of Lot #52 being her first calf)
- His flush mate in our replacement pen this year was the heaviest weaning heifer at 975 lbs
- Another full sib was supposed to be in this years sale but unfortunately sustained a hip injury in the bull pen just prior to picturing
- There is no guess work here, there is longevity, performance and proven within our herd with full sibs now calving as well
- Ranked #3 in the sale offering for Actual weaning weight

This will be the FIRST ever JNR Boulder semen to sell publically. After numerous enquires on available semen on our walking herd bulls we decided JNR Boulder has more than proven himself worthy. He has produced highly functional progeny and both sons and daughters that we have built on for generations now. Boulder is 8 yrs old and still walking here. There is no guess work as both Father and Son have stood the test of time and have been exceptional.

Thank you, Jerry and Nicole, for the privilege to introduce this monumental offer from the JNR Farms Fleckvieh program. Built from the ground up, JNR has persistently focused on a true breeding program. Being a BREEDER is far more intricate, risky, gruelling, and frustrating than being a MULTIPLIER. Jerry and Nicole are the epitome of true BREEDER status and a dynamic duo. From the beginning, a studious and open-minded approach to assemble the type and kind of cow herd that would ultimately create a "model JNR" consistency. We all know the JNR prefix has substance and is admired amongst the industry. The hours of research. The vision of matings to compliment the next generations as always, with a knowledge of genetics and clear goals. This herd of 100% Fleckvieh Fullblood Simmental females is incredible. Stacked, stacked, and re stacked cow families are woven in every generation. The evolution of JNR Farms is nothing short of impressive, made possible through hard work, harder work, and integrity. I am proud to have witnessed, partnered with, and spent countless hours in discussion over the last 25 years.

JNR Fundamentals:

- 100% Fleckvieh – One of the largest herds in North America
- Herd of 300+ breeding females
- Polled and horned genetics
- Genetic consistency with JNR herd sires and proven cow families
- Access to exclusive JNR semen inventory for this flush!!

Congratulations in this epic achievement.

Thanks for "opening the door" for the world to appreciate the JNR Farms brand.

Proudly and respectfully submitted,
Brian Valentine

- 229Z is now 13 yrs old, she looks as youthful as a 6 yr old and one of two of the last living direct offspring off REJG Mystic 1N
- Exceptional udder quality generations deep in her maternal line
- 229Z is a larger framed cow with a big strong foot under her
- While the JNR Mystic 229Z cow herself is not a large cow family in numbers here as she has thrown mostly bull calves
- Maternal brother JNR Armor is the Sire of Lot #39-41 and Grand sire of Lot # 15, 62 and 63
- A 229Z son JNR Exxon grandsire to lot #25 was a high seller in 2020 sale purchased by KSL Simmentals
- Luna was the heaviest actual weaning weight out of the 10 heifers on offer and is extremely attractive and feminine in her type and should go on to do great things like her Dam, Grand Dam and Maternal brothers
- Very stacked on the Dams side and in addition to, being a daughter of JNR Barbarian the high selling bull in 2023 for \$165,000 to Labatte Simmentals, Circle 7 and Wolfe Farms will be a unique acquisition with huge potential

- The same maternal cow family as Lot #58
- 11 year old 410A is a herd favourite that to date has 7 progeny in our herd in addition to a Junior herd sire JNR Reward that will make his debut in next years sale
- We strive for the skeletal structure this heifer has with a deep middle, width of top and long quarter while being very clean fronted
- Madeline was #3 for actual weaning weight in the offering of the 10 heifers this year while being the second youngest
- JNR Beretta is a 3/4 brother to JNR Barbarian and has good length of body, a bit larger framed and heavy boned
- We had 5 JNR Beretta bred heifers this year and 4 of them calved within the first 2 weeks of our calving season and they are beautiful females with great mother ability and maintained really good condition
- All of his heifers were bred to either JNR Quest or Quantum and the resulting calves came out easy, fantastic pigmentation and showing strong development
- Who ever purchases this female if they choose our breeding option, JNR Quest would be a #1 candidate

- Lainey has always been a heifer that catches our eye with lots of hair, cherry red and very feminine
- She looks like a carbon copy to her Dam who is now a 3rd calving female who calved twice in the 2023 calendar year as a 1st and 2nd calver
- Sire JNR Baldwin has proven to make fantastic females in numerous herds, he is very consistent in his type with great disposition
- We have 9 JNR Baldwin females milking now and they all are showing excellent udders and are beautiful young cows
- JNR Baldwin is a bull we will continue to Ai with for years to come without a doubt, with him being gone now there will be limited opportunities to acquire his calves
- Paternal sister to JNR Barbarian and JNR Torque

Twin

- JNR Boulder and JNR Broker full brothers both come from this cow family as well
- 121H is a cherry red large double goggled young JNR Cashmere female that is moderate framed
- The super maternal Shamu cows have great udders and combined with our JNR Highlight a bull we intentionally bred for udder qualities should make for females you will want to keep
- The first JNR Highlight female to sell, out of 17 calves they all either made the bull pen, 8 replacements in our pen and 2 in the group of heifers to Oregon
- A great example of how the consistency and predicability of line breeding cow families results in profitability

Open Heifer Breeding Option

- We offer to breed any full blood heifers sold in our sale to our walking heifer bulls. To be exposed Mar 20-May 10, ultrasounded the end of May at no cost to the buyer for feed or breeding. Bred heifers will need to be picked up by the purchaser the first week of June if this option is taken.
- Insurance will be available sale day. If any animals are not insured the buyer assumes any and all risk.
- Weather permitting all bulls will be semen tested prior to sale day.
- No bulls will be loaded out sale day. All bulls will be delivered inter-province by JNR free of charge. Any bulls out of province will be delivered to central points across Canada with a \$300 credit towards trucking.
- Delivery of bulls will be approx April 1st, any bulls staying longer please make arrangements with us prior.
- The sale will be conducted under the standard Transcon Livestock Corp. Terms & Conditions. Copies will be available at the settlement desk.
- Transcon Online: View & Bid online at www.transconlivestock.com

Commercial Heifers consigned by Tom & Terri Jamieson & Family

Welcome to the 7th annual JNR sale. Congratulations to the Repka Family for Celebrating 25 years of selling bulls. We would like to say thank you to Jerry and Nicole for inviting us back for a 5th year. As always Jerry and Nicole picked a good group of heifers that are difficult to part with but showcase our program well. We bring a selection of reds and blacks sired by JNR bulls coming from cows with strong maternal backgrounds. All the heifers are on a full herd health program and have been palpated prior to the sale. These ladies are as quiet as can be because of all the hard work and time that our kids put into our cow herd. A big thanks to our herdsmen Claire, Ivy and Mason who walk through the herd doing wellness checks, help with calving and day to day chores. They are a vital part of our family farm. Thanks to all our previous buyers and bidders who have purchased our females in the past sales. **Phone - 780-206-7557**
