FOR THE INGLIS DAYCARE AND PLAYGROUND REVITALIZATION.

We are lucky to have the best little daycare and school in Inglis. Auctioning off a couple lots of homemade baking at the start of the sale. More details to follow on facebook prior to the sale.

Welcome

TO OUR 22ND ANNUAL BULL & FEMALE SALE

It's our pleasure to welcome you to another bull & female sale here at High Bluff Stock Farm. As always, we take great pride in offering you cattle that combine quality, consistency, and performance—traits we've worked hard to build into our program over many years. The beef industry continues to be an exciting place to be. With strong market demand and prices, there's a real sense of optimism about what lies ahead for us all as beef producers.

It's been an exciting and rewarding year on the show front! High Bluff Main Event and High Bluff Marksman both claimed titles as National Intermediate and Senior Bull Calf Champions, and we couldn't be more pleased with their success. While we didn't bring home the main prize at the Player Club Classic Champion, we were incredibly proud to have had three bulls make it to the finals, standing strong among some of the toughest competition in the industry. And you'll find brothers to the Player's Club Champion from last year in the bull pen and we can tell you - you're going to like them.

When you browse through this year's catalog, you'll notice again the inclusion of HRJ cattle, representing the Johnson family genetics - we manage our HRJ and HBSF cattle all the same with the same principals for breeding and same breeder guarantee. You will once again see PAX Angus bulls in the sale from Tyler Digby - it's been great to add this new Angus division to the bull sale - make sure you get a visit in with Tyler, you'll be impressed with the depth of genetics and performance on these Angus bulls.

We're excited to have another strong group of females on offer. We're proud of our herd of Momma cows. We expect them to be sound, productive, efficient, wean in a big calf, have a good disposition and look good while doing it. Our sale heifer pen follows these principles. Whether you are looking for foundation female, junior show prospect or bull builder we think you'll find something you like.

As always, we're excited about our bull pen this year. We've worked on building a consistent and uniform herd. The bulls in this year's sale are uniform in their appearance—offering excellent depth, thickness, hair quality, and functional conformation. Disposition remains a top priority in our program, and we're confident that these bulls will be valuable assets to your operation. If you are able to stop by, our pens are always open to tour. We'd be pleased to take you through the bulls and heifers anytime before the sale or give us a call to talk about your next herdsire or female needs.

To all our customers thank you for your continued support, we sincerely appreciate doing business with you. To all our family, Tomina and Ang who we are lucky to work with, and everyone who has helped us along the way, thank you for all everything. We're lucky to make our living doing what we love. We look forward to catching up with you all this sale season.

The tradition continues,

Erin

High Bluff STOCK FARM

MEET THE TEAM!

DONNA AND CARMAN started High Bluff Stock Farm in 1984. They have worked hard to grow their Charolais and Simmental purebred herd and grain production to what it is today. Carman and Donna are excited to be able to farm alongside their family.

ERIN AND STEPHEN
Erin and Stephen are both farming full time at High Bluff Stock Farm. Their daughter Lainey seems to love farming as much as they do.

TOMINA JACKSON Tomina is an integral part of all the day-to-day activities in the grain and livestock operations. She specializes in being our barn mom and chief combine driver. She spends Wednesdays and her weekends working on her Rolling D Workwear line.

FAWN JACKSON Fawn heads up the High Bluff PR department. She manages our social media accounts, helps with bull sale preparation and makes sure we are getting a show string ready to take out in the fall so she can spend her holidays doing what she loves the most- showing cattle!

ANG BECKER Ang joined the High Bluff team a couple years ago during calving season. Turns out the Aussie who started not liking being outside during winter has had a change of heart and now happily tolerates working outside all winter as long as it includes working with baby calves.

SALE DAY WEIGHTS will be available a couple days prior to the sale.

BREEDING GUARANTEE All bulls are fully guaranteed to be a breeding bull as outlined by the Charolais, Simmental and Angus Breeder's Guarantee Guidelines. If a problem occurs with your purchase, please notify us as soon as possible and if needed we will get you a bull of equal quality to cover your cows that season. Any bull or female that does not prove to be a satisfactory breeder if in healthy condition may be returned to High Bluff Stock Farm at the buyers expense. The seller will have the right and the privilege of six months from date or return to prove the bull or heifer a breeder. Should the animal prove to be a breeder, they will be returned to the buyer and the matter will be considered closed. If the bull fails his semen test or proves not to be a breeder we will give you a sales credit or replace your bull with another bull of equal quality or lend you a bull to make sure your cows get bred. No guarantee is given that semen collected from a bull will freeze. If the female fails to get pregnant, the seller may either provide a sale credit to the buyer or replace the animal with another of equal value.

HERD HEALTH The health of our herd is excellent. We are committed to raising cattle the best we can in the environment we have. Animal health, temperament, fitness and longevity are important to us and key to our own and our customers success. We work with a nutritionist to make sure all our cattle's dietary needs are met. Our bulls and heifers are developed on a TMR ration to promote growth and longevity. We have a complete herd health and vaccination program with Roblin Vet Clinic. Prior to the sale all bulls and heifers will have been poured and vaccinated with Bovi Shield Gold and evaluated by a licenced veterinarian.

TERMS & CONDITIONS The sale will be conducted under the standard Transcon Livestock Corp Terms & Conditions. Copies will be available at the settlement desk.

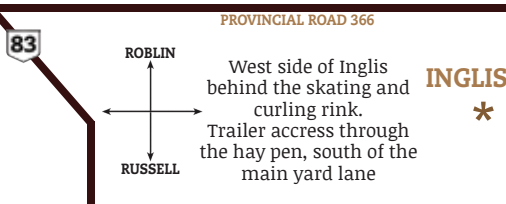

PHOTOS & VIDEOS Pictures taken by High Bluff Stock Farm Crew
Videos taken by John Wright - Wright Livestock Marketing Services Videos can be found at cattlevids.ca

RIGHT TO SEMEN We reserve the right to draw semen on any bull in the sale for in herd use, at our expense and the buyer's convenience.

DELIVERY Free delivery to your farm free of charge up to 200 km. Other destinations can be arranged at cost. We will Deliver bulls from March 16 to May 1st at our convenience. If you are unable to take your bull when we are going by you can pick up your bull when it works for you. Board free until May 1st or until we are able to deliver your bull- whichever comes first. \$5/day after that. All animals left at the farm after the sale must be insured. The High Bluff team will provide the best care we can to the animals that stay on the farm but all bulls and females become the risk of the buyer once sold.

DISCLAIMER We take every effort to make sure everything in the catalog is correct. If there is any discrepancy between the catalog and breed association websites, the website is correct. All descriptions are opinion.

WELCOME FROM TRANSCON LIVESTOCK

Welcome to the 22nd annual High Bluff Stock Farm Bull and Female Sale!

The Jackson family is a multi-generation mixed farming operation and highly respected in the agriculture industry. Not only running a multi-breed registered cow herd but are also pedigreed seed growers. Family is priority to Carman and Donna, and this really shines through when you see the involvement of all their daughters and their spouses. Definitely an all hands-on deck operation, which keeps the Family Tradition going on the ranch at Inglis MB.

I highly recommend that if you're looking for a summer getaway, give the Jackson's a call and stop by for a multiple pasture tour of the Mamma cows out on grass with their impressive calves at side. You won't be disappointed, I can assure you!

Winter bull sale travel is always a highlight for me and something I look forward to. The anticipation of walking into a bull pen and seeing how a breeding program has progressed from one year to the next. The satisfaction of being able to write down numerous tattoo's on bulls that will work for other breeders' programs, as well as the most critical commercial cowman. This is a testament to the HBSF program, and goes a long way down the line when you see the number of repeat buyers from year to year. To be able to do this in two different breeds is a big task and a huge success

The bull pen this year is very strong from top to bottom in both the Charolais and Simmental respective divisions. There will be something for everyone and a bull that will fit your budget! Sire groups that have some numbers, which tells me HBSF believes in the sires they chose to use and know how to translate that to the powerful cowherd.

You will find both power bulls as well as more calving ease type bulls as you study the offering. Bulls that are the right kind and type for today's cattle industry: big topped, big assed, soft sided, loose made, nice headed and smooth shouldered bulls with tons of hair and length of spine, along with super quiet dispositions. In today's cattle market those extra pounds are a huge dividend on your paycheck POUNDS = PROFIT \$\$\$\$. Consistency and uniformity in both the Charolais and Simmental bulls is very notable and really rises to the top.

Once again, this year you will have the opportunity to tap into the High Bluff replacement heifer pens. Many of these females will be sisters to the bulls selling. These are a great representation of cow families at HBSF. Don't miss your opportunity here to sit in and buy females from a foundation/reputation cowherd. Whether you are a newer young breeder or a life timer in the industry, the opportunity to get a piece of the program is today.

You will also be able to bid on and purchase Black Angus bulls from Paxhill Angus, Tyler Digby. Although not big in numbers, these are a great representation of the Angus breed. Great bulls to add to your cross-breeding programs.

We hope to see you all on Friday, March 14th for some great hospitality and the opportunity to bid on and purchase quality cattle as the Tradition Continues.

In the event you are unable to attend the sale and would like to purchase cattle, give one of us at Transcon a call and we would be happy to go over the sale offering with you and give you our unbiased professional opinions.

WELCOME FROM BOHRSON MARKETING

For 22 consecutive years, the Jackson Family of High Bluff Stock Farm has been hosting an annual bull sale that has certainly been well recognized across North America as a trusted source for your Charolais and Simmental needs. Their program is one to be admired as they have worked diligently to assemble a very uniform and consistent set of cows across both breeds with a heavy emphasis on the fundamentals of what makes a good cow a good cow. Foot and udder quality, do-ability and productivity with immense eye appealing would be a few great terms to use when you think of a HBSF cow no matter the colour. It really is evident that they have a type that they deem is the ideal type of cow and they have stuck to their guns in these breeding philosophies putting together one of the most impressive sets of cows you will see on grass. This in turn perfectly represents their bull pen as the uniformity and consistency in it is commendable. We wish to help invite cattle folks on behalf of the Jackson families to this must attend event on March 14th!

The Charolais Bulls for the 2025 offering are a set of powerful, performance orientated rascals with many calving ease options as well. These bulls are thick made, long bodied with awesome hair coats. They are lead by an impressive set of "JJ" sons that are truly the Cattlemans type and kind. Other sire groups such as Maximum Impact, Three Thieves, Ballyhoo and Jack Daniels, to name a few, have put together one of the stoutest and deepest pens of Charolais Bulls you will find. Many options lay in these Charolais Bulls including a great selection of red factors.

The Simmental Bulls are made up of some of the most exciting genetics in the breed and the type and kind of these bulls certainly backs that up. They are lead by a special son of Favour in lot 43 and feature many exciting bulls by the walking 5015C son, industry leader for performance and maternal Walk The Line, as well as the popular and proven Playmaker. These Simmental Bulls are bred with the same principles as the Charolais Bulls and are expected to get out and work to add a positive impact to your bottom line.

The Angus bulls on offer from Tyler Digby's Paxhill Farms operation although small in numbers and anything but that on a scale standpoint. Performance bulls represented by the exciting Mindbender 141D, and calving ease options by the world renowned Rainfall 6846 give you a good selection of Angus bulls that you won't want to miss!

Again this year is a great sampling of open papered heifers from the heart of the HBSF replacement pen. These females represent the powerful cow families that work in the herd and are sisters to the bulls on offer giving you a real taste of the maternal side of the sale bulls pedigrees. This is a great opportunity to get a High Bluff Female early in the year to take home and breed how you wish and in many cases, select one that can have a halter hung on her as there is many great Junior Member projects just waiting to get started.

We do encourage you to make plans to be in Inglis on March 14, 2025 to evaluate this impressive set of cattle on offer. The combination of people and stock is something you don't want to miss. Give anyone from High Bluff a call to visit about the cattle and make a trip to the bull pen anytime prior to view the offering. If for whatever reason your busy schedules keep you away from sale day, feel free to give any of us at BMS a call as we would be happy to go through the cattle with you and assist in your bidding and buying needs. We look forward to hearing from you and hope to see you sale day!

PARENT VERIFIED/100K TESTED

Marksman has been right on the mark from day one. A true stand out from the day he hit the ground. With the combination of Innovation and Natassia 44E you are bound to construct one exciting individual. You will be hard pressed to find a stouter and bigger hipped bull in the pen that is so robust in rib shape. Masculinity, muscle and movement make their mark amongst some of the top attributes. The early days for Marksman were bright, he had a successful fall season on the halter but we feel the best is yet to come from this individual.

Natassia 44E is a powerful female from a proven and productive cow family. She has a spot on production record- 7 calves in the last 7 years, each calving around the same time each year. 3 top end power females that have all been retained in the herd and are in production. 1 calf on the ground, and 2 bulls in the bull sale, 1 of which was our high selling bull in 2021.

PARENT VERIFIED/100K TESTED

A pedigree that is becoming a staple in the Charolais breed. Keystone was used in our AI program with great results in quality; producing a couple top end heifers in the replacement pen and Main Event. Main Event made a number of friends this past fall on the show road. He has tremendous length, depth of side, athleticism and attractive look. Set Main Event in motion and this guy can really get out and go. The greatest characteristic to Main Event undoubtedly is his dam; Lady Slipper 72F. Not only is 72F a stunning front pasture type female with a near perfect udder, her track record is impeccable. In last year's sale catalog we wrote that we were excited about her Keystone bull calf already. We're excited that she had another Keystone bull calf at side this year, and we're going to cross our fingers for a heifer calf next year. Main Event's maternal brother was one of our high sellers last year to P&H Ranching.

One of the most complete and eye appealing JJ sons on offer. Moving On Up is so correct in his skeleton and one super hairy individual. He has that added depth of side, admirable in hip structure and robust in dimension. He is backed by a beautiful Triumph 50B dam that knocked it outta the park with every chance she has had. Movin On Up's full brother was one of our high sellers in last year's sale going to Ferme Coujo Charolais. His Grand dam had one of our high sellers last year and has another pen favourite this year as lot 41 who is a full sib to Movin On Up's dam.

Mastermind is the powerhouse of the pen posting the highest actual WW and YW. Powerful constructed yet maintaining that sought after calving ease. An individual that combines performance yet maintains great phenotype and structural soundness. In a business where pounds pay, this bull is sure to add profitability to any program.

His dam is a good looking, big bodied, no miss, herd bull building machine. She has sired 5 top end sale bulls in a row for the bull sale and a female that we retained in the herd. Each year the bull calf that she raises comes to the top of the pen in weaning and yearling weights. With Mastermind, you're getting a bull that is built on strong, reliable genetics and the performance to match.

Maximus is the real deal with herd bull written all over him. He is explosive in muscle pattern and density yet lays in a tidy smooth shoulder. The JJ x Deputy mating may as well be a match made in heaven cause it flat out works and produces some great results. A JJ x Deputy female might be our favourite female in the replacement pen. The Paris cow family is among the elite, producing greats like Crowd Favourite, Bulletproof and Limitless. Maximus is a bull that we feel could really go out and do some exceptional things.

The JJ x Deputy combination is fast becoming a go to mating with the overall consistency in offspring. Not only does this combination produce bulls but the females look to be just as exciting. Montana is big ribbed, stout hipped and has a great muscle pattern. Comes from the same cow family as the popular HRJ Maverick 556C.

LOT 7

LOT 8

High Bluff Maddox continues to impress us. His depth of quarter, loads of middle, and a natural thickness that is evident in his structure, he is a bull with real presence. His muscle and overall structural balance give him an edge in both performance and appeal. His blend of power, natural thickness, and proven pedigree makes him a bull to keep on your radar. His dam, a moderate, nice uddered Monsoon female, is proving to be a consistent producer and is a prime example of the strength of the Gellia cow family that she comes from. The Gellia females are known for their longevity and reliability in producing top-quality offspring.

LOT 10

High Bluff Merrit is a bull that combines moderation, substance, and complete structure in one impressive package. He's tanky, thick and hairy. Merrit's dam goes back to 15Y who has had a big impact on our herd being the dam of Casanova as one of her many accomplishments. One of the most consistent sire groups we've ever worked with has been the JJ sire group, and Merrit is a prime example of what they bring to the table. JJ passes on length, style, a standout hair coat, and a great disposition to his offspring, and Merrit embodies all of these traits. He's a stout, thick bull that has the genetic backing to consistently produce high-quality calves.

High Bluff Magnum follows the proven JJ x Triumph stamp, showcasing great hair, natural muscle expression, and consistency that is a hallmark of these genetics. This bull has a blend of power and style, with the genetic foundation to back it up. Magnum's dam is a 50B Triumph female, purchased from Happy Haven at the No Borders Sale, where she was offered alongside her dam. This cow has proven to be a solid investment, having produced her second calf for the bull and female sale in two years.

A couple of very unique breeding pieces with Maximum Impact x Bronco mating. Outcross pedigree. A pair of bulls that get it right in terms of the fundamentals; built right from the ground up solid in foot and joint structure. These bulls are so similar in design it takes the tag to tell them apart. They are deep made, level topped and have a great disposition.

They are backed by some of our most consistent genetics and cow families. Both 87B and her dam 176W are known for their youthfulness, fertility, udder quality, structure and for consistently producing top end bulls and females for the sale. The Maxim Impact daughters in the Johnson Charolais herd are looking like the right type. **100K TESTED/ PARENT VERIFIED. LOT 15-HOP**

Momentum is the result of a mating that continues to work. This bull commands attention and respect. It is hard to find a fault in him. He offers so much to the red factor Charolais world; length of spine, rib shape, muscle dimension with character and great disposition. Dandy 960G is fast becoming a top producer. Her first two sons were retained and herd bulls for Johnson Charolais here at HighBluff. We're glad to be getting some red hairy females off of this flush this year.

High Bluff Medallion is one of the most intriguing 50B sons to date, offering a combination of quality and presence that is truly hard to match. A bull that offers so much quality it's hard to find a hole in him. He is so robust in skeletal design and massive in muscle definition yet structurally complete and sound. Medallion is level topped with great stoutness. He is sound from the ground up, square on all four and really stands out once you set him in motion hitting his track with every step. He is a bull that probably hits you the hardest in the pen with his overall presence and character; with his great skull, herd bull look and construction of his front third. And for his dam, well check out her picture, she's a beauty. The Gellia cow family are no stranger to raising great ones.

If you're searching for a black bull that combines exceptional quality with a standout presence, look no further than High Bluff MVP. This bull is truly a one-of-a-kind individual. Even if black simmentals aren't your usual choice, taking the time to view MVP is worth it—he brings everything to the table in terms of structural integrity, power, and style. MVP is remarkably solid in his makeup. He's extremely masculine, with excellent bone structure, and moves effortlessly, showcasing his balance and fluidity. His impressive width, big top, and overall depth further highlight his impressive presence. Add to that his "look at me" charisma, and you'll quickly see why MVP is so special. His dam is a consistent producer of both top-quality bulls and females, and she has proven herself as one of the best in our herd. This calf is a direct reflection of that excellence and is truly one of the top bulls we've raised. Don't hesitate to reach out with any questions—MVP is a bull you'll want to consider adding to your operation. *Retaining a ¼ semen interest for in herd use.*

Take a look at these handsome devils, loads of character and hip. Their dam is a family favourite - Ms. Splash is a friendly and gentle cow that is always up for a scratch. She goes back to the Lashes/Muchmore cow family who are some of our most beautiful and consistent producing females. This cow family has exceptional longevity, structure, fertility and moderates birth weight. Her bull in the 2023 bull sale was one of our high sellers to Niwa Ranching. You'll note that these two bulls did an impressive job of competing with their peers when it came to weaning and yearling weights. A feat more impressive when you know that Splash raised both of them herself and bred and calved the same time this year as she did last.

High Bluff Major is another standout from 11G, Driller daughter who is a proven producer who consistently delivers exceptional calves. Last year, her son, High Bluff Legend, was one of the top sellers and Major is continuing that trend. This calf is the result of another excellent mating with Walk the Line, a combination that has produced consistent, high-quality offspring that are at the forefront of the breed for performance. Major's performance is exceptional, ranking in the top 1% for both yearling and weaning weights. 11G herself is a big, beautiful, quiet female with a good udder, tracing back to the Wanda cow family we purchased from Friday Night Lights. We've had great success with the Wanda females. We A'd to Major's full brother a bit last year.

A combination of Harvie Wallbanger and Mader Walk the Line genetics, this red bull is correct in his make-up with strong structure and balance. His pedigree speaks for itself, and his solid build makes him a reliable choice for any breeding program looking for consistency and quality. He's very near the top of the class on yearling and weaning weights. The Walk the Line females we have in production have near perfect udders, Murdoch's full sister might be the nicest Walk the Line female we have, the chrome on her and 105C's face is a nice added bonus.

LOT 52

We really appreciate what the Playmaker females can wean in. Major League ranks #1 in his group for both weaning and yearling weights. The Walk the Line first calf heifers are simply beautiful. We're really happy with them. Whether you are looking for a bull to sire a great group of market animals or hoping to build a replacement pen of females as well we think Major League is the right type. **HOMO POLLED BY PARENTAGE.**

His dam is a nice looking Driller female with a distinctive blaze face and a great temperament. Notably, his dam produced 2023's heaviest bull High Bluff Kaboom, one of our highest selling Simmentals to D Double J Ranch that year. In 2024 she raised another standout bull who was also top of his class in yearling and weaning weight. While McCoy is a bit younger in the pen, he weighs right in there with the older bulls. He's a nicely made bull that we think would be a good fit for a lot of herds and there is proven performance built into his pedigree.

HOMO POLLED BY PARENTAGE Everyone likes a blaze! Money Stripe's dam and Grand dam both have it. His dam, who calved a bit later her first year in production, jumped right up and calved first cycle this year. We are sure glad she did, she is a young female that we like a lot. Her mother, 88E, is a big bodied blaze-faced female who consistently raised top-tier calves, both in quality and yearling and weaning weights, many of which have ranked among the best in our Simmental sales. With Driller and 72P in the pedigree, you can expect good longevity, structure and disposition. If you're focused on building a quality female program, this is a calf we recommend that you consider. And as for the money stripe—well, that's just the icing on the cake! Don't underestimate the potential in this young bull—there's a lot of value and opportunity here. HOP by parentage.

HOMO POLLED BY PARENTAGE.

High Bluff Monty is a very handsome, dark red bull with an excellent quarter and impressive muscle expression. His dam goes back to our Lashes cow family who are some of our most beautiful females. Last year her daughter sold in the sale to CJL Livestock and the boys took her out on the show road. I'm not sure she could have gone to a better home, getting the pictures and videos of their show journey and successes really was the best.

HOMO POLLED BY PARENTAGE.

Here's a nicely patterned red bull from the Lashes cow family. He's a soft sided, hairy, sound and well balanced bull. You can really appreciate foot structure as well as the depth of flank and depth of chest in Milwaukee. He has a calm and easy going disposition much like his dam. A bull that will sire a strong set of steers or replacement females.

MacGyver is a very complete bull in terms of muscle pattern, density and design. A character and look to him that reads herd bull. He is level in his top and stout through his hip with that extra dimension and depth in his quarter. MacGyver is bold sprung in terms of rib shape and capacity. He is out of a beautiful Driller female that is becoming one of the top end females.

PAXHILL FARMS BLACK ANGUS

Tyler Digby
Dropmore, MB
(250) 681-3270
paxhillfarms@gmail.com

Welcome to the Paxhill Farms Black Angus bull offering for 2025! What a great time to be in the cow-calf business with record high prices that just seem to be defying gravity. If you are as excited about the future of our industry as I am, you will be looking for bulls to produce those replacement heifers to grow your herd, or to package up and sell as replacements or bred to help others grow their herds. These bulls proudly represent some of my favourite and most consistent cow families and are sired by some of the best maternal making sires in the breed in my opinion.

The Bar-H Mindbender 141D females are consistently deep sided and soggy, calve easy by shortening up the gestation, milk heavy and bring home the pounds in the fall. SAV Rainfall 6146 is quickly climbing the ladder as one of the legendary SAV female makers with his very consistent, moderate framed, smooth and feminine daughters. If you take a look through the pedigrees of my cow herd, it will become pretty obvious that I am a Rainfall fan.

Please accept my invitation to come to our farm to view these bulls, their mothers, siblings and half siblings. I am proud of the herd that calls Paxhill Farms home and am happy to show them off and discuss how they could fit into your program over a cup of coffee.

This bull has a bit softer look than most of the Mindbender offspring with a graceful neck extension. His moderate framed but huge barreled dam is a favourite around our farm with her docile nature that she shares with this bull. Her name appears in the pedigree of many of the Paxhill Farms cowherd for good reason. Recommended for cows, although I would try him cautiously on a few heifers with easy calving pedigrees. Gestation: 274 days

Rather than copy and paste, I will just say please look at 45M, these bulls are so similar, right down to their performance and gestation, and come see how consistent their Excitement half sister dams are. If you are running a large group of heifers or cows, use that consistency to your advantage by taking home both these bulls and put together a pen of calves that look like they came out of a photocopier! Gestation: 280 days
HEIFER SAFE

LOT 70

Open Heifers We're excited to have another strong group of females on offer. We're proud of our herd of momma cows. We expect them to be sound, productive, efficient, wean in a big calf, have a good disposition and look good while doing it. We try our best to build a strong, consistent and diverse genetic bank. Whether you are looking for a foundation female, junior show prospect or bull builder we think you'll find something you like.

Ballyhoo stamps all of his offspring with a bit more of a rounded muscle shape and a great disposition. The Ballyhoo cattle are good footed and long spined. The Ballyhoo females in production are beautiful cows that milk well. He has spent the last few seasons walking at both High Bluff Stock Farm and Triple C Charolais. **HOMO POLLED**

Three Thieves is a bull we bought a couple years ago to use on our 2nd calvers. Since then we have used him very successfully on 2nd calvers and in our cow herd. The first couple years of calving to Three Thieves all of his calves have been born unassisted. Three Thieves is a smooth made, eye-appealing bull that leaves a very consistent set of bulls – attractive in their makeup, hairy, smooth made, and controls birthweight quite well. He is a HBSF Bodacious son that goes back to ELH Ms Gellia 12W that was a real asset to our farm. She was a beautiful big volume cow that produced some exceptional bulls and females. Bodacious is a HD bull that we really admired and he has done exceptionally well at Palmers with close to 200 animals registered off of him. On his dam's side he is backed by HVA Whistle 66A a female that Carman really admired when we saw her. **HOMO POLLED**

JJ walks the pastures here and in AB at MJT Cattle. We retained an interest in JJ and we are sure glad we did. JJ is a nicely made bull who is smooth made but well muscled and soft sided. He has a tremendous amount of depth of body and natural thickness. He has that herd bull presence, lots of nuts and a ton of hair and a nice big foot under him. As an extra bonus he is about as good-natured as they come – a quality that he passes onto his calves. JJ is backed by some of our favourite dams 942D is an easy keeping, big ribbed female with a good disposition and udder. 176W was one of our nicest made, most consistent, top-producing cows in our herd. At 10 years of age she looked great, maintained her youthfulness and impeccable udder quality and had a great disposition. 176W was known to shorten gestations, which JJ himself often does. We successfully showed JJ at Agribition where he was Intermediate Bull Calf Champion as well as on the international stage as People's and Judges choice at the International Charolais show. **HOMO POLLED**

Deputy is a heifer bull that has been successfully used at Johnson Charolais for 5 seasons and High Bluff Stock Farm for 3 seasons. What I first noticed about the Deputy sire group was the consistency in their growth, hair and disposition and was impressed with the weaning and yearling weights of the sire group. First calf heifers that raise off-spring that can compete with what a mature female can raise is no small feat! Deputy consistently sires calves that are the right size and shape for heifers. **HOMO POLLED**

The \$280,000 breed influencer that has sired an extremely strong set of sons and daughters in his first couple calf crops. He is backed by one of the most popular and influential donor females in the Simmental industry, darlin 613D who has become a potent breeding piece no matter how she is mated. Walk the Line had a decorated show career and has matured into a soggy, rugged herd bull that is tanky, extremely good looking with a real herd bull head and crest to him. Our first calving Walk the Line females are beautiful and have impeccable udder quality. **HOMO POLLED**

Playmaker is a dark red Simmental bull who has a nice combination of calving ease and performance, backed by a solid set of EPD's. He is in the top 2% for weaning and yearling weights. Playmaker calves are born dark red, easily and have great get up and go when born. We really appreciate what our Playmaker females in production can wean in. **HOMO POLLED**

Jack Daniels offers powerfully constructed outcross red genetics. We really admire the presence, masculinity, depth, volume and muscle shape this bull possesses. He has a nice masculine head and really possesses the characteristics we look for in a herd bull. His dam is a very sound, dark red female with an excellent udder that is still working in our herd. Jack Daniels walks the pasture at both Johnson Charolais and High Bluff Stock Farm. **HOMO POLLED**
